ACKNOWLEDGMENTS

Ian R. O'Brien was responsible for the technical supervision and coordination of this volume under the direction of **Lars B. Johanson**, Chief, Statistical Compendia Branch. Assisting in the research and analytical phases of assigned sections and in the development aspects of new tables were **Richard P. Kersey**, **Jean F. Mullin**, and **Michael Sellner**. **Catherine Lavender** provided primary editorial assistance. Other editorial assistance was rendered by **April C. Harris**, **Connie Nadzadi**, and **Virginia Zamaitis**.

Maps were designed and produced by **Connie Beard** and **Jessica Dobrowolski** of the Cartographic Products Management Branch within the Geography Division.

Catherine M. Raymond, **Theodora Forgione**, **Linda Chen**, and **Diane Oliff-Michael** of the Administrative and Customer Services Division, **Francis Grailand Hall**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **Claudette E. Bennett**, Assistant Division Chief, and **Wanda Cevis**, Chief, Publications Services Branch.

The cooperation of many contributors to this volume is gratefully acknowledged. The source note below each table credits the various government and private sector agencies that have collaborated in furnishing the information for the *Statistical Abstract*.

Preface

The *Statistical Abstract of the United States*, published since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix I, which comprises the Guide to Sources of Statistics, the Guide to State Statistical Abstracts, and the Guide to Foreign Statistical Abstracts.

This volume includes a selection of data from many statistical sources, both government and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts. Data not available in publications issued by the contributing agency but obtained from the Internet or unpublished records are identified in the source notes. More information on the subjects covered in the tables so noted may generally be obtained from the source.

Except as indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is primarily given to national data, many tables present data for regions and individual states and a smaller number for metropolitan areas and cities. Appendix II, Metropolitan and Micropolitan Statistical Areas: Concepts, Components, and Population, presents explanatory text, a complete current listing and population data for metropolitan and micropolitan areas defined as of December 2006. Statistics for the Commonwealth of Puerto Rico and for island areas of the United States are included in many state tables and are supplemented by information in Section 29. Additional information for states, cities, counties, metropolitan areas, and other small units,

as well as more historical data are available in various supplements to the *Abstract* (see inside back cover).

Statistics in this edition are generally for the most recent year or period available by summer 2008. Each year over 1,400 tables and charts are reviewed and evaluated; new tables and charts of current interest are added, continuing series are updated, and less timely data are condensed or eliminated. Text notes and appendices are revised as appropriate. In addition, three special features—*Historical Statistics*, *State Rankings*, and *USA Statistics in Brief*—can be found on our Web site: <<http://www.census.gov/compendia/statab/>>.

Changes in this edition—This year we have introduced 49 new tables covering a wide range of subject areas. These cover a variety of topics including: religious composition of U.S. population, assisted reproductive technology, military retirement system, labor violations, aquaculture products sold, homeowner and rental vacancy rates by state, and expenditures for wildlife-related recreation. For a complete list of new tables, see section titled “New Tables,” p. xi.

Statistical Abstract on other media—The *Abstract* is available on the Internet and on CD-ROM. Both versions contain the same material as the book, except for a few copyrighted tables for which we did not receive permission to release in these formats. Our Internet site <<http://www.census.gov/compendia/statab/>> contains this 2009 edition plus earlier editions in Adobe Acrobat .pdf format. Spreadsheet files for each table in the book are also available on the Web site and CD-ROM (free distribution of single copies on request). In many cases, the spreadsheet files show more years and/or subject/geographical detail.

Statistics for states and metropolitan areas—Extensive data for states and metropolitan areas of the United States can be

found in the *State and Metropolitan Area Data Book: 2006*. This publication minus some data items, as well as selected rankings of the states and metropolitan areas, is available on our Internet site at <<http://www.census.gov/compendia/smadb>>.

Statistics for counties and cities—

Extensive data for counties can be found in the *County and City Data Book: 2007*. It features 175 data items covering everything from age and agriculture to retail trade and water use for all states and counties with U.S. totals for comparison. Also included are approximately 80 data items for cities with populations of 25,000 or more. Six tables present nearly 80 additional data items from the 2005 American Community Survey for 242 incorporated places with populations of 100,000 or more.

This publication is available on our Internet site at <<http://www.census.gov/compendia/ccdb>> (tentative). For a database with over 6,000 county items, check out USA Counties at <<http://censtats.census.gov/usa/usa.shtml>>.

Limitations of the data—The contents of this volume were taken from many

sources. All data from censuses and surveys or from administrative records are subject to error arising from a number of factors: Sampling variability (for statistics based on samples), reporting errors in the data for individual units, incomplete coverage, nonresponse, imputations, and processing error. (See also Appendix III, p. 897.) The Census Bureau cannot accept the responsibility for the accuracy or limitations of the data presented here, other than those for which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Census Bureau.

For additional information on data presented—Please consult the source publications available in local libraries or write to the agency indicated in the source notes. Write to the Census Bureau only if it is cited as the source.

Suggestions and comments—Users of the Statistical Abstract and its supplements (see inside back cover) are urged to make their data needs known for consideration in planning future editions. Suggestions and comments for improving coverage and presentation of data should be sent to the Director, U.S. Census Bureau, Washington, DC 20233.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Unit indicators show the *specified quantities* in which data items are presented. They are used for two primary reasons. Sometimes data are not available in absolute form and are estimates (as in the case of many surveys). In other cases we round the numbers in order to save space to show more data, as in the case above.

EXAMPLES OF UNIT INDICATOR INTERPRETATION FROM TABLE

| Year | Item | Unit Indicator | Number shown | Multiplier |
|----------------|-----------------------------|------------------------|--------------|------------|
| 2003 | Value of seizures | \$ Thousands | 94,019 | 1,000 |

To Determine the Figure it is Necessary to Multiply the Number Shown by the Unit Indicator:

$$\text{Value of seizures by Customs and Border Patrol} - 94,019 \times \$1,000 = \$94,019,000 \text{ ($94 million)}$$

When a table presents data with more than one unit indicator, they are found in the headnotes and column headings (Tables 2 and 25), spanner (Table 38), stub (Table 24), or unit column (Table 151). When the data in a table are shown in the same unit indicator, it is shown in boldface as the first part of the headnote (Table 2). If no unit indicator is shown, data presented are in absolute form (Table 1).

Vertical rules are used to separate independent sections of a table (Table 1), or in tables where the stub is continued into one or more additional columns (Table 2).

Averages—An average is a single number or value that is often used to represent the “typical value” of a group of numbers. It is regarded as a measure of “location” or “central tendency” of a group of numbers.

The *arithmetic mean* is the type of average used most frequently. It is derived by summing the individual item values of a particular group and dividing the total by the number of items. The arithmetic mean is often referred to as simply the “mean” or “average.”

The *median* of a group of numbers is the middle number or value when each item in the group is arranged according to size (lowest to highest or visa versa); it generally has the same number of items above it as well as below it. If there is an even number of items in the group, the median is taken to be the average of the two middle numbers.

Per capita (or per person) quantities—a per capita figure represents an average computed for every person in a specified group (or population). It is derived by taking the total for an item (such as income, taxes, or retail sales) and dividing it by

the number of persons in the specified population.

Index numbers—An index number is the measure of difference or change, usually expressed as a percent, relating one quantity (the variable) of a specified kind to another quantity of the same kind. Index numbers are widely used to express changes in prices over periods of time, but may also be used to express differences between related subjects for a single point in time.

To compute a price index, a base year or period is selected. The base year price (of the commodity or service) is then designated as the base or reference price to which the prices for other years or periods are related. Many price indexes use the year 1982 as the base year; in tables this is shown as "1982 = 100." A method of expressing the price relationship is: The price of a set of one or more items for a related year (e.g. 1990) **divided by** the price of the same set of items for the base year (e.g. 1982). The result multiplied by 100 provides the index number. When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

Average annual percent change—Unless otherwise stated in the *Abstract* (as in Section 1, Population), average annual percent change is computed by use of a *compound interest formula*. This formula assumes that the rate of change is constant throughout a specified compounding period (1 year for average annual rates of change). The formula is similar to that used to compute the balance of a savings account that receives compound interest. According to this formula, at the end of a compounding period the amount of accrued change (e.g., school enrollment or bank interest) is added to the amount that existed at the beginning of the period. As a result, over time (e.g., with each year or quarter), the same rate of change is applied to a larger and larger figure.

The *exponential formula*, which is based on continuous compounding, is often used to measure population change. It is preferred by population experts, because they view population and population-related subjects as changing without interruption, ever ongoing. Both exponential and compound interest formulas assume a constant rate of change. The former, however, applies the amount of change continuously to the base rather than at the end of each compounding

period. When the average annual rates are small (e.g., less than 5 percent) both formulas give virtually the same results. For an explanation of these two formulas as they relate to population, see U.S. Census Bureau, *The Methods and Materials of Demography*, Vol. 2, 3d printing (rev.), 1975, pp. 372–381.

Current and constant dollars—

Statistics in some tables in a number of sections are expressed in both current and constant dollars (see, e.g., Table 659 in Section 13, Income, Expenditures, Poverty, and Wealth). Current dollar figures reflect actual prices or costs prevailing during the specified year(s). Constant dollar figures are estimates representing an effort to remove the effects of price changes from statistical series reported in dollar terms. In general, constant dollar series are derived by dividing current dollar estimates by the appropriate price index for the appropriate period (e.g., the Consumer Price Index). The result is a series as it would presumably exist if prices were the same throughout, as in the base year—in other words, as if the dollar had constant purchasing power. Any changes in this constant dollar series would reflect only changes in real volume of output, income, expenditures, or other measure.

Explanation of Symbols

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- B Base figure too small to meet statistical standards for reliability of a derived figure.
- D Figure withheld to avoid disclosure pertaining to a specific organization or individual.
- NA Data not enumerated, tabulated, or otherwise available separately.
- S Figure does not meet publication standards for reasons other than that covered by symbol B, above.
- X Figure not applicable because column heading and stub line make entry impossible, absurd, or meaningless.
- Z Entry would amount to less than half the unit of measurement shown.

In many tables, details will not add to the totals shown because of rounding.

Telephone & Internet Contacts

To help *Abstract* users find more data and information about statistical publications, we are issuing this list of contacts for federal agencies with major statistical programs. The intent is to give a single, first-contact point-of-entry for users of statistics. These agencies will provide general information on their statistical programs and publications, as well as specific information on how to order their publications. We are also including the Internet (World Wide Web) addresses for many of these agencies. These URLs were current in July 2008.

Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the U.S. Census Bureau, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys.

Decennial censuses—The U.S. Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of members of the House of Representatives among the states. For over a century after the first census in 1790, the census organization was a temporary one, created only for each decennial census. In 1902, the Census Bureau was established as a permanent federal agency, responsible for enumerating the population and also for compiling statistics on other population and housing characteristics.

Historically, the enumeration of the population has been a complete (100 percent) count. That is, an attempt is made to account for every person, for each person's residence, and for other characteristics (sex, age, family relationships, etc.). Since the 1940 census, in addition to the complete count information, some data have been obtained from representative samples of the population. In the 1990 and 2000 censuses, variable sampling rates were employed. For most of the country, 1 in every 6 households (about 17 percent) received the long form or sample questionnaire; in governmental units estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data for small areas. Exact agreement is not to be expected between sample data and the 100-percent count. Sample data may be used with confidence where large numbers are involved and assumed to indicate trends and relationships where small numbers are involved.

Current Population Survey (CPS)—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutionalized civilian population. The sample is located in 824 areas with coverage in every state and the District of Columbia and is subject to sampling error. At the present time, about 60,000 occupied households are eligible for interview every month; of these, about 8 percent are, for various reasons, unavailable for interview.

While the primary purpose of the CPS is to obtain monthly statistics on the labor force, it also serves as a vehicle for inquiries on other subjects. Using CPS data, the Census Bureau issues a series of publications under the general title of *Current Population Reports*, which cover population characteristics (P20), consumer income (P60), special studies (P23), and other topics.

Estimates of population characteristics based on the CPS will not agree with the counts from the census because the CPS and the census use different procedures for collecting and processing the data for racial groups, the Hispanic population, and other topics. Caution should also be used when comparing estimates for various years because of the periodic introduction of changes into the CPS. Beginning in January 1994, a number of changes were introduced into the CPS that effect all data comparisons with prior years. These changes included the results of a major redesign of the survey questionnaire and collection methodology and the introduction of 1990 census population controls, adjusted for the estimated undercount. Beginning with the 2001 CPS Annual Demographic Supplement, the independent estimates used as control totals for the CPS are based on civilian population benchmarks consistent with Census 2000. In March 2002, the sample size of the Annual Demographic Supplement was increased to approximately 78,000. In 2003 the name of the March supplement was changed to Annual Social

and Economic Supplement. These changes in population controls had relatively little impact on derived measures such as means, medians, and percent distribution, but did have a significant impact on levels.

American Community Survey (ACS)—This is a nationwide survey to obtain data about demographic, social, economic, and housing information of people, households, and housing units. The survey collects the same type of information that has been collected every 10 years from the long-form questionnaire of the census, which the American Community Survey will replace. Beginning 2006, the estimates include the household population and the population living in institutions, college dormitories, and other group quarters.

Population estimates and projections—Estimates of the United States population are derived by updating the resident population enumerated in Census 2000 with information on the components of population change: births, deaths, and net international migration. The April 1, 2000, population used in these estimates reflects modifications to the Census 2000 population as documented in the Count Question Resolution program.

Registered births and deaths are estimated from data supplied by the National Center for Health Statistics. The net international migration component consists of four parts: (1) the net international migration of the foreign born, (2) the net migration of natives to and from the United States, (3) the net migration between the United States and Puerto Rico, and (4) the net overseas movement of the Armed Forces population. Data from the ACS are used to estimate the annual net migration of the foreign-born population. Estimates of the net migration of natives and net migration between Puerto Rico and the United States are derived from the Demographic Analysis and Population Estimates (DAPE) project (see Population Division Working Paper Series, No. 63 and No. 64). Estimates of the net overseas movement of the Armed Forces are derived from data collected by the Defense Manpower Data Center.

Estimates for state and county areas are based on the same components of change data and sources as the national estimates with the addition of net internal migration. Estimates of net internal migration are derived from federal income tax returns from the Internal Revenue Service, group quarters data from the Federal-State Cooperative Program, and Medicare data from the Centers for Medicare and Medicaid Services.

The population by age for April 1, 1990, reflects modifications to the 1990 census data counts. The review of detailed 1990 information indicated that respondents tended to report age as of the date of completion of the questionnaire, not as of April 1, 1990. In addition, there may have been a tendency for respondents to round up their age if they were close to having a birthday. A detailed explanation of the age modification procedure appears in 1990 Census of Population and Housing, Data Paper Listing CPH-L74.

Population estimates and projections are available on the Census Bureau Internet site <<http://www.census.gov>>. These estimates and projections are consistent with official decennial census figures with no adjustment for estimated net census coverage. However, the categories for these estimates and projections by race have been modified and are not comparable to the census race categories (see section below under "Race"). For details on methodology, see the sources cited below the individual tables.

Immigration—Immigration (migration to a country) is one component of international migration; the other component is emigration (migration *from* a country). In its simplest form, international migration is defined as any movement across a national border. In the United States, federal statistics on international migration are produced primarily by the U.S. Census Bureau and the Office of Immigration Statistics of the U.S. Department of Homeland Security (DHS).

The Census Bureau collects data used to estimate international migration through its decennial censuses and numerous surveys of the U.S. population.

The Office of Immigration Statistics publishes immigration data in annual flow reports and the *Yearbook of Immigration*

Statistics. Data for these publications are collected from several administrative data sources including the DS-230 Application for Immigrant Visa and Alien Registration (U.S. Department of State) for new arrivals, and the I-485 Application to Register Permanent Residence or Adjust Status (U.S. Citizenship and Immigration Services—USCIS) for persons adjusting immigrant status.

An immigrant, or legal permanent resident, is a foreign national who has been granted lawful permanent residence in the United States. New arrivals are foreign nationals living abroad who apply for an immigrant visa at a consular office of the Department of State, while individuals adjusting status are already living in the United States and file an application for adjustment of status to lawful permanent residence with USCIS. Individuals adjusting status include refugees, asylees, and various classes of nonimmigrants. A refugee is an alien outside the United States who is unable or unwilling to return to his or her country of origin because of persecution or a well-founded fear of persecution. Asylees must meet the same criteria as refugees, but are located in the United States or at a port of entry. After 1 year of residence, refugees and asylees are eligible to adjust to legal permanent resident status. Nonimmigrants are foreign nationals granted temporary entry into the United States. The major activities for which nonimmigrant admission is authorized include temporary visits for business or pleasure, academic or vocational study, temporary employment, and to act as a representative of a foreign government or international organization. DHS collects information on the characteristics of a proportion of nonimmigrant admissions, those recorded on the I-94 Arrival/Departure Record.

U.S. immigration law gives preferential immigration status to persons with a close family relationship with a U.S. citizen or legal permanent resident, persons with needed job skills, persons who qualify as refugees or asylees, and persons who are from countries with relatively low levels of immigration to the United States. Immigration to the United States can be divided into two general

categories: (1) classes of admission subject to the annual worldwide limitation and (2) classes of admission exempt from worldwide limitations. Numerical limits are imposed on visas issued and not on admissions. In 2007, the annual limit for preference visas subject to limitation was 373,148, which included a family-sponsored preference limit of 226,000 and an employment-based preference limit of 147,148. Classes of admission exempt from the worldwide limitation include immediate relatives of U.S. citizens, refugees and asylees adjusting to permanent residence, and other various classes of special immigrants (see Table 47).

Metropolitan and micropolitan areas—The U.S. Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas according to published standards that are applied to Census Bureau data. The general concept of a metropolitan or micropolitan statistical area is that of a core area containing a substantial population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined metropolitan and micropolitan statistical areas are based on application of 2000 standards to 2000 decennial census data as updated by application of those standards to more recent Census Bureau population estimates. The term “metropolitan area” (MA) was adopted in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs). The term “core-based statistical area” (CBSA) became effective in 2003 and refers collectively to metropolitan and micropolitan statistical areas. For descriptive details and a list of titles and components of metropolitan and micropolitan statistical areas, see Appendix II.

Urban and rural—For Census 2000, the Census Bureau classified as urban all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs). A UA consists of densely settled territory that contains 50,000 or more people, while a UC consists of densely settled territory with at least 2,500 people but fewer than 50,000

people. From the 1950 census through the 1990 census, the urban population consisted of all people living in UAs and most places outside of UAs with a census population of 2,500 or more.

UAs and UCs encompass territory that generally consists of:

- A cluster of one or more block groups or census blocks each of which has a population density of at least 1,000 people per square mile at the time.
- Surrounding block groups and census blocks each of which has a population density of at least 500 people per square mile at the time.
- Less densely settled blocks that form enclaves or indentations, or are used to connect discontinuous areas with qualifying densities.

They also may include an airport located adjacent to qualifying densely settled area if it has an annual enplanement (aircraft boarding) of at least 10,000 people.

"Rural" for Census 2000 consists of all territory, population, and housing units located outside of UAs and UCs. Prior to Census 2000, rural consisted of all territory, population, and housing outside of UAs and outside of other places designated as "urban." For Census 2000, many more geographic entities, including metropolitan areas, counties, and places, contain both urban and rural territory, population, and housing units.

Residence—In determining residence, the Census Bureau counts each person as an inhabitant of a usual place of residence (i.e., the place where one lives and sleeps most of the time). While this place is not necessarily a person's legal residence or voting residence, the use of these different bases of classification would produce the same results in the vast majority of cases.

Race—For the 1990 census, the Census Bureau collected and published racial statistics as outlined in Statistical Policy Directive No. 15 issued by the OMB. This directive provided standards on ethnic and racial categories for statistical reporting to be used by all federal agencies. According to the directive, the basic racial categories were American Indian or Alaska Native, Asian or Pacific Islander, Black, and White. (The directive identified

Hispanic origin as an ethnicity.) The question on race for Census 2000 was different from the one for the 1990 census in several ways. Most significantly, respondents were given the option of selecting one or more race categories to indicate their racial identities. Because of these changes, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses. Caution must be used when interpreting changes in the racial composition of the United States population over time. Census 2000 adheres to the federal standards for collecting and presenting data on race and ethnicity as established by the OMB in October 1997. Starting with Census 2000, the OMB requires federal agencies to use a minimum of five race categories: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. Additionally, to collect data on individuals of mixed race parentage, respondents were allowed to select one or more races. For respondents unable to identify with any of these five race categories, the OMB approved and included a sixth category—"Some other race" on the Census 2000 questionnaire. The Census 2000 question on race included 15 separate response categories and three areas where respondents could write in a more specific race group. The response categories and write-in answers can be combined to create the five minimum OMB race categories plus "Some other race." People who responded to the question on race by indicating only one race are referred to as the *race alone* population, or the group that reported only one race category. Six categories make up this population: White alone, Black or African American alone, American Indian and Alaska Native alone, Asian alone, Native Hawaiian and Other Pacific Islander alone, and Some other race alone. Individuals who chose more than one of the six race categories are referred to as the *Two or More Races* population, or as the group that reported more than one race. Additionally, respondents who reported one race together with those who reported the same race plus one or more other races are combined to create the *race alone or in combination* categories. For example, the *White alone or in combination group* consists of those respondents who reported

only White or who reported White combined with one or more other race groups, such as "White and Black or African American," or "White and Asian and American Indian and Alaska Native." Another way to think of the group who reported White alone or in combination is as the total number of people who identified entirely or partially as White. This group is also described as people who reported White, whether or not they reported any other race.

The *alone or in combination* categories are tallies of *responses* rather than *respondents*. That is, the alone or in combination categories are not mutually exclusive. Individuals who reported two races were counted in two separate and distinct alone or in combination race categories, while those who reported three races were counted in three categories, and so on. Consequently, the sum of all alone or in combination categories equals the number of races reported, which exceeds the total population.

The concept of race, as used by the Census Bureau, reflects self-identification by people according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups. Additionally, data are available for the American Indian and Alaska Native tribes. A detailed explanation of race can be found at <http://www.census.gov/prod/cen2000/doc/sf1.pdf>.

Data for the population by race for April 1, 2000, (shown in Tables 6, 8, and 9) are modified counts and are not comparable to Census 2000 race categories. These numbers were computed using Census 2000 data by race that had been modified to be consistent with the 1997 OMB's "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," (Federal Register Notice, Vol. 62, No 210, October 1997). A detailed explanation of the race modification procedure appears on the Census Web page <http://www.census.gov/popest/archives/files/MRSF-01-US1.html>.

In the CPS and other household sample surveys in which data are obtained through personal interview, respondents

are asked to classify their race as: (1) White; (2) Black, African American, or Negro; (3) American Indian or Alaska Native; (4) Asian; (5) Native Hawaiian or Other Pacific Islander. Beginning January 2003, respondents were allowed to report more than one race to indicate their mixed racial heritage.

Hispanic population—The Census Bureau collected data on the Hispanic-origin population in the 2000 census by using a self-identification question. Persons of Spanish/Hispanic/Latino origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire—Mexican, Puerto Rican, Cuban, as well as those who indicated that they were of Other Spanish/Hispanic/Latino origin. Persons of Other Spanish/Hispanic/Latino origin are those whose origins are from Spain, the Spanish-speaking countries of Central or South America, or the Dominican Republic.

In the CPS, information on Hispanic persons is gathered by using a self-identification question. The respondents are first asked whether or not they are of Hispanic, Spanish, or Latino origin and based on their response are further classified into the following categories: Mexican or Mexican American or Chicano; Puerto Rican; Cuban; Central or South American; or Other Hispanic, Spanish, or Latino origin group.

Traditional and current data collection and classification treat race and Hispanic origin as two separate and distinct concepts in accordance with guidelines from the OMB. Race and Hispanic origin are two separate concepts in the federal statistical system. People who are Hispanic may be any race and people in each race group may be either Hispanic or Not Hispanic. Also, each person has two attributes, their race (or races) and whether or not they are Hispanic. The overlap of race and Hispanic origin is the main comparability issue. For example, Black Hispanics (Hispanic Blacks) are included in both the number of Blacks and in the number of Hispanics. For further information, see Census Web page <http://www.census.gov/population/www/socdemo/compraceho.html>.

Foreign-born and native populations—The Census Bureau separates the

U.S. resident population into two groups based on whether or not a person was a U.S. citizen or U.S. national at the time of birth. Anyone born in the United States, Puerto Rico, or a U.S. Island Area (such as Guam) or born abroad to a U.S. citizen parent is a U.S. citizen at the time of birth and consequently included in the *native population*. The term *foreign-born population* refers to anyone who is not a U.S. citizen or U.S. national at birth. This includes naturalized U.S. citizens, legal permanent resident aliens (immigrants), temporary migrants (such as foreign students), humanitarian migrants (such as refugees), and people illegally present in the United States. The Census Bureau provides a variety of demographic, social, economic, geographic, and housing information on the foreign-born population in the United States at <http://www.census.gov/population/www/socdemo/foreign/>.

Mobility status—The U.S. population is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the survey or census and the place of residence at a specified earlier date. Nonmovers are all persons who were living in the same house or apartment at the end of the period as at the beginning of the period. Movers are all persons who were living in a different house or apartment at the end of the period than at the beginning of the period. Movers are further classified as to whether they were living in the same or different county, state, region, or were movers from abroad. Movers from abroad include all persons whose place of residence was outside the United States (including Puerto Rico, other U.S. Island Area, or a foreign country) at the beginning of the period.

Living arrangements—Living arrangements refer to residency in households or in group quarters. A “household” comprises all persons who occupy a “housing unit,” that is, a house, an apartment or other group of rooms, or a single room that constitutes “separate living quarters.” A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, or employees who share the housing unit. A

person living alone or a group of unrelated persons sharing the same housing unit is also counted as a household. See text, Section 20, Construction and Housing, for definition of housing unit.

All persons not living in housing units are classified as living in group quarters. These individuals may be institutionalized, e.g., under care or custody in juvenile facilities, jails, correctional centers, hospitals, or nursing homes; or they may be residents in noninstitutional group quarters such as college dormitories, group homes, or military barracks.

Householder—The householder is the person in whose name the home is owned or rented. If a home is owned or rented jointly by a married couple, either the husband or the wife may be listed first.

Family—The term family refers to a group of two or more persons related by birth, marriage, or adoption and residing together in a household. A family includes among its members the householder.

Subfamily—A subfamily consists of a married couple and their children, if any, or one parent with one or more never-married children under 18 years old living in a household. Subfamilies are divided into “related” and “unrelated” subfamilies. A related subfamily is related to, but does not include, the householder or the spouse of the householder. Members of a related subfamily are also members of the family with whom they live. The number of related subfamilies, therefore, is not included in the count of families. An unrelated subfamily may include persons such as guests, lodgers, or resident employees and their spouses and/or children; none of whom is related to the householder.

Married couple—A married couple is defined as a husband and wife living together in the same household, with or without children and other relatives.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Table 1. Population and Area: 1790 to 2000

[Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Area data include Alaska beginning in 1870 and Hawaii beginning in 1900. Total area figures for 1790 to 1970 have been recalculated on the basis of the remeasurement of states and counties for the 1980 census, but not on the basis of the 1990 census. The land and water area figures for past censuses have not been adjusted and are not strictly comparable with the total area data for comparable dates because the land areas were derived from different base data, and these values are known to have changed with the construction of reservoirs, draining of lakes, etc. Density figures are based on land area measurements as reported in earlier censuses]

| Census date | Resident population | | | | Area (square miles) | | |
|----------------|--------------------------|------------------------------|--------------------------------|---------|------------------------|-----------|----------------------|
| | Number | Per square mile of land area | Increase over preceding census | | Total | Land | Water ¹ |

X Not applicable. ¹ Data for 1790 to 1980 cover inland water only. Data for 1990 comprise Great Lakes, inland, and coastal water. Data for 2000 comprise Great Lakes, inland, territorial, and coastal water. ² Revised to include adjustments for underenumeration in southern states; unrevised number is 38,558,371 (10.9 per square mile). ³ Total population count has been revised since the 1980 census publications. Numbers by age, race, Hispanic origin, and sex have not been corrected. ⁴ The April 1, 1990, census count includes count question resolution corrections processed through December 1997, and does not include adjustments for census coverage errors. ⁵ Data reflect corrections made after publication of the results. ⁶ Reflects modifications to the Census 2000 population as documented in the Count Question Resolution program.

Table 4. Components of Population Change: 2000 to 2007

[In thousands (281,425 represents 281,425,000), except as indicated. Resident population]

| Period | Population as of beginning of period | Net increase | | Births | Deaths | Net international migration ² | Population as of end of period |
|--|--------------------------------------|--------------|----------------------|--------|--------|--|--------------------------------|
| | | Total | Percent ¹ | | | | |
| April 1, 2000 to July 1, 2000 ³ | 281,425 | 770 | 0.3 | 989 | 561 | 342 | 282,194 |
| July 1, 2000 to July 1, 2001 | 282,194 | 2,918 | 1.0 | 4,047 | 2,419 | 1,290 | 285,112 |
| July 1, 2001 to July 1, 2002 | 285,112 | 2,776 | 1.0 | 4,007 | 2,430 | 1,199 | 287,888 |
| July 1, 2002 to July 1, 2003 | 287,888 | 2,560 | 0.9 | 4,053 | 2,423 | 930 | 290,448 |
| July 1, 2003 to July 1, 2004 | 290,448 | 2,744 | 0.9 | 4,113 | 2,450 | 1,081 | 293,192 |
| July 1, 2004 to July 1, 2005 | 293,192 | 2,704 | 0.9 | 4,121 | 2,433 | 1,017 | 295,896 |
| July 1, 2005 to July 1, 2006 | 295,896 | 2,859 | 1.0 | 4,201 | 2,431 | 1,090 | 298,755 |
| July 1, 2006 to July 1, 2007 | 298,755 | 2,866 | 1.0 | 4,279 | 2,450 | 1,038 | 301,621 |

¹ Percent of population at beginning of period. ² Includes (a) the net international migration of the foreign born, (b) the net migration between the United States and Puerto Rico, (c) the net migration of natives to and from the United States, and (d) the net overseas movement of the Armed Forces population. ³ The April 1, 2000, Population Estimates base reflects changes to the Census 2000 population from the Count Question Resolution program.

Source: U.S. Census Bureau, "Population, Population change and estimated components of population change: April 1, 2000, to July 1, 2007"; release date: December 27, 2007; <<http://www.census.gov/popest/national/files/NST-EST2007-alldata.csv>>.

Table 5. Components of Population Change by Race and Hispanic Origin: 2000 to 2007

[In thousands (20,197 represents 20,197,000,000). Resident population. Covers period April 1, 2000, to July 1, 2007. The April 1, 2000, Population Estimates base reflects changes to the Census 2000 population from the Count Question Resolution program]

| Race and Hispanic origin | Net increase | Natural increase | | | Net international migration ¹ |
|--|---------------|------------------|---------------|---------------|--|
| | | Total | Births | Deaths | |
| Total | 20,197 | 12,212 | 29,809 | 17,597 | 7,984 |
| One race | 19,238 | 11,348 | 23,835 | 17,487 | 7,890 |
| White | 13,060 | 7,662 | 22,647 | 14,985 | 5,398 |
| Black or African American | 3,051 | 2,460 | 4,583 | 2,123 | 592 |
| American Indian and Alaska Native | 275 | 213 | 298 | 84 | 61 |
| Asian | 2,777 | 968 | 1,253 | 286 | 1,809 |
| Native Hawaiian and Other Pacific Islander | 75 | 45 | 54 | 9 | 29 |
| Two or more races | 959 | 864 | 974 | 110 | 94 |
| Race alone or in combination:² | | | | | |
| White | 13,938 | 8,469 | 23,547 | 15,077 | 5,468 |
| Black or African American | 3,639 | 3,015 | 5,169 | 2,153 | 623 |
| American Indian and Alaska Native | 312 | 233 | 379 | 146 | 79 |
| Asian | 3,158 | 1,290 | 1,609 | 319 | 1,869 |
| Native Hawaiian and Other Pacific Islander | 113 | 69 | 91 | 22 | 44 |
| Hispanic ³ | 10,198 | 5,981 | 6,793 | 812 | 4,217 |
| White alone, not Hispanic | 3,515 | 2,113 | 16,337 | 14,224 | 1,401 |

¹ See footnote 2, Table 4. ² In combination with one or more other races. The sum of the five race groups adds to more than the total population because individuals may report more than one race. ³ Persons of Hispanic origin may be any race.

Source: U.S. Census Bureau, "Cumulative Estimates of the Components of Population Change by Race and Hispanic Origin for the United States: April 1, 2000, to July 1, 2007 (NC-EST2007-05)"; release date: May 1, 2008; <<http://www.census.gov/popest/national/asrh/NC-EST2007/NC-EST2007-05.xls>>.

Table 6. Resident Population by Sex, Race, and Hispanic-Origin Status: 2000 to 2007

[261,425 represents 281,425,000. As of July, except as noted. Data shown are modified race counts; see text, this section]

¹ Total population count has been revised since this 1980 census publications. Numbers by age and sex have not been corrected. ² The data shown have been modified from the official 1990 census counts. See text of this section for explanation. The April 1, 1990, estimates base (248,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana, and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons. ³ The April 1, 2000, population estimates base reflects changes to the Census 2000 population from the Count Question Resolution program.

Figure 1.1
Center of Population: 1790 to 2000

[Prior to 1960, excludes Alaska and Hawaii. The median center is located at the intersection of two median lines, a north-south line constructed so that half of the nation's population lives east and half lives west of it, and an east-west line selected so that half of the nation's population lives north and half lives south of it. The mean center of population is that point at which an imaginary, flat, weightless, and rigid map of the United States would balance if weights of identical value were placed on it so that each weight represented the location of one person on the date of the census]

| Year | Median center | | Mean center | | |

Table 14. State Resident Population—Projections: 2010 to 2030

[As of July 1, 4,596 represents 4,596,000. These state projections were produced in correspondence with the U.S. interim projections released in March 2004. Projections in this table were developed for each of the 50 states and the District of Columbia by age and sex for the years 2000 to 2030, based on Census 2000 results. These projections differ from forecasts in that they represent the results of the mathematical projection model given that current state-specific trends in fertility, mortality, domestic migration, and net international migration continue. The projections to 2007 have been superseded by population estimates which are shown in Table 12. Minus sign (–) indicates decrease]

| State | Number (1,000) | | | | | Change, 2000–2030 | | Rank | |
|----------------------|----------------|--------|--------|--------|--------|-------------------|---------|------------------------|---------------------------|
| | 2010 | 2015 | 2020 | 2025 | 2030 | Number (1,000) | Percent | Total population, 2030 | Percent change, 2000–2030 |

X Not applicable. ¹ The estimated components of population change will not sum to the numerical population change due to the process of controlling to national totals. ² Net international migration includes the international migration of both native and foreign-born populations. Specifically, it includes: (a) the net international migration of the foreign born, (b) the net migration between the United States and Puerto Rico, (c) the emigration of natives from the United States, and (d) the net overseas movement of the Armed Forces population.

Source: U.S. Census Bureau, "Annual Estimates of the Population by Sex and Age for States and for Puerto Rico: April 1, 2000 to July 1, 2007"; release date: May 1, 2008; <<http://www.census.gov/popest/states/asrh/SC-EST2007-02.html>>.

Table 17. Resident Population by Age and State—Projections: 2010 and 2015

[As of July 1, 1,092 represents 1,092,000. These projections were produced in correspondence with the U.S. interim projections released in March 2004. Projections in this table were developed for each of the 50 states and the District of Columbia by age and sex for the years 2000 to 2030, based on Census 2000 results. These projections differ from forecasts in that they represent the results of the mathematical projection model given that current state-specific trends in fertility, mortality, domestic migration and net international migration continue. The projections to 2007 have been superseded by population estimates which are shown in Table 16]

| State | Population (1,000) | | | | | | | | | | Percent of population, 2015 | |
|-------|--------------------|-------|--------------------|--------|--------------------|-------|--------------------|-------|-----------------------|-------|-----------------------------|-----------------------|

Table 19. Large Metropolitan Statistical Areas—Population: 1990 to 2007

[1990 and 2000, as of April 1; beginning 2005 as of July 1 (658 represents 658,000). Covers metropolitan statistical areas with 250,000 and over population in 2007, as defined by the U.S. Office of Management and Budget as of December 2006. All geographic boundaries for 2000 to 2007 population estimates are defined as of January 1, 2007. For definitions and components of all metropolitan and micropolitan areas, see Appendix II. Minus sign (-) indicates decrease]

| Metropolitan statistical area | Number (1,000) | | | | | Percent change | | Rank, 2007 |

Table 19. Large Metropolitan Statistical Areas—Population: 1990 to 2007—Con.

(1990 and 2000, as of April 1; beginning 2005 as of July 1 (658 represents 658,000). Covers metropolitan statistical areas with 250,000 and over population in 2007, as defined by the U.S. Office of Management and Budget as of December 2006. All geographic boundaries for 2000 to 2007 population estimates are defined as of January 1, 2007. For definitions and components of all metropolitan and micropolitan areas, see Appendix II. Minus sign (-) indicates decrease)

| Metropolitan statistical area | Number (1,000) | | | | | Percent change | | Rank, 2007 |

Z Less than 0.05 percent. ¹ The April 1, 2000, estimates base reflects changes to the Census 2000 population resulting from legal boundary updates as of January 1 of the estimates year, other geographic program changes, and Count Question Resolution actions. ² Broomfield County, CO, was formed from parts of Adams, Boulder, Jefferson, and Weld Counties, CO, on November 15, 2001, and is coextensive with Broomfield city. For purposes of defining and presenting data for metropolitan statistical areas, Broomfield city is treated as if it were a county at the time of the 1990 and 2000 censuses. ³ The portion of Sullivan city in Crawford County, Missouri, is legally part of the St. Louis, MO-IL MSA. Data shown here do not include this area.

**Table 20. 50 Largest Metropolitan Statistical Areas in 2007—
Components of Population Change: 2000 to 2007**

[Covers period April 1, 2000, to July 1, 2007, (1,031 represents 1,031,000). Covers metropolitan statistical areas as defined by the U.S. Office of Management and Budget as of December 2006. All geographic boundaries for 2000 to 2007 population estimates are defined as of January 1, 2007. For definitions and components of all metropolitan and micropolitan areas, see Appendix II. Minus sign (-) indicates decrease or outmigration]

| Metropolitan statistical area | Number (1,000) | | | | | | | Percent change |
|--|-------------------|------------------|--------|--------|---------------|--------------------|-----------------------|-------------------|
| | Total change | Natural increase | | | Net migration | | | |
| | | Total | Births | Deaths | Total | Inter- national | Internal migration | |
| Atlanta-Sandy Springs-Marietta, GA | 1,031 | 350 | 556 | 206 | 557 | 187 | 370 | 24.3 |
| Austin-Round Rock, TX | 348 | 119 | 169 | 50 | 234 | 61 | 173 | 27.9 |

¹ The estimated components of population change will not sum to the total population change due to the process of controlling to national totals. ² Broomfield County, CO, was formed from parts of Adams, Boulder, Jefferson, and Weld Counties, CO, on November 15, 2001, and is coextensive with Broomfield city. For purposes of defining and presenting data for metropolitan statistical areas, Broomfield city is treated as if it were a county at the time of the 2000 census. ³ The portion of Sullivan city in Crawford County, Missouri, is legally part of the St. Louis, MO-IL MSA. Data shown here do not include this area.

Table 23. Population by Core-Based Statistical Area Status and State: 2000 to 2007

[2000, as of April 1; beginning 2005 as of July 1 (262,135 represents 262,135,000). Covers core-based statistical areas (metropolitan and micropolitan statistical areas) as defined by the U.S. Office of Management and Budget as of December 2006. All geographic boundaries for 2000 to 2007 population estimates are defined as of January 1, 2007. For definitions and components of all metropolitan and micropolitan areas, see Appendix II. Minus sign (-) indicates decrease]

Table 35. Selected Characteristics of Racial Groups and Hispanic/Latino Population: 2006—Con.

[See headnote, page 38]

| Characteristic | Native Hawaiian and Other Pacific Islander alone | Some other race alone | Two or more races | Hispanic/Latino | White alone, not Hispanic or Latino |
|---|--|-----------------------|-------------------|-----------------|-------------------------------------|
| EDUCATIONAL ATTAINMENT | | | | | |
| Persons 25 years old and over, total | 252 | 10,435 | 2,458 | 24,066 | 137,803 |
| Less than 9th grade | 17 | 2,612 | 151 | 5,756 | 4,773 |
| 9th to 12th grade, no diploma | 23 | 1,756 | 260 | 3,824 | 10,590 |
| High school graduate (includes equivalency) | 102 | 3,082 | 671 | 6,767 | 42,307 |
| Some college, no degree | 53 | 1,451 | 601 | 3,510 | 28,195 |
| Associate's degree | 21 | 505 | 201 | 1,257 | 10,754 |
| Bachelor's degree | 26 | 731 | 375 | 2,020 | 25,957 |
| Graduate degree | 9 | 298 | 199 | 932 | 15,227 |
| Percent high school graduate or higher | 84.1 | 58.1 | 83.3 | 60.2 | 88.9 |
| Percent bachelor's degree or higher | 13.9 | 9.9 | 23.3 | 12.3 | 29.9 |
| OCCUPATION | | | | | |
| Employed civilian population, 16 years old and over, total | 201 | 8,519 | 1,994 | 19,270 | 98,266 |
| Management, professional, and related occupations | 41 | 1,276 | 607 | 3,316 | 36,989 |
| Management, business and financial operations occupations | 16 | 530 | 224 | 1,400 | 15,297 |
| Professional and related occupations | 24 | 745 | 383 | 1,915 | 21,692 |
| Service occupations | 47 | 2,107 | 405 | 4,544 | 13,718 |
| Sales and office occupations | 56 | 1,806 | 553 | 4,226 | 26,233 |
| Farming, fishing, and forestry occupations | 1 | 167 | 13 | 447 | 485 |
| Construction, extraction, and maintenance occupations | 25 | 1,450 | 182 | 3,180 | 9,480 |
| Construction and extraction occupations | 18 | 1,139 | 116 | 2,496 | 5,811 |
| Installation, maintenance, and repair occupations | 7 | 310 | 65 | 684 | 3,669 |
| Production, transportation, and material moving occupations | 31 | 1,713 | 234 | 3,556 | 11,361 |
| Production occupations | 14 | 956 | 110 | 1,939 | 5,964 |
| Transportation and material moving occupations | 17 | 757 | 125 | 1,618 | 5,397 |
| FAMILY INCOME IN THE PAST 12 MONTHS | | | | | |
| Total families | 93 | 4,080 | 923 | 9,372 | 52,453 |
| Less than \$10,000 | 6 | 320 | 67 | 714 | 1,645 |
| \$10,000 to \$19,999 | 8 | 573 | 92 | 1,282 | 3,074 |
| \$20,000 to \$29,999 | 11 | 626 | 103 | 1,410 | 4,306 |
| \$30,000 to \$39,999 | 12 | 560 | 103 | 1,270 | 4,884 |
| \$40,000 to \$49,999 | 8 | 465 | 95 | 1,030 | 4,980 |
| \$50,000 to \$59,999 | 7 | 364 | 84 | 823 | 4,870 |
| \$60,000 to \$74,999 | 12 | 410 | 100 | 920 | 6,673 |
| \$75,000 to \$99,999 | 11 | 390 | 121 | 918 | 8,260 |
| \$100,000 to \$124,999 | 7 | 189 | 69 | 475 | 5,243 |
| \$125,000 to \$149,999 | 5 | 85 | 34 | 223 | 2,913 |
| \$150,000 to \$199,999 | 4 | 64 | 28 | 181 | 2,778 |
| \$200,000 or more | 2 | 34 | 26 | 124 | 2,829 |
| Median family income in the past 12 months (dol.) | 52,104 | 39,156 | 50,089 | 40,074 | 65,180 |
| POVERTY STATUS IN THE PAST 12 MONTHS ² | | | | | |
| Persons below poverty level | 67 | 4,084 | 992 | 9,293 | 17,890 |
| Percent below poverty level | 16.1 | 22.0 | 16.8 | 21.5 | 9.3 |
| Families below poverty level | 13 | 818 | 127 | 1,806 | 3,216 |
| Percent below poverty level | 14.3 | 20.1 | 13.8 | 19.3 | 6.1 |
| HOUSING TENURE | | | | | |
| Total householders | 120 | 5,106 | 1,433 | 12,025 | 80,493 |
| Owner-occupied | 55 | 2,339 | 787 | 5,933 | 59,526 |
| Renter-occupied | 65 | 2,766 | 646 | 6,092 | 20,967 |

¹ Persons of Hispanic/Latino origin may be of any race. ² For explanation of poverty level, see text, Section 13.

Table 36. American Indian and Alaska Native Population by Tribe: 2000

[As of April. This table shows data for American Indian and Alaska Native tribes alone or in combination of tribes or races. Respondents who identified themselves as American Indian or Alaska Native were asked to report their enrolled or principal tribe. Therefore, data shown here reflect the written tribal entries reported on the questionnaire. Some of the entries (for example, Iroquois, Sioux, Colorado River, and Flathead) represent nations or reservations. The information on tribe is based on self-identification and includes federally or state-recognized tribes, as well as bands and clans]

| American Indian and Alaska Native tribe | Number | American Indian and Alaska Native tribe | Number |
|---|------------------|---|---------|
| Total persons ¹ | 4,119,301 | Osage | 15,897 |
| Apache | 96,833 | Ottawa | 10,677 |
| Blackfeet | 85,750 | Paiute | 13,532 |
| Cherokee | 729,533 | Pima | 11,493 |
| Cheyenne | 18,204 | Potawatomi | 25,595 |
| Chickasaw | 38,351 | Pueblo | 74,085 |
| Chippewa | 149,669 | Puget Sound Saish | 14,631 |
| Choctaw | 158,774 | Seminole | 27,431 |
| Colville | 9,393 | Shoshone | 12,026 |
| Comanche | 19,376 | Sioux | 153,360 |
| Cree | 7,734 | Tohono O'odham | 20,087 |
| Creek | 71,310 | United Houma Nation | 8,713 |
| Crow | 13,394 | Ute | 10,385 |
| Delaware | 16,341 | Yakama | 10,851 |
| Iroquois | 80,822 | Yaqui | 22,412 |
| Kiowa | 12,242 | Yuman | 8,976 |
| Latin American Indian | 180,940 | Alaskan Athabaskan | 18,838 |
| Lumbee | 57,868 | Aleut | 10,548 |
| Menominee | 9,840 | Eskimo | 54,761 |
| Navajo | 298,197 | Tlingit-Haida | 22,365 |

¹ Includes other tribes not shown separately.

Table 41. Native and Foreign-Born Populations by Selected Characteristics: 2007

[In thousands (296,824 represents 296,824,000). As of March. The foreign-born population includes anyone who is not a U.S. citizen at birth. This includes legal permanent residents (immigrants), temporary migrants (such as students), humanitarian migrants (such as refugees), and persons illegally present in the United States. Based on Current Population Survey, Annual Social and Economic Supplement which includes the civilian noninstitutional population plus Armed Forces living off post or with their families on post; see text, this section, and Appendix III]

| Characteristic | Total population | Native population | Foreign-born population | | | Year of entry: 2000 to March 2007 |
|--|------------------|-------------------|-------------------------|---------------------|------------------|-----------------------------------|
| | | | Total | Naturalized citizen | Not U.S. citizen | |
| Total | 296,824 | 259,545 | 37,279 | 14,538 | 22,741 | 10,268 |
| Under 5 years old | 20,530 | 20,171 | 359 | 97 | 262 | 359 |
| 5 to 14 years old | 40,274 | 38,417 | 1,857 | 254 | 1,603 | 1,296 |
| 15 to 24 years old | 41,702 | 37,243 | 4,459 | 922 | 3,537 | 2,127 |
| 25 to 34 years old | 39,868 | 31,691 | 8,176 | 1,852 | 6,325 | 3,277 |
| 35 to 44 years old | 42,762 | 34,382 | 8,380 | 3,097 | 5,283 | 1,776 |

Table 43. Foreign-Born Population by Place of Birth and Citizenship Status: 2006

[In thousands, except percent (37,548 represents 37,548,000). The term foreign-born refers to anyone who is not a U.S. citizen at birth. This includes naturalized U.S. citizens, legal permanent residents (immigrants), temporary migrants (such as foreign students), humanitarian migrants (such as refugees), and persons illegally present in the United States. The American Community Survey universe includes the household population and the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see text, this section and Appendix III]

| Region | Foreign-born population, total | Naturalized citizen | Not U.S. citizen | |
|---------------------------|--------------------------------|---------------------|------------------|-------------------------|
| | | | Number | Percent of foreign-born |
| Total ¹ | 37,548 | 15,768 | 21,780 | 58 |
| Latin America | 20,088 | 6,073 | 14,016 | 70 |
| Caribbean | 3,356 | 1,788 | 1,568 | 47 |

Table 46. Estimated Unauthorized Immigrants by Selected States and Countries of Origin: 2000 and 2006

[In thousands (8,460 represents 8,460,000). As of January. Unauthorized immigrants refers to foreign-born persons who entered the United States without inspection or who were admitted temporarily and stayed past the date they were required to leave. Unauthorized aliens who have applied for but have not yet received approval to lawfully remain in the United States are considered to be unauthorized. These estimates were calculated using a "residual method," whereby estimates of the legally resident foreign-born population were subtracted from the total foreign-born population in order to derive the unauthorized immigrant population. All of these component populations were resident in the United States on January 1, 2006, and entered during the 1980–2005 period. Persons who entered the United States prior to 1980 were assumed to be legally resident. Estimates of the legally resident foreign-born were based primarily on administrative data of the Department of Homeland Security, while estimates of the total foreign-born population were obtained from the American Community Survey of the U.S. Census Bureau. Estimates for 2000 are based on the same methodology, assumptions, and definitions with the exception that data from Census 2000 were used to estimate the foreign-born population in 2000 that entered the United States from January 1, 1980, through December 31, 1999]

| State of residence | 2000 | 2006 | Country of birth | 2000 | 2006 |
|---------------------------------------|--------------|---------------|---------------------------|--------------|---------------|
| United States, total | 8,460 | 11,550 | Total | 8,460 | 11,550 |

Table 51. Population by Selected Ancestry Group and Region: 2006

[In thousands (299,398 represents 299,398,000). Covers single and multiple ancestries. Ancestry refers to a person's ethnic origin or descent, roots, or heritage, or the place of birth of the person, the person's parents, or ancestors before their arrival in the United States. The American Community Survey universe includes the household population and the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see text in this section and Appendix III. For composition of regions, see map, inside front cover.]

B Not shown; base less than 75,000. X Not applicable. ¹ Beginning with the 2003 Current Population Survey (CPS), respondents could choose more than one race. Beginning 2005, data shown represent persons who selected this race group only and exclude persons reporting more than one race. The CPS prior to 2003 only allowed respondents to report one race group. See also comments on race in the text for this section. ² Persons of Hispanic origin may be any race. ³ No spouse present. ⁴ Under 18 years old.

Table 67. Parents and Children in Stay-At-Home Parent Family Groups: 1995 to 2007

[In thousands (22,973 represents 22,973,000). Family groups with children include those families that maintain their own household (family households with own children); those that live in the home of a relative (related subfamilies); and those that live in the home of a nonrelative (unrelated subfamilies). Stay-at-home family groups are married-couple family groups with children under 15 where one parent is in the labor force all of the previous year and their spouse is out of the labor force for the entire year with the reason 'taking care of home and family.' Only married couples with children under 15 are included. Based on Current Population Survey; see Appendix III]

| Year | Married-couple family groups with children under 15 years old | | | Children under 15 years old in married-couple family groups | | |

Table 74. Religious Composition of U.S. Population: 2007

[In percent. Covers persons 18 years old and over. Based on the Religious Landscape Survey, a survey conducted in the summer of 2007 among a representative sample of 35,556 adults living in the continental United States. For details of survey methodology, see report cited below. Percents shown below represent respondents' answers to the question, "What is your present religion, if any?" and several follow-up questions]

| Religious denomination/belief | Percent of adult population |
|---|-----------------------------|
| Total ¹ | 100.0 |
| Protestant ¹ | 51.3 |
| Baptist ¹ | 17.2 |
| Southern Baptist Convention | 6.7 |
| National Baptist Convention | 1.8 |
| American Baptist Churches in the USA | 1.2 |
| Methodist | 6.2 |
| United Methodist Church | 5.1 |
| Lutheran | 4.6 |
| Evangelical Lutheran Church in America | 2.0 |
| Lutheran Church, Missouri Synod | 1.4 |
| Nondenominational | 4.5 |
| Pentecostal | 4.4 |
| Assemblies of God | 1.4 |
| Church of God in Christ | 0.6 |
| Presbyterian | 2.7 |
| Presbyterian Church USA | 1.1 |
| Restorationist | 2.1 |
| Church of Christ | 1.5 |
| Anglican/Episcopal ¹ | 1.5 |
| Episcopal Church in the USA | 1.0 |
| Congregationalist ¹ | 0.8 |
| United Church of Christ | 0.5 |
| Adventist | 0.5 |
| Catholic | 23.9 |
| Mormon ¹ | 1.7 |
| Church of Jesus Christ of Latter-Day Saints | 1.6 |
| Jehovah's Witness | 0.7 |
| Orthodox | 0.6 |
| Jewish | 1.7 |
| Buddhist | 0.7 |
| Muslim | 0.6 |
| Hindu | 0.4 |
| Unitarians and other liberal faiths | 0.7 |
| New Age ² | 0.4 |
| Unaffiliated ³ | 16.1 |
| Don't know | 0.8 |

¹ Includes other denominations/beliefs not shown separately. ² Includes Wica (Wiccan), pagan, and other New Age groups. ³ Atheist, agnostic, and nothing in particular.

Table 76. Christian Church Adherents, 2000, and Jewish Population, 2007—States

[133,377 represents 133,377,000. Christian church adherents were defined as "all members, including full members, their children and the estimated number of other regular participants who are not considered as communicant, confirmed, or full members." The Jewish population includes Jews who define themselves as Jewish by religion as well as those who define themselves as Jewish in cultural terms. Data on Jewish population are based primarily on a compilation of individual estimates made by local Jewish federations. Additionally, most large communities have completed Jewish demographic surveys from which the Jewish population can be determined]

Section 2

Births, Deaths, Marriages, and Divorces

This section presents vital statistics data on births, deaths, abortions, fetal deaths, fertility, life expectancy, marriages, and divorces. Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published in its annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *National Vital Statistics Reports*. Reports in this field are also issued by the various state bureaus of vital statistics. Data on fertility and selected characteristics of women who had a child in the last year, and on marital status and marital history are compiled by the U.S. Census Bureau from its Current Population Survey (CPS; see text, Section 1) and published in *Current Population Reports*, P20 Series. Data on abortions are published by the Alan Guttmacher Institute, New York, NY, in selected issues of *Perspectives on Sexual and Reproductive Health* online at <www.guttmacher.org/sections/abortion.php>.

Registration of vital events—The registration of births, deaths, fetal deaths, and other vital events in the United States is primarily a state and local function. There are 57 vital registration jurisdictions in the U.S.: the fifty states, five territories (Puerto Rico, etc.) District of Columbia, and New York City. Each of the 57 jurisdictions has a direct statistical reporting relationship with NCHS. Vital events occurring to U.S. residents outside the United States are not included in the data.

Births and deaths—The live-birth, death, and fetal-death statistics prepared by NCHS are based on vital records filed in the registration offices of all states, New York City, and the District of Columbia. The annual collection of death statistics on a national basis began in 1900 with a national death-registration area of ten states and the District of Columbia; a similar annual collection of birth statistics for a national birth-registration area began in 1915, also with ten reporting states and the District of Columbia. Since

1933, the birth- and death-registration areas have comprised the entire United States, including Alaska (beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were first compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning in 1972, they have been based on a complete count for states participating in the Vital Statistics Cooperative Program (VSCP) (for details, see the technical appendix in *Vital Statistics of the United States*) and on a 50-percent sample of all other areas. Beginning in 1986, all reporting areas participated in the VSCP. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning in 1970, births to and deaths of nonresident aliens of the United States and U.S. citizens outside the United States have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling error; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics by cause of death are compiled in accordance with World Health Organization regulations according to the *International Classification of Diseases* (ICD). The ICD is revised approximately every 10 years. The tenth revision of the ICD was employed beginning in 1999. Deaths for prior years were classified according to the revision of the ICD in use at the time. Each revision of the ICD introduces a number of discontinuities in mortality statistics; for a discussion of those between the ninth and tenth revisions of the ICD, see *National Vital Statistics*

Reports, Vol. 56, Nos. 2 and 10. Preliminary mortality data are based on a percentage of death records weighted up to the total number of deaths reported for the given year; for a discussion of preliminary data, see *National Vital Statistics Reports*, Vol. 56, No. 16. Information on tests of statistical significance, differences between death rates, and standard errors can also be found in the reports mentioned above.

Some of the tables present age-adjusted death rates in addition to crude death rates. Age-adjusted death rates shown in this section were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition.

Fertility and life expectancy—The total fertility rate, defined as the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year, is compiled and published by NCHS. Other data relating to social and medical factors that affect fertility rates, such as contraceptive use and birth expectations, are collected and made available by both NCHS and the Census Bureau. NCHS figures are based on information in birth and fetal death certificates and on the periodic National Surveys of Family Growth; Census Bureau data are based on decennial censuses and the CPS.

Data on life expectancy, the average remaining lifetime in years for persons who attain a given age, are computed and published by NCHS. For details, see *National Vital Statistics Reports*, Vol. 56, No. 9 and <<http://www.cdc.gov/nchs/fastats/lifeexpect.htm>>.

Marriage and divorce—In 1957 and 1958 respectively, the National Office of Vital Statistics established marriage- and divorce-registration areas. Beginning in 1957, the marriage-registration area comprised 30 states, plus Alaska, Hawaii, Puerto Rico, and the Virgin Islands; it currently includes 42 states and the District

of Columbia. The divorce-registration area, starting in 1958 with 14 states, Alaska, Hawaii, and the Virgin Islands, currently includes a total of 31 states and the Virgin Islands. Procedures for estimating the number of marriages and divorces in the registration states are discussed in *Vital Statistics of the United States*, Vol. III—Marriage and Divorce. Total counts of events for registration and nonregistration states are gathered by collecting already summarized data on marriages and divorces reported by state offices of vital statistics and by county offices of registration. The collection and publication of detailed marriage and divorce statistics was suspended beginning in January 1996. For additional information, contact the National Center for Health Statistics online at <<http://www.cdc.gov/nchs/datawh/datasite/frnotice.htm>>.

Vital statistics rates—Except as noted, vital statistics rates computed by NCHS are based on decennial census population figures as of April 1 for 1960, 1970, 1980, 1990, and 2000; and on midyear population figures for other years, as estimated by the Census Bureau (see text, Section 1).

Race—Data by race for births, deaths, marriages, and divorces from NCHS are based on information contained in the certificates of registration. The Census Bureau's Current Population Survey obtains information on race by asking respondents to classify their race as (1) White, (2) Black, (3) American Indian or Alaska Native, (4) Native Hawaiian or Other Pacific Islander, and (5) Asian.

Beginning with the 1989 data year, NCHS is tabulating its birth data primarily by race of the mother. In 1988 and prior years, births were tabulated by race of the child, which was determined from the race of the parents as entered on the birth certificate.

Trend data by race shown in this section are by race of mother beginning with the 1980 data. Hispanic origin of the mother is reported and tabulated independently of race. Thus, persons of Hispanic origin may be any race. In 1994, 91 percent of women of Hispanic origin were reported as White.

Statistical reliability—For a discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and the Census Bureau, see Appendix III.

Table 77. Live Births, Deaths, Marriages, and Divorces: 1960 to 2006

[4,258 represents 4,258,000. Beginning 1970, excludes births to and deaths of nonresidents of the United States. See Appendix III]

| Year | Number | | | | | Rate per 1,000 population | | | | |
|---------------------|-------------------|------------------|--------------------------------|-----------------------------------|----------------------------------|---------------------------|--------|---------------------|------------------------|-----------------------|

Table 82. Total Fertility Rate by Race and Hispanic Origin: 1980 to 2006

[Based on race of mother. Excludes births to nonresidents of United States. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions (assuming no net immigration). See Appendix III]

Table 90. Women Who Had a Child in the Last Year by Selected Characteristics: 1990 to 2006

[58,381 represents 58,381,000. As of June. Covers civilian noninstitutional population. Since the number of women who had a birth during the 12-month period was tabulated and not the actual numbers of births, some small underestimation of fertility for this period may exist due to the omission of: (1) Multiple births, (2) Two or more live births spaced within the 12-month period (the woman is counted only once), (3) Women who had births in the period and who did not survive to the survey date, (4) Women who were in institutions and therefore not in the survey universe. These losses may be somewhat offset by the inclusion in the CPS of births to immigrants who did not have their children born in the United States and births to nonresident women. These births would not have been recorded in the vital registration system. Based on Current Population Survey (CPS); see Appendix III]

| Characteristic | Total women (1,000) | Percent childless | Women who had a child in the last year | | | |
|--------------------------------------|---------------------|-------------------|--|-----------------|----------------|-----------------|
| | | | Total births | | First births | |

Table 96. Outcomes of Assisted Reproductive Technology (ART) Procedures: 2000 to 2005

[In 1996, Centers for Disease Control (CDC) initiated data collection regarding (ART) procedures performed in the United States, as mandated by the Fertility Clinic Success Rate and Certification Act. ARTs include those infertility treatments in which both eggs and sperm are handled in the laboratory for the purpose of establishing a pregnancy (i.e. in vitro fertilization and related procedures)]

| Year | Procedures started | Number of pregnancies | Live birth deliveries ¹ | Live born infants |
|------|--------------------|-----------------------|------------------------------------|-------------------|
| 2000 | 99,629 | 30,557 | 25,228 | 35,025 |
| 2001 | 107,587 | 35,726 | 29,344 | 40,687 |
| 2002 | 115,392 | 40,046 | 33,741 | 45,751 |
| 2003 | 122,872 | 43,503 | 35,785 | 48,756 |
| 2004 | 127,977 | 44,774 | 36,760 | 49,458 |
| 2005 | 134,260 | 47,651 | 38,910 | 52,041 |

¹ A live-birth delivery is defined as the delivery of one or more live-born infants.

¹ Includes other races not shown separately. ² Based on the proportion of the cohort who are alive at the beginning of the indicated age who will die before reaching the age shown plus 1. For example, out of every 1,000 people alive and exactly 50 years old at the beginning of the period, between 4 and 5 (4.46) will die before reaching their 51st birthdays.

Table 104. Deaths and Death Rates by Sex, Race, and Hispanic Origin: 1980 to 2005

[1,990 represents 1,990,000. Rates are per 1,000 population for specified groups. Excludes deaths of nonresidents of the United States and fetal deaths. For explanation of age adjustment, see text, this section. The standard population for age adjustment is the projected year 2000 population of the United States. See Appendix III. Data for Hispanic origin and specified races other than White and Black should be interpreted with caution because of inconsistencies between reporting Hispanic origin and race on death certificates and censuses and surveys]

NA Not available. ¹ Infant (under 1 year of age), neonatal (under 28 days), early neonatal (under 7 days), and postneonatal (28 days–11 months). ² Number of fetal deaths of 20 weeks or more gestation per 1,000 live births plus fetal deaths. ³ Number of fetal deaths of 28 weeks or more gestation (late fetal deaths) per 1,000 live births plus late fetal deaths. ⁴ Number of late fetal deaths plus infant deaths within 7 days of birth per 1,000 live births plus late fetal deaths. ⁵ Per 100,000 live births from deliveries and complications of pregnancy, childbirth, and the puerperium. Beginning 2000, deaths are classified according to the tenth revision of the *International Classification of Diseases*; earlier years classified according to the revision in use at the time; see text, this section. ⁶ Increase partially reflects the use of a separate item on the death certificate on pregnancy status by an increasing number of states.

Section 3

Health and Nutrition

This section presents statistics on health expenditures and insurance coverage, including Medicare and Medicaid, medical personnel, hospitals, nursing homes and other care facilities, injuries, diseases, disability status, nutritional intake of the population, and food consumption. Summary statistics showing recent trends on health care and discussions of selected health issues are published annually by the U.S. National Center for Health Statistics (NCHS) in *Health, United States*. Data on national health expenditures, medical costs, and insurance coverage are compiled by the U.S. Centers for Medicare & Medicaid Services (CMS) (formerly Health Care Financing Administration), and appear on the CMS Web site at <http://www.cms.hhs.gov/NationalHealthExpendData/> and in the annual *Medicare and Medicaid Statistical Supplement* to the *Health Care Financing Review*. Statistics on health insurance are also collected by NCHS and are published in Series 10 of *Vital and Health Statistics*. NCHS also conducts periodic surveys of nutrient levels in the population, including estimates of food and nutrient intake, overweight and obesity, hypercholesterolemia, hypertension, and clinical signs of malnutrition. Data are published in Series 10 and 11 of *Vital and Health Statistics*. Statistics on hospitals are published annually by the Health Forum, L.L.C.; an American Hospital Association (AHA) company, in AHA Hospital Statistics. The primary source for data on nutrition is *Diet Quality and Food Consumption*, issued by the U.S. Department of Agriculture.

National health expenditures—CMS compiles estimates of national health expenditures (NHE) to measure spending for health care in the United States. The NHE accounts are structured to show spending by type of expenditure (i.e., hospital care, physician and clinical care, dental care, and other professional care; home health care; retail sales of prescription drugs; other medical nondurables; vision products and other medical

durables; nursing home care and other personal health expenditures; plus other health expenditures such as public health activities, administration, and the net cost of private health insurance; plus medical sector investment, the sum of noncommercial medical research and capital formation in medical sector structures and equipment; and by source of funding (e.g., private health insurance, out-of-pocket payments, and a range of public programs including Medicare, Medicaid, and those operated by the U.S. Department of Veterans Affairs (VA)).

Data used to estimate health expenditures come from existing sources, which are tabulated for other purposes. The type of expenditure estimates rely upon statistics produced by such groups as the AHA, the Census Bureau, and the U.S. Department of Health and Human Services (HHS). Source of funding estimates are constructed using administrative and statistical records from the Medicare and Medicaid programs, the U.S. Department of Defense and VA medical programs, the Social Security Administration, Census Bureau's *Governmental Finances*, state and local governments, other HHS agencies, and other nongovernment sources.

Medicare, Medicaid, and SCHIP—Since July 1966, the federal Medicare program has provided two coordinated plans for nearly all people age 65 and over: (1) a hospital insurance plan, which covers hospital and related services and (2) a voluntary supplementary medical insurance plan, financed partially by monthly premiums paid by participants, which partly covers physicians' and related medical services. Such insurance also applies, since July 1973, to disabled beneficiaries of any age after 24 months of entitlement to cash benefits under the social security or railroad retirement programs and to persons with end stage renal disease. On January 1, 2006, Medicare began to provide coverage for prescription drugs as mandated by the Medicare Prescription

Drug, Improvement, and Modernization Act of 2003 (MMA). This benefit is available on a voluntary basis to everyone with Medicare, and beneficiaries pay a monthly premium to enroll in one of Medicare's prescription drug plans.

Medicaid is a health insurance program for certain low-income people. These include: certain low-income families with children; aged, blind, or disabled people on supplemental security income; certain low-income pregnant women and children; and people who have very high medical bills. Medicaid is funded and administered through a state/federal partnership. Although there are broad federal requirements for Medicaid, states have a wide degree of flexibility to design their program. Congress created the State Children's Health Insurance Program (SCHIP) to address the growing problem of children without health insurance. SCHIP was designed as a federal/state partnership, similar to Medicaid, with the goal of expanding health insurance to children whose families earn too much money to be eligible for Medicaid, but not enough money to purchase private insurance.

Health resources—Hospital statistics based on data from AHA's yearly survey are published annually in *AHA Hospital Statistics* and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical facilities, diagnostic and treatment facilities, laboratory services, etc. Data obtained from NCHS cover all U.S. hospitals that meet certain criteria for inclusion. The criteria are published in *Vital and Health Statistics* reports, Series 13.

Statistics on the demographic characteristics of persons employed in the health occupations are compiled by the U.S. Bureau of Labor Statistics and reported in *Employment and Earnings* (monthly) (see Table 596, Section 12, Labor Force, Employment, and Earnings). Data based on surveys of health personnel and utilization of health facilities providing long-term care, ambulatory care, emergency

room care, and hospital care are presented in NCHS Series 13, *Data on Health Resources Utilization* and "National Health Statistics Reports." Statistics on patient visits to health care providers, as reported in health interviews, appear in NCHS Series 10, *National Health Interview Survey Data*.

The CMS's *Health Care Financing Review* and its annual *Medicare and Medicaid Statistical Supplement* present data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on records of the Medicare program and differ from those of other sources because they are limited to facilities meeting federal eligibility standards for participation in Medicare.

Disability and illness—General health statistics, including morbidity, disability, injuries, preventive care, and findings from physiological testing are collected by NCHS in its National Health Interview Survey and its National Health and Nutrition Examination Surveys and appear in *Vital and Health Statistics*, Series 10 and 11, respectively. The Department of Labor compiles statistics on occupational injuries (see Section 12, Labor Force, Employment, and Earnings). Annual incidence data on notifiable diseases are compiled by the Public Health Service (PHS) at its Centers for Disease Control and Prevention in Atlanta, Georgia, and are published as a supplement to its *Morbidity and Mortality Weekly Report (MMWR)*. The list of diseases is revised annually and includes those which, by mutual agreement of the states and PHS, are communicable diseases of national importance.

Nutrition—Statistics on annual per capita consumption of food and its nutrient value are estimated by the Department of Agriculture. Data are available online at <<http://www.ers.usda.gov/data/foodconsumption>>.

Statistical reliability—For discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and CMS, see Appendix III.

Table 124. National Health Expenditures—Summary, 1960 to 2006, and Projections, 2007 to 2017

[In billions of dollars (28 represents \$28,000,000,000). Excludes Puerto Rico and island areas]

Table 134. Medicare Benefits by Type of Provider: 1990 to 2007

[In millions of dollars (65,721 represents \$65,721,000,000). For years ending Sept. 30. Distribution of benefits by type is estimated and subject to change. The Medicare program has two components: Hospital Insurance (HI) or Medicare Part A and Supplementary Medical Insurance (SMI) consisting of Medicare Part B and Part D. See text in this section for details]

| Type of provider | 1990 | 1995 | 2000 | 2003 | 2004 | 2005 | 2006 | 2007 |
|---|---------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| Hospital insurance benefits, total (Part A) | 65,721 | 113,395 | 125,992 | 153,144 | 163,764 | 181,460 | 185,005 | 207,461 |
| Inpatient hospital | 57,012 | 81,095 | 86,561 | 108,570 | 114,375 | 122,288 | 122,035 | 129,586 |
| Skilled nursing facility | 2,761 | 8,684 | 10,269 | 14,938 | 16,673 | 18,631 | 19,651 | 22,293 |
| Home health agency | 3,295 | 15,715 | 4,880 | 4,940 | 5,213 | 5,861 | 5,861 | 6,343 |
| Hospice | 318 | 1,854 | 2,818 | 5,428 | 6,572 | 7,678 | 8,791 | 10,008 |
| Managed care | 2,335 | 6,047 | 21,463 | 19,267 | 20,932 | 27,001 | 28,668 | 39,230 |
| Supplementary medical insurance benefits, total (Part B) | 41,498 | 63,490 | 88,876 | 119,455 | 131,357 | 147,923 | 154,477 | 169,227 |
| Physician fee schedule | (NA) | 31,110 | 35,958 | 47,486 | 52,224 | 57,213 | 57,863 | 58,561 |
| Durable medical equipment | (NA) | 3,576 | 4,577 | 7,429 | 7,687 | 7,888 | 8,308 | 8,169 |
| Carrier lab ¹ | (NA) | 2,819 | 2,194 | 2,946 | 3,206 | 3,521 | 3,672 | 3,982 |
| Other carrier ² | (NA) | 4,513 | 7,154 | 12,432 | 13,794 | 15,197 | 15,277 | 16,003 |
| Hospital ³ | (NA) | 8,448 | 8,516 | 14,692 | 16,931 | 19,216 | 19,878 | 20,736 |
| Home health ⁴ | (NA) | 223 | 4,281 | 5,158 | 5,577 | 6,749 | 7,440 | 9,115 |
| Intermediary lab ⁴ | (NA) | 1,437 | 1,748 | 2,408 | 2,670 | 2,866 | 2,860 | 2,845 |
| Other intermediary ⁵ | (NA) | 5,110 | 6,099 | 9,700 | 10,459 | 11,537 | 11,966 | 12,092 |
| Managed care | (NA) | 6,253 | 18,348 | 17,203 | 18,809 | 23,735 | 27,213 | 37,724 |
| Supplementary medical insurance benefits, total (Part D)⁶ | (X) | (X) | (X) | (X) | 216 | 1,198 | 33,745 | 51,219 |

NA Not available. X Not applicable. ¹ Lab services paid under the lab fee schedule performed in a physician's office lab or an independent lab. ² Includes free-standing ambulatory surgical center's facility costs, ambulance, and supplies. ³ Includes the hospital facility costs for Medicare Part B services which are predominantly in the outpatient department. The physician reimbursement associated with these services is included on the "Physician Fee Schedule" line. ⁴ Lab fee services paid under the lab fee schedule performed in a hospital outpatient department. ⁵ Includes ESRD (End Stage Renal Disease) free-standing dialysis facility payments and payments to rural health clinics, outpatient rehabilitation facilities, psychiatric hospitals, and federally qualified health centers. ⁶ Starting with 2006, Part D provides subsidized access to drug insurance coverage on a voluntary basis for all beneficiaries and premium and cost-sharing subsidies for low-income enrollees. Benefits prior to 2006 were for transitional assistance to beneficiaries with low income.

¹ Persons who had payments made on their behalf at any time during the fiscal year. ² Payments are for fiscal year and reflect federal and state contribution payments. Data exclude disproportionate share hospital payments. Disproportionate share hospitals receive higher Medicaid reimbursement than other hospitals because they treat a disproportionate share of Medicaid patients. ³ 2005 beneficiary data are not available for Maine; 2004 data are reported.

Table 142. State Children's Health Insurance Program (SCHIP)—Enrollment and Expenditures by State: 2000 and 2007

[(3,357.4 represents 3,357,400) For year ending September 30. This program provides health benefits coverage to children living in families whose incomes exceed the eligibility limits for Medicaid. Although it is generally targeted to families with incomes at or below 200 percent of the federal poverty level, each state may set its own income eligibility limits, within certain guidelines. States have three options: they may expand their Medicaid programs, develop a separate child health program that functions independently of Medicaid, or do a combination of both]

Table 144. Health Maintenance Organizations (HMOs): 1990 to 2007

[As of January 1 (33.0 represents 33,000,000). An HMO is a prepaid health plan delivering comprehensive care to members through designated providers, having a fixed periodic payment for health care services, and requiring members to be in a plan for a specified period of time (usually 1 year). A group HMO delivers health services through a physician group that is controlled by the HMO unit or contracts with one or more independent group practices to provide health services. An individual practice association (IPA) HMO contracts directly with physicians in independent practice, and/or contracts with one or more associations of physicians in independent practice, and/or contracts with one or more multispecialty group practices. Data are based on a census of HMOs]

| Model type | Number of plans | | | | | | | Enrollment ¹ (mil.) | | | | | | |
|------------|-----------------|------|-------------------|---------------------|---------------------|---------------------|---------------------|--------------------------------|------|-------------------|---------------------|---------------------|---------------------|--|

Z Less than 0.5 percent. ¹ Other occupational groups not shown. See Table 150 for complete listing of groups. ² A composite rate is a set contribution covering more than one benefit area; for example, health care and life insurance. Cost data for individual plans cannot be determined. ³ Based on worker attributes. For example, employer contributions may vary based on earnings, length of service, or age. ⁴ Amount varies by options selected under a "cafeteria plan" or employer-sponsored reimbursement account.

Table 150. Percent of Workers Participating in Health Care Benefit Programs and Percent of Participants Required to Contribute: 2007

[Based on National Compensation Survey, a sample survey of 12,821 private industry establishments of all sizes, representing about 108 million workers; see Appendix III. See also Table 634. The data below marks the first release of data on employee benefits under new industry and occupational classifications. For more information, see <<http://www.bls.gov/nscs/ebs/ebsm0006.pdf>>]

| Characteristic | Percent of workers participating— | | | | Single coverage medical care | | Family coverage medical care | |
|--|-----------------------------------|-------------|-------------|--|---|--|---|--|
| | Medical care | Dental care | Vision care | Out-patient prescription drug coverage | Employee contributions required (percent) | Average monthly contribution ¹ (dol.) | Employee contributions required (percent) | Average monthly contribution ¹ (dol.) |
| Total | 52 | 36 | 22 | 49 | 76 | 81.37 | 87 | 312.78 |
| Management, professional, and related Service | 67 | 51 | 30 | 64 | 79 | 79.97 | 91 | 313.42 |
| Service | 28 | 20 | 14 | 27 | 81 | 88.89 | 92 | 342.92 |
| Sales and office | 48 | 33 | 19 | 46 | 79 | 83.63 | 91 | 333.44 |
| Natural resources, construction, and maintenance | 61 | 36 | 26 | 58 | 62 | 82.21 | 74 | 314.33 |
| Production, transportation, and material moving | 60 | 38 | 24 | 57 | 74 | 75.38 | 82 | 263.68 |
| Full-time ² | 64 | 44 | 27 | 61 | 76 | 80.67 | 87 | 311.94 |
| Part-time ² | 12 | 9 | 7 | 12 | 77 | 93.04 | 88 | 327.75 |
| Union ³ | 78 | 62 | 47 | 75 | 50 | 62.45 | 57 | 211.91 |
| Nonunion | 49 | 33 | 19 | 46 | 81 | 83.51 | 93 | 323.80 |

¹ The average is presented for all covered workers and excludes workers without the plan provision. Averages are for plans stating a flat monthly cost. ² Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. ³ Union workers are those whose wages are determined through collective bargaining.

Table 155. Osteopathic Physicians: 2001 to 2008

(As of May 31. Osteopathic physicians are fully qualified physicians licensed to practice medicine and to perform surgery. Osteopathic medicine has a strong emphasis on the interrelationship of the body's nerves, muscles, bones and organs. Doctors of osteopathic medicine, or D.O.s, apply the philosophy of treating the whole person to the prevention, diagnosis and treatment of illness (disease and injury).)

| Characteristic | 2001 | 2005 | 2008 | Characteristic | 2001 | 2005 | 2008 |
|------------------------|--------|--------|--------|---|--------|--------|--------|
| Total number of D.O.s | 46,990 | 56,512 | 64,000 | Self-identified practice specialty ¹ | 31,996 | 38,442 | 43,896 |
| Sex | | | | Family and general practice | 14,102 | 17,800 | 18,680 |
| Female | 10,875 | 15,147 | 19,138 | General internal medicine | 2,592 | 3,107 | 4,171 |
| Male | 36,115 | 41,365 | 44,862 | General pediatrics/adolescent medicine | 958 | 1,176 | 1,525 |
| Age | | | | Obstetrics and gynecology | 1,219 | 1,465 | 1,858 |
| Less than 35 years old | 9,866 | 12,983 | 13,251 | Pediatric specialties ² | 320 | 348 | 470 |
| 35 to 44 years old | 14,798 | 16,179 | 18,638 | Osteopathic specialties ² | 414 | 464 | 656 |
| 45 to 54 years old | 12,754 | 13,845 | 15,931 | Other specialties | 12,001 | 13,431 | 16,178 |
| 55 to 64 years old | 4,706 | 7,998 | 9,819 | Unknown | 390 | 651 | 358 |
| 65 years old and over | 4,838 | 5,189 | 6,120 | | | | |
| Unknown | 28 | 318 | 241 | | | | |

¹ D.O.s are assumed to be in active practice if they are under age 65 and have not informed the AOA that they have retired or are inactive. D.O.s are assumed to be in postdoctoral training (internship, residency, or fellowship) if they are within 4 years of graduation or if the AOA has received information that they are in a postdoctoral program. ² Osteopathic self-identified practice specialties include OMT (osteopathic manipulative treatment) and OMM (osteopathic manipulative medicine). OMT is the therapeutic application of manually guided forces by an osteopathic physician to improve physiologic function and/or support homeostasis that has been altered by somatic dysfunction. OMM is the application of osteopathic philosophy, structural diagnosis and use of OMT in the patient's diagnosis and management.

| Race alone: | | | | | | | | |
| White | 16.0 | 17.2 | 45.1 | 46.2 | 25.3 | 23.4 | 13.7 | 13.2 |
| Black or African American | 17.3 | 16.0 | 46.7 | 49.2 | 23.4 | 23.3 | 12.6 | 11.5 |
| American Indian or Alaska Native | 21.2 | 13.5 | 42.9 | 44.2 | 20.0 | 27.6 | 15.8 | 14.7 |
| Asian | 20.2 | 21.9 | 49.2 | 51.3 | 20.9 | 18.1 | 9.7 | 8.7 |
| Two or more races | 12.1 | 16.3 | 41.6 | 44.8 | 28.3 | 21.3 | 17.9 | 17.6 |
| HISPANIC ORIGIN AND RACE ^{2, 3, 4} | | | | | | | | |
| Hispanic or Latino | 26.5 | 27.1 | 41.8 | 43.0 | 20.0 | 19.6 | 11.7 | 10.3 |
| Mexican | 30.7 | 31.1 | 40.9 | 40.8 | 18.0 | 18.3 | 10.4 | 9.8 |
| Not Hispanic or Latino | 15.2 | 15.4 | 45.9 | 47.6 | 25.3 | 23.7 | 13.6 | 13.2 |
| White, non-Hispanic | 14.5 | 15.0 | 45.4 | 46.9 | 26.0 | 24.2 | 14.1 | 13.9 |
| Black, non-Hispanic | 17.2 | 15.7 | 46.9 | 49.5 | 23.4 | 23.4 | 12.6 | 11.4 |

¹ Includes other categories not shown separately. ² Estimates are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. ³ Estimates by race and Hispanic origin are tabulated using the 1997 standards for federal data on race and ethnicity. Estimates for specific race groups are shown when they meet requirements for statistical reliability and confidentiality. The categories "White only," "Black or African American only," "American Indian and Alaska Native (AI/AN) only," and "Asian only" include persons who reported only one racial group; and the category "2 or more races" includes persons who reported more than one of the five racial groups in the 1997 Standards or one of the five racial groups and "Some other race." ⁴ Persons of Hispanic or Latino origin may be of any race or combination of races.

Z Less than 500 beds or \$50 million. ¹ Includes hospital units of institutions. ² Short-term (average length of stay less than 30 days) general and special (e.g., obstetrics and gynecology; eye, ear, nose and throat; rehabilitation, etc. except psychiatric, tuberculosis, alcoholism, and chemical dependency). Excludes hospital units of institutions. ³ Number of beds at end of reporting period. ⁴ Based on Census Bureau estimated resident population as of July 1, 1990, and 2000 based on enumerated resident population as of April 1. Estimates reflect revisions based on the 2000 census of population. ⁵ The average number of people served on an inpatient basis on a single day during the reporting period. ⁶ Excludes new construction. ⁷ Includes full-time equivalents of part-time personnel.

Table 166. Hospital Use Rates by Type of Hospital: 1990 to 2006

| Type of hospital | 1990 | 1995 | 2000 | 2002 | 2003 | 2004 | 2005 | 2006 |
|---|-------|-------|-------|-------|-------|-------|-------|-------|
| Community hospitals: ¹ | | | | | | | | |
| Admissions per 1,000 population ² | 125 | 116 | 117 | 120 | 120 | 119 | 119 | 118 |
| Admissions per bed | 34 | 35 | 40 | 42 | 43 | 43 | 44 | 44 |
| Average length of stay (days) ³ | 7.2 | 6.5 | 5.8 | 5.7 | 5.7 | 5.6 | 5.6 | 5.5 |
| Outpatient visits per admission | 9.7 | 13.4 | 15.8 | 16.1 | 16.2 | 16.3 | 16.5 | 16.9 |
| Outpatient visits per 1,000 population ² | 1,207 | 1,556 | 1,852 | 1,932 | 1,937 | 1,946 | 1,976 | 2,002 |
| Surgical operations (million) ⁴ | 21.9 | 23.2 | 26.1 | 27.6 | 27.1 | 27.4 | 27.5 | 28.1 |
| Number per admission | 0.7 | 0.7 | 0.8 | 0.8 | 0.8 | 0.8 | 0.8 | 0.7 |
| Nonfederal psychiatric: | | | | | | | | |
| Admissions per 1,000 population ² | 2.9 | 2.7 | 2.4 | 2.5 | 2.6 | 2.7 | 2.5 | 2.3 |
| Days in hospital per 1,000 population ² | 190 | 122 | 93 | 92 | 91 | 88 | 89 | 82 |

¹ Short term (average length of stay less than 30 days) general and special (e.g., obstetrics and gynecology; eye, ear, nose and throat; rehabilitation, etc. except psychiatric, tuberculosis, alcoholism and chemical dependency). Excludes hospital units of institutions. ² Based on U.S. Census Bureau estimated resident population as of July 1. Estimates reflect revisions based on the 2000 census of population. 1990 and 2000 based on enumerated resident population as of April 1. ³ Number of inpatient days divided by number of admissions. ⁴ 21.9 represents 21,900,000.

¹ The first-listed diagnosis is the one specified as the principal diagnosis or the first diagnosis listed on the face sheet or discharge summary of the medical record. It is usually the main cause of the hospitalization. The number of first-listed diagnoses is the same as the number of discharges. ² Crude estimates. ³ Estimates are age adjusted to the year 2000 standard population using six age groups: under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. ⁴ Includes discharges with first-listed diagnoses not shown in table. ⁵ Estimates are considered unreliable. ⁶ These estimates are for nonfederal short-stay hospitals only and do not include serious mental illness discharges. Includes abuse, dependence, and withdrawal. These estimates are for nonfederal short-stay hospitals only and do not include alcohol and drug discharges from other types of facilities or programs such as the Department of Veterans Affairs or day treatment programs.

Table 171. Selected Cosmetic Plastic Surgery Procedures: 2001 to 2007

[In thousands (8,470.4 represents 8,470,400). As of December 31. The final data are projected to reflect nationwide statistics and are based on a survey of doctors who have been certified by the American Board of Medical Specialties recognized boards. The final data as reported by the American Society for Aesthetic Plastic Surgery (ASAPS) including but not limited to the American Board of Plastic Surgery. ASAPS members are plastic surgeons certified by the American Board of Plastic Surgery who specialize in cosmetic surgery of the face and the entire body. Procedures are ranked by total number in the most current year]

| Procedure | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 |

Table 173. Cancer—Estimated New Cases, 2008, and Survival Rates: 1987–1989 to 1996–2004

[1,437 represents 1,437,000. The 5-year relative survival rate, which is derived by adjusting the observed survival rate for expected mortality, represents the likelihood that a person will not die from causes directly related to their cancer within 5 years. Survival data shown are based on those patients diagnosed while residents of an area listed below during the time periods shown. Data are based on information collected as part of the National Cancer Institute's Surveillance, Epidemiology, and End Results (SEER) program, a collection of population-based registries in five states (Connecticut, Hawaii, Iowa, New Mexico, Utah) and four metropolitan areas (Atlanta, Detroit, San Francisco-Oakland, and Seattle-Puget Sound)]

| Site | Estimated new cases, 2008 (1,000) | | | 5-year relative survival rates (percent) | | | | | | | |

NA Not available. ¹ Acquired immunodeficiency syndrome was not a notifiable disease until 1984. Figures are shown for years in which cases were reported to the CDC. Beginning 1995, based on revised classification system and expanded surveillance case definition. 2006 data are not available; see source for details. ² Disease was not notifiable. ³ Includes foodborne, infant, wound, and unspecified cases. ⁴ Chickenpox was taken off the nationally notifiable list in 1991 but many states continue to report. ⁵ The national surveillance case definitions for the arboviral diseases was revised in 2005, and nonneuroinvasive arboviral diseases were added to the list of nationally notifiable infectious diseases. ⁶ Includes some persons positive for antibody to hepatitis C virus. ⁷ Whooping cough. ⁸ German measles. Excludes congenital syndrome. ⁹ Excludes typhoid fever. ¹⁰ Bacillary dysentery. ¹¹ Newly reported active cases.

— Represents zero. ¹ 2006 data are not available; see source for details. ² Not notifiable.

Source: Summary of Notifiable Diseases, United States, 2006, *Morbidity and Mortality Weekly Report*, Vol. 55, No. 53, March 21, 2008; <<http://www.cdc.gov/mmwr/PDF/wk/mm5553.pdf>>.

Table 177. Reported AIDS Cases for Adults and Adolescents by Transmission Category and Sex: 2006

[Provisional. For cases reported in the year shown. Includes Puerto Rico, Virgin Islands, Guam, and U.S. Pacific Islands. Acquired immunodeficiency syndrome (AIDS) is a specific group of diseases or conditions which are indicative of severe immunosuppression related to infection with the human immunodeficiency virus (HIV). Data are subject to retrospective changes and may differ from those data in Table 175. For information on HIV death rates, go to Table 121]

| Transmission category | 2006 | | | Cumulative through 2006 ¹ | | |
|---|---------------|---------------|---------------|--------------------------------------|----------------|----------------|
| | Total | Male | Female | Total | Male | Female |
| Persons 13 years old and over, total | 38,916 | 28,378 | 10,537 | 983,343 | 791,626 | 191,714 |
| Male-to-male sexual contact | 13,775 | 13,775 | (X) | 429,897 | 429,897 | (X) |
| Injection drug use | 5,239 | 3,413 | 1,826 | 230,763 | 163,070 | 67,693 |
| Male-to-male sexual contact and injection drug use | 1,603 | 1,603 | (X) | 65,524 | 65,524 | (X) |
| Hemophilia/coagulation disorder | 54 | 43 | 11 | 5,524 | 5,176 | 348 |
| High-risk heterosexual contact | 7,836 | 2,997 | 4,839 | 134,796 | 49,610 | 85,186 |
| Sex with injection drug user | 1,036 | 330 | 706 | 37,756 | 11,683 | 26,073 |
| Sex with bisexual male | 234 | (X) | 234 | 5,162 | (X) | 5,162 |
| Sex with person with hemophilia | 12 | 1 | 11 | 586 | 84 | 502 |
| Sex with HIV-infected person, transfusion recipient | 43 | 22 | 21 | 1,346 | 553 | 793 |
| Sex with HIV-infected person, risk factor not specified | 6,511 | 2,644 | 3,867 | 89,946 | 37,290 | 52,656 |
| Receipt of blood transfusion, blood components, or tissue | 131 | 63 | 68 | 9,989 | 5,213 | 4,176 |
| Other/risk not reported or identified | 10,278 | 6,484 | 3,793 | 107,450 | 73,136 | 34,311 |

X Not applicable. ¹ Includes persons with a diagnosis of AIDS, reported from the beginning of the epidemic through 2006. Cumulative total includes persons with characteristics unknown.

Source: U.S. Centers for Disease Control and Prevention, Atlanta, GA, *HIV/AIDS Surveillance Report, 2006*, Volume 18; <<http://www.cdc.gov/hiv/topics/surveillance/resources/reports/2006report/default.htm>> (revised 1 April 2008).

Table 178. Estimated Numbers of Persons Living With Acquired Immunodeficiency Syndrome (AIDS) by Year, Age, and Selected Characteristics: 2000 to 2006

[These numbers do not represent reported case counts. Rather, these numbers are point estimates, which result from adjustments of reported case counts. The reported case counts are adjusted for reporting delays and for redistribution of cases in persons initially reported without an identified risk factor. The estimates do not include adjustment for incomplete reporting. Data for years 2003 to 2005 have been revised. See the Commentary section in the report. For information on HIV death rates, go to Table 121]

Table 186. Persons 65 Years Old and Over With Limitation of Activity Caused by Chronic Conditions: 2000 to 2006

[In percent. Covers noninstitutionalized persons 65 years old and over. To determine activities of daily living (ADL) limitations, respondents were asked "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons with personal care needs, such as eating, bathing, dressing, or getting around inside this home?" Instrumental activities of daily living (IADL) were determined by asking respondents "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons in handling routine needs, such as everyday household chores, doing necessary business, shopping, or getting around for other purposes?" See also headnote, Table 185]

| Characteristic | Percent with ADL limitation | | | | Percent with IADL limitation | | | |

| Affiliation: | | | | | | | |
| Chain | 8,700 | 939 | 107.9 | 812 | 86.5 | 540 | 57.4 |
| Independent | 7,400 | 791 | 107.2 | 680 | 86.0 | 514 | 65.0 |

¹ Number of residents divided by number of available beds multiplied by 100. ² Includes only those employees providing direct health-related services to residents. Includes nurses, nurses' aides, orderlies, dental hygienists, physical therapists, speech pathologists and/or audiologists, dietitians or nutritionists, podiatrists, and social workers. ³ Estimates for nursing homes that are "not certified" are not shown because the sample size was less than 30 and figures are unreliable. ⁴ Figure does not meet standards of reliability or precision.

Table 193. Injuries Associated With Selected Consumer Products: 2006

[Estimates calculated from a representative sample of hospitals with emergency treatment departments in the United States. Data are estimates of the number of emergency-room treated cases nationwide associated with various products. Product involvement does not necessarily mean the product caused the accident. Products were selected from the U.S. Consumer Product Safety Commission's National Electronic Injury Surveillance System (NEISS)]

| Product | Number | Product | Number |
|--|-----------|----------------------------------|-----------|
| Home workshop equipment: | | Stairs or steps | 1,143,751 |
| Saws (hand or power) | 95,317 | Other doors | 317,825 |
| Hammers | 34,829 | Ceilings and walls | 308,501 |
| Household packaging and containers: | | Home entertainment equipment: | |
| Household containers and packaging | 215,537 | Televisions | 53,824 |
| Bottles and jars | 74,148 | Personal use items: | |
| Housewares: | | Footwear | 136,156 |
| Knives | 434,331 | Wheelchairs | 115,743 |
| Tableware and flatware | 97,531 | Crutches, canes, walkers | 85,346 |
| Drinking glasses | 75,803 | Yard and garden equipment: | |
| Home furnishing | | Lawn mowers | 78,740 |
| Beds | 526,331 | Sports and recreation equipment: | |
| Chairs | 317,888 | Bicycles | 490,434 |
| Tables | 317,795 | Skateboards | 125,713 |
| Household cabinets, racks, and shelves | 279,322 | Trampolines | 109,522 |
| Home structures, construction: | | Playground climbing equipment | 79,332 |
| Floors or flooring materials | 1,191,161 | Swings or swing sets | 55,349 |

¹ Excludes baby-changing and television tables or stands. ² Excludes glass doors and garage doors.

Table 198. Substance Abuse Treatment Facilities and Clients: 1995 to 2007

[As of October 2 (1995); as of October 1 (1998–2000), as of March 29 (2002), as of March 31 (2003–2006), and March 30, 2007. Based on the Uniform Facility Data Set (UFDS) National Survey of Substance Abuse Treatment Services (N-SSATS) survey, a census of all known facilities that provide substance abuse treatment in the United States and associated jurisdictions. Selected missing data for responding facilities were imputed]

| Primary focus | Number | Primary focus | Number | Type of care and type of problem | Number of clients |
|--|---------------|--|------------------|--|-------------------|
| FACILITIES | | CLIENTS | | 2007, total^{1, 2} | 1,135,425 |
| 1995 | 10,746 | 1995 | 1,009,127 | Outpatient rehabilitation | 1,004,208 |
| 1998 | 13,455 | 1998 | 1,038,378 | Outpatient detoxification | 12,705 |
| 2000 | 13,428 | 2000 | 1,000,896 | 24-hour rehabilitation | 104,657 |
| 2002 | 13,720 | 2002 | 1,136,287 | 24-hour detoxification | 13,855 |
| 2003 | 13,623 | 2003 | 1,092,546 | | |
| 2004 | 13,454 | 2004 | 1,072,251 | | |
| 2005 | 13,371 | 2005 | 1,081,049 | 2007, total^{1, 2} | 1,133,436 |
| 2006 | 13,771 | 2006 | 1,130,881 | Drug only | 412,418 |
| 2007, total² | 13,648 | 2007, total² | 1,135,425 | Alcohol only | 211,094 |
| Substance abuse treatment services | 8,360 | Substance abuse treatment services | 768,047 | Both alcohol & drug | 509,924 |
| Mental health services | 949 | Mental health services | 47,803 | | |
| General health care | 189 | General health care | 12,747 | Total with a drug problem | 922,342 |
| Both substance abuse and mental health | 3,957 | Both substance abuse and mental health | 297,907 | Total with an alcohol problem ⁴ | 721,018 |
| Other | 193 | Other | 8,921 | | |

¹ Excludes clients at facilities that did not provide data on type of substance abuse problem treated. ² Data for 2007 are based on preliminary data and are subject to change. ³ The sum of clients with a drug problem and clients with both diagnoses. ⁴ The sum of clients with an alcohol problem and clients with both diagnoses.

Source: U.S. Substance Abuse and Mental Health Services Administration, Uniform Facility Data Set (UFDS): National surveys for 1995–1999, and Office of Applied Studies, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2000–2007; <<http://oas.samhsa.gov/oasftp.cfm#Data>>.

Table 199. Drug Use by Type of Drug and Age Group: 2002 and 2006

[In percent. Data comes from the National Survey on Drug Use and Health (NSDUH). Current users are those who used drugs at least once within month prior to this study. Based on a representative sample of the U.S. population age 12 years and older, including persons living in households and in some group quarters such as dormitories and homeless shelters. Estimates are based on computer-assisted interviews of about 68,000 respondents. Subject to sampling variability; see source]

– Represents or rounds to zero. NA Not available. ¹ Illicit drugs include marijuana/hashish, cocaine (including crack), heroin, hallucinogens, inhalants, or prescription-type psychotherapeutics used nonmedically. ² Nonmedical use of prescription-type psychotherapeutics includes the nonmedical use of pain relievers, tranquilizers, stimulants, or sedatives and does not include over-the-counter drugs. ³ Binge alcohol use is defined as drinking five or more drinks on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. Heavy alcohol use is defined as drinking five or more drinks on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also binge alcohol users.

Table 200. Estimated Use of Selected Drugs by State: 2005–2006

[20,040 represents 20,040,000. Data in this table cover a 2-year period. Data is based on the National Survey on Drug Use and Health (NSDUH). Current users are those persons 12 years old and over who used drugs at least once within month prior to this study. Based on national sample of respondents (see also headnote, Table 199). The state estimates were produced by combining the prevalence rate based on the state sample data and the prevalence rate based on a national regression model applied to local-area county and census block group/tract-level estimates from the state (i.e., a survey-weighted hierarchical Bayes estimation approach). The parameters of the regression model are estimated from the entire national sample. For comparison purposes, the data shown here display estimates for all 50 states and the District of Columbia utilizing the modeled estimates for all 51 areas]

| State | Estimated current users (1,000) | | | | | Current users as percent of population | | | | |
|---------------------|---------------------------------|---------------|--|---------------|----------------------------|--|------------|--|-------------|----------------------------|

Table 201. Cumulative Percent Distribution of Population by Height and Sex: 2003–2006

[Data are based on National Health and Nutrition Examination Survey (NHANES), a sample of the civilian noninstitutional population. For this survey, the respondent participates in an interview and a physical examination. For persons 20 years old and over, height was measured without shoes. Based on sample and subject to sampling variability; see source]

Table 203. Age-Adjusted Percent Distributions of Body Mass Index (BMI) Among Persons 18 Years Old and Over by Selected Characteristics: 2003–2006

[See headnote, Table 201. Body Mass Index (BMI) is a measure that adjusts body weight for height. It is calculated as weight in kilograms divided by height in meters squared. For both men and women, underweight is indicated by a BMI under 18.5; healthy weight is indicated by a BMI greater than or equal to 18.5 and less than 25.0; overweight is greater than or equal to 25.0 and less than 30.0; obesity is indicated by a BMI greater than or equal to 30.0. BMI is calculated from the measurement of the participants' weight and height during the examination. Based on the National Health and Nutrition Examination Survey (NHANES)]

| Selected characteristic | Underweight | Healthy weight | Above healthy weight | | |
|--|-------------|----------------|----------------------|-------------|-------------|
| | | | Total | Overweight | Obese |
| Total ¹ (age-adjusted) | 1.9 | 32.5 | 65.6 | 32.9 | 32.6 |
| Total ¹ (crude) | 1.9 | 32.1 | 66.0 | 33.1 | 33.0 |
| Age: ² | | | | | |
| 18 to 44 years old | 2.6 | 37.4 | 60.0 | 29.7 | 30.3 |

Table 204. Percentage of Adults Engaging in Leisure-Time, Transportation-Related and Household-Related Physical Activity: 2005

[In percent. Covers persons 18 years old and over. Based on responses to questions about physical activity in prior month from the Behavioral Risk Factor Surveillance System. Estimates are age-adjusted to the year 2000 standard population. Based on a survey sample of approximately 350,000 persons in 50 states and the District of Columbia in 2005. The following lifestyle activities are used to help measure level of activity (see footnotes below). Leisure-time physical activity is exercise, sports, recreation, or hobbies that are not associated with activities as part of one's regular job duties, household, or transportation. Transportation-physical activity is walking, biking or wheeling (for wheelchair users), or similar activities to and from places such as: work, school, place of worship, and stores. Household physical activity includes, but is not limited to, activities such as sweeping floors, scrubbing, washing windows, and raking the lawn]

| Characteristic | Persons who meet recommended activity ¹ | Persons not meeting recommended activity ² | Persons who are physically inactive ³ | Characteristic | Persons who meet recommended activity ¹ | Persons not meeting recommended activity ² | Persons who are physically inactive ³ |
|-----------------------|--|---|--|-------------------------------|--|---|--|
| Total | 48.3 | 51.7 | 25.1 | 30 to 44 years old | 50.3 | 49.7 | 24.3 |
| Male | 49.9 | 50.1 | 22.9 | 45 to 64 years old | 45.8 | 54.2 | 27.3 |
| Female | 47.0 | 53.0 | 27.1 | 65 to 74 years old | 41.2 | 58.8 | 31.7 |
| White, non-Hispanic | 50.9 | 49.1 | 21.4 | 75 years old and over | 31.8 | 68.2 | 41.8 |

| 45 to 64 years old | 46.6 | 53.4 | 24.6 | Less than \$10,000 | 36.9 | 63.1 | 44.6 |
| 65 to 74 years old | 47.7 | 52.3 | 26.0 | \$10,000 to \$19,999 | 38.7 | 61.3 | 39.8 |
| 75 years old and over | 40.3 | 59.7 | 32.0 | \$20,000 to \$34,999 | 45.3 | 54.7 | 30.6 |
| Females: | | | | \$35,000 to \$49,999 | 49.1 | 50.9 | 22.9 |
| 18 to 29 years old | 52.1 | 47.9 | 23.2 | \$50,000 and over | 55.0 | 45.0 | 15.0 |

¹ Recommended activity is physical activity at least 5 times a week for 30 minutes at a time or vigorous physical activity for 20 minutes at a time at least 3 times/week. This can be accomplished through lifestyle activities (i.e., household, transportation, or leisure-time activities). ² Doing more than 10 minutes total per week of moderate- or vigorous-intensity lifestyle activities (i.e., household, transportation, or leisure-time activities), but less than the recommended level of activity. ³ Persons with no reported physical activities in the previous month.

Table 206. Households and Persons Having Problems With Access to Food: 2002 to 2006

[108,601 represents 108,601,000. Food-secure means that a household had access at all times to enough food for an active healthy life for all household members, with no need for recourse to socially unacceptable food sources or extraordinary coping behaviors to meet their basic food needs. Food-insecure households had limited or uncertain ability to acquire acceptable foods in socially acceptable ways. Households with very low food security (a subset of food-insecure households) were those in which food intake of one or more household members was reduced and normal eating patterns disrupted due to inadequate resources for food. The severity of food insecurity in households is measured through a series of questions about experiences and behaviors known to characterize households that are having difficulty meeting basic food needs. These experiences and behaviors generally occur in an ordered sequence as the severity of food insecurity increases. As resources become more constrained, adults in typical households first worry about having enough food, then they stretch household resources and juggle other necessities, then decrease the quality and variety of household members' diets, then decrease the frequency and quantity of adults' food intake, and finally decrease the frequency and quantity of children's food intake. All questions refer to the previous 12 months and include a qualifying phrase reminding respondents to report only those occurrences that resulted from inadequate financial resources. Restrictions to food intake due to dieting or busy schedules are excluded. The omission of homeless persons may be a cause of underreporting. Data are from the Food Security Supplement to the Current Population Survey (CPS); for details about the CPS, see text, Section 1, Population, and Appendix III]

| Household food security level | Number (1,000) | | | | | Percent distribution | | | | |

¹ Prior to 2006, USDA described these households as food insecure without hunger. ² Food intake of one or more members in these households was reduced and normal eating patterns disrupted at some time during the year because of the household's food insecurity. Prior to 2006, USDA described these households as food insecure with hunger. ³ The food security survey measures food security status at the household level. Not all children residing in food-insecure households were directly affected by the households food insecurity. Similarly, not all children in households classified as having very low food security among children were subject to the reductions in food intake and disruptions in eating patterns that characterize this condition. Young children, in particular, are often protected from effects of the households food insecurity.

Section 4

Education

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for charter schools, security measures used in schools, computer usage in schools, and adult education. The chief sources are the decennial census of population and the Current Population Survey (CPS), both conducted by the U.S. Census Bureau (see text, Section 1, Population); annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics (NCES), a part of the U.S. Department of Education; and surveys conducted by the National Education Association.

The censuses of population have included data on school enrollment since 1840 and on educational attainment since 1940. The CPS has reported on school enrollment annually since 1945 and on educational attainment periodically since 1947.

The NCES is continuing the pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, including government expenditures, and organization at the elementary, secondary, and higher education levels. It is also a primary source for detailed information on federal funds for education, projections of enrollment, graduates, and teachers. *The Condition of Education*, issued annually, presents a summary of information on education of particular interest to policymakers. NCES also conducts special studies periodically.

The census of governments, conducted by the Census Bureau every 5 years (for the years ending in "2" and "7"), provides data on school district finances and state and local government expenditures for

education. Reports published by the Bureau of Labor Statistics contain data relating civilian labor force experience to educational attainment (see also Tables 572, 599, and 607 in Section 12, Labor Force, Employment, and Earnings).

Types and sources of data—The statistics in this section are of two general types. One type, exemplified by data from the Census Bureau, is based on direct interviews with individuals to obtain information about their own and their family members' education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. The school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual, or beginning 1992, the highest diploma or degree received.

Beginning in 2001, the CPS used Census 2000 population controls. From 1994 to 2000, the CPS used 1990 census population controls plus adjustment for undercount. Also the survey changed from paper to computer-assisted technology. For years 1981 through 1993, 1980 census population controls were used; 1971 through 1980, 1970 census population controls had been used. These changes had little impact on summary measures (e.g., medians) and proportional measures (e.g., enrollment rates); however, use of the controls may have significant impact on absolute numbers.

The second type, generally exemplified by data from the NCES and the National Education Association, is based on reports from administrators of educational institutions and of state and local agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the nation, individual states, and local areas.

Unlike the NCES, the Census Bureau does not regularly include specialized vocational, trade, business, or correspondence schools in its surveys. The NCES includes nursery schools and kindergartens that are part of regular grade schools in their enrollment figures. The Census Bureau includes all nursery schools and kindergartens. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges.

School attendance—All states require that children attend school. While state laws vary as to the ages and circumstances of compulsory attendance, generally they require that formal schooling begin by age 6 and continue to age 16.

Schools—The NCES defines a school as “a division of the school system consisting of students composing one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.”

Regular schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools.

Public schools are schools controlled and supported by local, state, or federal governmental agencies; private schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Census Bureau defines *elementary* schools as including grades 1 through 8; *high* schools as including grades 9 through 12; and *colleges* as including junior or community colleges, regular 4-year colleges, and universities and graduate or professional schools. Statistics reported by the NCES and the National Education Association by type of organization, such as elementary level and secondary level, may not be strictly comparable with those from the Census Bureau because the grades included at the two levels vary, depending on the level assigned to the middle or junior high school by the local school systems.

School year—Except as otherwise indicated in the tables, data refer to the school year which, for elementary and secondary schools, generally begins in September of the preceding year and ends in June of the year stated. For the most part, statistics concerning school finances are for a 12-month period, usually July 1 to June 30. Enrollment data generally refer to a specific point in time, such as fall, as indicated in the tables.

Statistical reliability—For a discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to the Census Bureau and the NCES data, see Appendix III.

Table 211. School Enrollment: 1980 to 2017

[In thousands (58,305 represents 58,305,000). As of fall]

| Year | All levels | | | Pre-K through grade 8 | | Grades 9 through 12 | | College ¹ | |
|--------------------------|------------|--------|---------|-----------------------|---------|---------------------|---------|----------------------|---------|
| | Total | Public | Private | Public | Private | Public | Private | Public | Private |
| 1980 | 58,305 | 50,335 | 7,971 | 27,647 | 3,992 | 13,231 | 1,339 | 9,457 | 2,640 |
| 1985 | 57,226 | 48,901 | 8,325 | 27,034 | 4,195 | 12,388 | 1,362 | 9,479 | 2,768 |

| Percent minority enrollment: | | | | | | | | | |
| Less than 5 percent | 16,600 | 72 | 13 | 43 | 62 | 26.9 | 0.9 | 4.8 | 8.6 |
| 5 to 20 percent | 20,600 | 74 | 16 | 43 | 63 | 22.9 | 0.9 | 5.2 | 9.3 |
| 20 to 50 percent | 18,600 | 80 | 17 | 48 | 71 | 28.4 | 1.4 | 5.5 | 9.6 |
| 50 percent or more | 25,600 | 83 | 22 | 48 | 72 | 39.9 | 1.5 | 4.8 | 10.1 |

S Figure does not meet publication standards. ¹ Violent incidents include rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack with or without a weapon, and robbery with or without a weapon. ² Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon. ³ Theft or larceny (taking things worth over \$10 without personal confrontation). Includes pocket picking, stealing purse or backpack (if left unattended or no force was used to take from owner), theft from motor vehicles, etc. ⁴ Other incidents include possession of a firearm or explosive device, possession of knife or sharp object, distribution of illegal drugs, possession or use of alcohol or illegal drugs, and vandalism. ⁵ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combination of grades, including K-12 schools. ⁶ These estimates exclude data from Tennessee because schools in this state did not report estimates of student race.

| 50 percent or more | 3.4 | 28.9 | 3.6 | 15.3 | 4.8 | 25.2 | 31.6 | 3.8 |

S Figure does not meet publication standards. ¹ Sexual harassment includes "unsolicited, offensive behavior that inappropriately asserts sexuality over another person. This behavior may be verbal or nonverbal." ² Gang includes an "ongoing loosely organized association of three or more persons, whether formal or informal, that has a common name, signs, symbols, or colors, whose members engage, either individually or collectively, in violent or other forms of illegal behavior." ³ Cult or extremist group includes "a group that espouses radical beliefs and practices, which may include a religious component, that are widely seen as threatening the basic values and cultural norms of society at large." ⁴ Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade level is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K-12 schools. ⁵ Interpret data with caution. ⁶ These estimates exclude data from Tennessee because schools in this state did not report estimates of student race.

Table 240. Public Schools Using Selected Safety and Security Measures, by School Characteristics: 2000 to 2006

[In percent. For school year ending in year shown. Based on survey of principals or persons knowledgeable about discipline issues at the school. Refers only to those times during normal school hours or when school activities or events were in session. Based on the School Survey on Crime and Safety and subject to sampling error; for details see source]

| Measure | 2000 | 2004 | 2006 |
|--|------|------|------|
| Controlled access during school hours: | | | |
| Buildings (locked or monitored doors) | 74.6 | 83.0 | 84.9 |
| Grounds (locked or monitored gates) | 33.7 | 36.2 | 41.1 |
| Closed the campus for most students during lunch | 64.6 | 66.0 | 66.1 |
| Drug testing: | | | |
| Any students | 4.1 | 5.3 | (NA) |
| Athletes | (NA) | 4.2 | 5.0 |
| Students in extracurricular activities other than athletes | (NA) | 2.6 | 3.4 |
| Any other students | (NA) | (NA) | 3.0 |
| Prohibited all tobacco use on school grounds | 90.1 | 88.8 | 90.3 |
| Required to wear badges or picture IDs: | | | |
| Students | 3.9 | 6.4 | 6.1 |
| Faculty and staff | 25.4 | 48.0 | 47.8 |
| Metal detector checks on students: | | | |
| Random checks ¹ | 7.2 | 5.6 | 4.9 |
| Require to pass through daily | 0.9 | 1.1 | 1.1 |
| Sweeps and technology: | | | |
| Random dog sniffs to check for drugs ¹ | 20.6 | 21.3 | 23.0 |
| Random sweeps for contraband ^{1, 2} | 11.8 | 12.8 | 13.1 |
| Use security cameras to monitor school ¹ | 19.4 | 36.0 | 42.8 |
| Provided telephones in most classrooms | 44.6 | 60.8 | 66.8 |
| Provided two-way radios | (NA) | 71.2 | 70.8 |
| Visitor requirements: | | | |
| Sign-in or check-in | 96.6 | 98.3 | 97.6 |
| Pass through metal detectors | 0.9 | 0.9 | 1.0 |
| Dress code: | | | |
| Required students to wear uniforms | 11.8 | 13.8 | 13.8 |
| Enforced a strict dress code | 47.4 | 55.1 | 55.3 |
| School supplies and equipment: | | | |
| Required clear book bags or banned book bags on school grounds | 5.9 | 6.2 | 6.4 |
| Provided school lockers to students | 46.5 | 49.5 | 50.6 |

NA Not available. ¹ One or more. ² For example, drugs or weapons. Does not include dog sniffs.

Table 245. Teacher Stayers, Movers, and Leavers, by Sector: 1988-89 and 2004-05

[2,386.5 represents 2,386,500. Data compare the teaching status of teacher between one school year and the prior year. Stayers are teachers who were teaching in the same school in both years. Movers are teachers who were still teaching in the current school year but in a different school. Leavers are teachers who left the teaching profession. Based on the School and Staffing Survey; see source for details]

Table 260. Proficiency Levels on Selected NAEP Tests for Students in Public Schools, by State: 2007

[Represents percent of public school students scoring at or above basic and proficient levels. Basic denotes mastery of the knowledge and skills that are fundamental for proficient work at a given grade level. Proficient represents solid academic performance. Students reaching this level demonstrated competency over challenging subject matter. For more detail see <<http://www.nagb.org/pubs/pubs.html>>. Based on the National Assessment of Educational Progress (NAEP) tests which are administered to a representative sample of students in public schools, private schools, and Department of Defense schools. Data shown here are for public school students only]

NA Not available. ¹ Number of institutions includes count of branch campuses. Due to revised survey procedures, data beginning 1990 are not comparable with previous years. Beginning 1996 (2000 for this table), data reflect a new classification of institutions; this classification includes some additional, primarily 2-year, colleges and excludes a few institutions that did not award degrees. Includes institutions that were eligible to participate in Title IV federal financial aid programs. ² Due to revised survey methods, data beginning 1990 not comparable with previous years. ³ Branch campuses counted according to actual status, e.g., 2-year branch in 2-year category. ⁴ Includes unclassified students. (Students taking courses for credit, but are not candidates for degrees.) ⁵ Includes schools accredited by the National Association of Trade and Technical Schools.

Law Enforcement, Courts, and Prisons

This section presents data on crimes committed, victims of crimes, arrests, and data related to criminal violations and the criminal justice system. The major sources of these data are the Bureau of Justice Statistics (BJS), the Federal Bureau of Investigation (FBI), and the Administrative Office of the U.S. Courts. BJS issues many reports—see our Guide to Sources for a complete listing. The Federal Bureau of Investigation's major annual reports are *Crime in the United States*, *Law Enforcement Officers Killed and Assaulted*, annual, and *Hate Crimes*, annual, which present data on reported crimes as gathered from state and local law enforcement agencies.

Legal jurisdiction and law enforcement—Law enforcement is, for the most part, a function of state and local officers and agencies. The U.S. Constitution reserves general police powers to the states. By act of Congress, federal offenses include only offenses against the U.S. government and against or by its employees while engaged in their official duties and offenses which involve the crossing of state lines or an interference with interstate commerce. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: one in each of the 50 states, one in the District of Columbia, and the federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. While the systems of law enforcement are quite similar among the states, there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts: investigation of crimes and arrests of persons suspected of committing them; prosecution of those charged with crime; and the punishment or treatment of persons convicted of crime.

Crime—The U.S. Department of Justice administers two statistical programs to measure the magnitude, nature, and

impact of crime in the nation: the Uniform Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Each of these programs produces valuable information about aspects of the nation's crime problem. Because the UCR and NCVS programs are conducted for different purposes, use different methods, and focus on somewhat different aspects of crime, the information they produce together provides a more comprehensive panorama of the nation's crime problem than either could produce alone.

Uniform Crime Reports (UCR)—The FBI's UCR Program, which began in 1929, collects information on the following crimes reported to law enforcement authorities—Part 1 offenses (detail data reported): murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. For Part 2 offenses, law enforcement agencies report only arrest data for 21 additional crime categories. For UCR definitions of criminal offenses (including those listed), please go to: <www.fbi.gov/ucr/cius2006/about/offense_definitions.html>.

The UCR Program compiles data from monthly law enforcement reports or individual crime incident records transmitted directly to the FBI or to centralized state agencies that then report to the FBI. The Program thoroughly examines each report it receives for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, the Program compares monthly reports to previous submissions of the agency and with those for similar agencies.

The UCR Program presents crime counts for the nation as a whole, as well as for regions, states, counties, cities, towns, tribal law enforcement, and colleges and

universities. This permits studies among neighboring jurisdictions and among those with similar populations and other common characteristics.

The UCR Program annually publishes its findings in a preliminary release in the spring of the following calendar year, followed by a detailed annual report, *Crime in the United States*, issued in the fall. In addition to crime counts and trends, this report includes data on crimes cleared, persons arrested (age, sex, and race), law enforcement personnel (including the number of sworn officers killed or assaulted), and the characteristics of homicides (including age, sex, and race of victims and offenders; victim-offender relationships; weapons used; and circumstances surrounding the homicides). Other periodic reports are also available from the UCR Program.

National Crime Victimization Survey (NCVS)—The 2006 national crime victimization estimates are not comparable to previous years because of changes in methodology. The methodological changes included: a new sample, a change in the method of handling first-time interviews with households, and a change in the method of interviewing. For more information on methodology, go to <<http://www.ojp.usdoj.gov/bjs/abstract/cv06.htm>>.

A second perspective on crime is provided by this survey of the Bureau of Justice Statistics (BJS). The NCVS is an annual data collection (interviews of persons age 12 or older), conducted by the U.S. Census Bureau for the BJS. As an ongoing survey of households, the NCVS measures crimes of violence and theft both reported and not reported to police. It produces national rates and levels of personal and property victimization. No attempt is made to validate the information against police records or any other source.

The NCVS measures rape/sexual assault, robbery, assault, pocket-picking, purse snatching, burglary, and motor vehicle theft. The NCVS includes crimes reported to the police, as well as those not reported.

Murder and kidnapping are not covered. The so-called victimless crimes, such as drunkenness, drug abuse, and prostitution, also are excluded, as are crimes for which it is difficult to identify knowledgeable respondents or to locate data records.

Crimes of which the victim may not be aware also cannot be measured effectively. Buying stolen property may fall into this category, as may some instances of embezzlement. Attempted crimes of many types probably are under recorded for this reason. Events in which the victim has shown a willingness to participate in illegal activity also are excluded.

In any encounter involving a personal crime, more than one criminal act can be committed against an individual. For example, a rape may be associated with a robbery, or a household offense, such as a burglary, can escalate into something more serious in the event of a personal confrontation. In classifying the survey-measured crimes, each criminal incident has been counted only once—by the most serious act that took place during the incident and ranked in accordance with the seriousness classification system used by the FBI. The order of seriousness for crimes against persons is as follows: rape, robbery, assault, and larceny. Personal crimes take precedence over household offenses.

A *victimization*, basic measure of the occurrence of crime, is a specific criminal act as it affects a single victim. The number of victimizations is determined by the number of victims of such acts. Victimization counts serve as key elements in computing rates of victimization. For crimes against persons, the rates are based on the total number of individuals age 12 and over or on a portion of that population sharing a particular characteristic or set of traits. As general indicators of the danger of having been victimized during the reference period, the rates are not sufficiently refined to represent true measures of risk for specific individuals or households.

An *incident* is a specific criminal act involving one or more victims; therefore the number of incidents of personal crimes is lower than that of victimizations.

Courts—Statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole, although data are available for many states individually.

Since 1982, through its National Judicial Reporting Program, the BJS has surveyed a nationally representative sample of 300 counties every 2 years and collected detailed information on demographic characteristics of felons, conviction offenses, type of sentences, sentence lengths, and time from arrest to conviction and sentencing.

The bulk of civil and criminal litigation in the country is commenced and determined in the various state courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the federal courts may civil or criminal litigation be heard and decided by them. Generally, the federal courts have jurisdiction over the following types of cases: suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different states; civil cases involving admiralty, maritime, or private jurisdiction; and all matters in bankruptcy.

There are several types of courts with varying degrees of legal jurisdiction. These jurisdictions include original, appellate, general, and limited or special. A court of original jurisdiction is one having the authority initially to try a case and pass judgment on the law and the facts; a court of appellate jurisdiction is one with the legal authority to review cases and hear appeals; a court of general jurisdiction is a trial court of unlimited original jurisdiction in civil and/or criminal cases, also called a "major trial court"; a court of limited or special jurisdiction is a trial court with legal authority over only a particular class of cases, such as probate, juvenile, or traffic cases.

The 94 federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every state and one each in the

District of Columbia, Puerto Rico, the Virgin Islands, the Northern Mariana Islands, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 13, known as U.S. courts of appeals and the United States Court of Appeals for the Federal Circuit. The Supreme Court of the United States is the final and highest appellate court in the federal system of courts.

Juvenile offenders—For statistical purposes, the FBI and most states classify as juvenile offenders persons under the age of 18 years who have committed a crime or crimes.

Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously "anti-social" conduct. Several types of facilities are available for those adjudicated delinquents, ranging from the short-term physically unrestricted environment to the long-term very restrictive atmosphere.

Prisoners and jail inmates—BJS started to collect annual data in 1979 on prisoners in federal and state prisons and reformatories. Adults convicted of criminal activity may be given a prison or jail sentence. A *prison* is a confinement facility having custodial authority over adults sentenced to confinement of more than 1 year. A *jail* is a facility, usually operated by a local law enforcement agency, holding persons detained pending adjudication and/or persons committed after adjudication to 1 year or less.

Data on inmates in local jails were collected by the BJS for the first time in 1970. Since then, BJS has conducted censuses of facilities and inmates every 5 to 6 years. In 1984, BJS initiated an annual survey of jails conducted in noncensus years.

Statistical reliability—For discussion of statistical collection, estimation and sampling procedures, and measures of statistical reliability pertaining to the National Crime Victimization Survey and Uniform Crime Reporting Program, see Appendix III.

Table 295. Crimes and Crime Rates by Type of Offense: 1980 to 2006

[(1,345 represents 1,345,000). Data include offenses actually reported to law enforcement and also offense estimations for nonreporting and partially reporting agencies within each state. Rates are based on Census Bureau estimated resident population as of July 1; 1980, 1990, and 2000, enumerated as of April 1. See source for details. For definitions of types of crimes, go to <http://www.fbi.gov/ucr/cius2006/about/offense_definitions.html>]

| Wisconsin | 242 | 284 | 3.0 | 20 | 100 | 161 | 2,669 | 2,818 | 486 | 2,080 | 253 |
| Wyoming | 230 | 240 | 1.7 | 27 | 14 | 197 | 3,158 | 2,981 | 451 | 2,379 | 151 |

¹ Includes nonnegligent manslaughter. ² Includes offenses reported by the Zoological Police and the Metro Transit Police. ³ Limited data for 2005 and 2006 were available for Illinois. ⁴ The data collection methodology for the offense of forcible rape used by the Illinois state (with the exception of Rockford, Illinois) and the Minnesota state (2006 data only) Uniform Crime Reporting (UCR) Programs do not comply with national UCR Program guidelines. Consequently, their figures for forcible rape were estimated for inclusion in this table.

¹ The data collection methodology for the offense of forcible rape used by the Illinois (with the exception of Rockford, Illinois) and the Minnesota state UCR Programs does not comply with national UCR Program guidelines. Consequently, their figures for forcible rape and violent crime (of which forcible rape is a part) are not published in this table. ² Because of changes in the state/local agency's reporting practices, figures are not comparable to previous years' data. ³ It was determined that the agency did not follow national Uniform Crime Reporting (UCR) Program guidelines for reporting an offense. Consequently, this figure is not included in this table. ⁴ The population for the city of Mobile, Alabama, includes 56,876 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.

Table 299. Murder Victims—Circumstances and Weapons Used or Cause of Death: 2000 to 2006

[The Uniform Crime Reporting (UCR) Program defines murder and nonnegligent manslaughter as the willful nonnegligent killing of one human being by another. The classification of this offense is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, other judicial body. For more information on murder, go to http://www.fbi.gov/ucr/cius2006/offenses/violent_crime/murder_homicide.html]

¹ Rate is per 100,000 inhabitants.

Source: U.S. Department of Justice, Office of Justice Programs, Bureau of Justice Statistics, *Homicide Trends in the United States, 1976-2005* See also <<http://www.ojp.usdoj.gov/bjs/homicide/homtrnd.htm#contents>>.

Table 302. Homicide Victims by Race and Sex: 1980 to 2005

[Rates per 100,000 resident population in specified group. Excludes deaths to nonresidents of United States. Effective with data for 1999, causes of death are classified by The Tenth Revision International Classification of Diseases (ICD-10), replacing the Ninth Revision (ICD-9) used for 1979-98 data. In ICD-9, the category Homicide also includes death as a result of legal intervention. ICD-10 has two separate categories for these two causes of death. Some caution should be used in comparing data between 1998 and 1999. see text, Section 2]

| Year | Homicide victims | | | | | | Homicide rate ² | | | | | |
|------|--------------------|--------|--------|--------|--------|--------------------|----------------------------|--------|-------|--------|--|--|
| | Total ¹ | White | | Black | | Total ¹ | White | | Black | | | |

Table 310. Hate Crimes—Number of Incidents, Offenses, Victims, and Known Offenders by Bias Motivation: 2000 to 2006

[The FBI collected statistics on hate crimes from 12,620 law enforcement agencies representing over 255 million inhabitants in 2006. Hate crime offenses cover incidents motivated by race, religion, sexual orientation, ethnicity/national origin, and disability]

| Bias motivation | Incidents reported | Offenses | Victims ¹ | Known offenders ² |
|---|--------------------|--------------|----------------------|------------------------------|
| 2000, total | 8,213 | 9,619 | 10,117 | 7,690 |
| 2004, total | 7,679 | 9,065 | 9,561 | 7,175 |
| 2005, total | 7,163 | 8,380 | 8,804 | 6,804 |
| 2006, Total | 7,722 | 9,080 | 9,652 | 7,330 |
| Race, total | 4,000 | 4,737 | 5,020 | 3,957 |
| Anti-White | 890 | 1,008 | 1,054 | 1,074 |
| Anti-Black | 2,640 | 3,136 | 3,332 | 2,437 |
| Anti-American Indian/Alaska native | 60 | 72 | 75 | 72 |
| Anti-Asian/Pacific Islander | 181 | 230 | 239 | 181 |
| Anti-multiracial group | 229 | 291 | 320 | 193 |
| Ethnicity/national origin, total | 984 | 1,233 | 1,305 | 1,209 |
| Anti-Hispanic | 576 | 770 | 819 | 802 |
| Anti-other ethnicity/national origin | 408 | 463 | 486 | 407 |
| Religion, total | 1,462 | 1,597 | 1,750 | 705 |
| Anti-Jewish | 967 | 1,027 | 1,144 | 362 |
| Anti-Catholic | 76 | 81 | 86 | 44 |
| Anti-Protestant | 59 | 62 | 65 | 35 |
| Anti-Islamic | 156 | 191 | 208 | 147 |
| Anti-other religious group | 124 | 140 | 147 | 63 |
| Anti-multi-religious group | 73 | 88 | 92 | 49 |
| Anti-atheism/agnosticism/etc. | 7 | 8 | 8 | 5 |
| Sexual orientation, total | 1,195 | 1,415 | 1,472 | 1,380 |
| Anti-male homosexual | 747 | 881 | 913 | 914 |
| Anti-female homosexual | 163 | 192 | 202 | 154 |
| Anti-homosexual | 238 | 293 | 307 | 268 |
| Anti-heterosexual | 26 | 28 | 29 | 26 |
| Anti-bisexual | 21 | 21 | 21 | 18 |
| Disability, total | 79 | 94 | 95 | 73 |
| Anti-physical | 17 | 20 | 21 | 17 |
| Anti-mental | 62 | 74 | 74 | 56 |
| Multiple bias³ | 2 | 4 | 10 | 6 |

¹ The term "victim" may refer to a person, business, institution, or a society as a whole. ² The term "known offender" does not imply that the identity of the suspect is known, but only that an attribute of the suspect is identified which distinguishes him/her from an unknown offender. ³ In a "multiple-bias incident" two conditions must be met: more than one offense type must occur in the incident and at least two offense types must be motivated by different biases.

Table 314. Suspects Arrested for Federal Offenses and Booked by United States Marshals Service (USMS), by Offense: 1994 to 2004

[Persons suspected of violating federal law may be arrested by any one of the many federal agencies empowered to make arrests, or by state or local authorities. Regardless of which agency makes the arrest, federal suspects are typically transferred to the custody of the U.S. Marshals Service for booking, processing, and detention. See Methodology for a listing of detailed offense categories within each major offense category.]

| Most serious offense | 1994 | 1995 | 1996 | 1997 | 1998 ² | 1999 ^{1,2} | 2000 ² | 2001 ² | 2002 ² | 2003 | 2004 |

¹ Starting in 1999 and through the current year of data, nonviolent sex offenses were reclassified from "Violent offenses" to "Public-order offenses." ² Data for 1998 through 2002 are not directly comparable to 2003 and 2004 because of changes in the data-processing methodology. See note 2 on page 24, chapter 1 of the 2004 Compendium of Federal Justice Statistics. ³ Includes suspects whose offense category could not be determined. ⁴ In this table, "Violent offenses" may include nonnegligent manslaughter. ⁵ Fraudulent property excludes tax fraud. ⁶ Excludes fraudulent property and includes destruction of property and trespassing. ⁷ Beginning in 2001, "Weapon" and "Immigration" offenses became major offense categories. Previously, these offenses were classified within "Public-order offenses."

| Methamphetamine | (NA) | (NA) | 7,107 | 6,229 | 8,564 | 8,194 | 10,748 | 9,229 | 8,330 |

NA Not available. ¹ Arrests are for Drug Enforcement Administration only. ² Includes other drug-related arrests not shown. ³ Reflects the combined drug seizure effort of the Drug Enforcement Administration, the Federal Bureau of Investigation, the U.S. Customs Service, and, beginning October 1995, the U.S. Border Patrol within the jurisdiction of the United States as well as maritime seizures by the U.S. Coast Guard. Based on reports to the federal-wide Drug Seizure System, which eliminates duplicate reporting of a seizure involving more than one federal agency. ⁴ Includes other drug seizures not shown.

Source: U.S. Drug Enforcement Administration, unpublished data from federal-wide Drug Seizure System. (Data are as of 15 May 2008.)

Table 318. Background Checks for Firearm Transfers: 1994 to 2007

[In thousands (87,180 represents 87,180,000); except rates]

| Inquiries and rejections | Total 1994-2007 ¹ | Interim period 1994-1998 ² | Permanent Brady ³ | | | | | | | |
|-------------------------------------|------------------------------|---------------------------------------|------------------------------|-------|-------|-------|-------|-------|-------|-------|
| | | | 1998 ⁴ | 2000 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 |
| Applications and rejections: | | | | | | | | | | |
| Applications received | 87,180 | 12,740 | 893 | 7,699 | 7,806 | 7,831 | 8,084 | 8,278 | 8,612 | 8,658 |
| Applications rejected | 1,631 | 312 | 20 | 153 | 136 | 126 | 126 | 132 | 134 | 136 |
| Rejection rate | 1.9 | 2.4 | 2.2 | 2.0 | 1.7 | 1.6 | 1.6 | 1.6 | 1.6 | 1.6 |

¹ Number of applications and estimates of denials for firearm transfers or permits since the inception of the Brady Act, 1994-2007. ² Background checks on applicants were conducted by state and local agencies, mainly on handgun transfers. See "Presale Handgun Checks, the Brady Interim Period, 1994-98" (NCJ 175034). ³ The period beginning November 30, 1998, is the effective date for the Brady Handgun Violence Prevention Act, P.L. 103-159, 1993. The National Instant Criminal Background Check System (NICS) began operations. Checks on handgun and long gun transfers are conducted by the Federal Bureau of Investigation (FBI), and by state and local agencies. Totals combine Firearm Inquiry Statistics (FIST) estimates for state and local agencies with transactions and denials reported by the FBI. ⁴ For the period of November 30 to December 31, 1998. Counts are from the NICS operations report and may include multiple transactions for the same application.

Table 327. Delinquency Cases Disposed by Juvenile Courts by Reason for Referral: 1990 to 2005

[In thousands (1,346 represents 1,346,000), except rate. A delinquency offense is an act committed by a juvenile for which an adult could be prosecuted in a criminal court. Disposition of a case involves taking a definite action such as waiving the case to criminal court, dismissing the case, placing the youth on probation, placing the youth in a facility for delinquents, or such actions as fines, restitution, and community service. Data have been revised through 2004]

| Reason for referral | 1990 | 1995 | 1997 | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 | 2004 | 2005 |

Table 329. Child Abuse and Neglect Cases Substantiated and Indicated—Victim Characteristics: 1990 to 2006

[Based on reports alleging child abuse and neglect that were referred for investigation by the respective child protective services agency in each state. The reporting period may be either calendar or fiscal year. The majority of States provided duplicated counts. Also, varying number of states reported the various characteristics presented below. A substantiated case represents a type of investigation disposition that determines that there is sufficient evidence under state law to conclude that maltreatment occurred or that the child is at risk of maltreatment. An indicated case represents a type of disposition that concludes that there was a reason to suspect maltreatment had occurred]

| Item | 1990 | | 2000 | | 2005 ¹ | | 2006 | |
|--|----------------|--------------|----------------|--------------|-------------------|--------------|----------------|---------------|

- Rounds to zero. NA Not available. X Not applicable. ¹ U.S. total includes federal prisoners not distributed by state. This total includes all inmates held in public and private adult correctional facilities. ² Data include both total jail and prison population. Prisons and jails form one integrated system. ³ Numbers are for custody rather than jurisdiction counts. ⁴ The transfer of responsibility for sentenced felons from the District of Columbia to the federal system was completed by the year end 2001. ⁵ The District of Columbia inmates sentenced to more than 1 year are now under the responsibility of the Bureau of Prisons.

¹ Total does not include offenders who were supervised outside of jail facilities. ² Race/Hispanic origin data do not include the two or more race data. ³ Beginning 1995, rated capacity subject to sampling error. ⁴ Rated capacity is the number of beds or inmates assigned by a rating official to facilities within each jurisdiction. ⁵ Juveniles are persons held under the age of 18. Includes juveniles who were tried or awaiting trial as adults. ⁶ Includes American Indians, Alaska Natives, Asians, and Pacific Islanders.

Geography and Environment

This section presents a variety of information on the physical environment of the United States, starting with basic area measurement data and ending with climatic data for selected weather stations around the country. The subjects covered between those points are mostly concerned with environmental trends but include related subjects such as land use, water consumption, air pollutant emissions, toxic releases, oil spills, hazardous waste sites, municipal waste and recycling, threatened and endangered wildlife, and the environmental industry.

The information in this section is selected from a wide range of federal agencies that compile the data for various administrative or regulatory purposes, such as the Environmental Protection Agency (EPA), U.S. Geological Survey (USGS), National Oceanic and Atmospheric Administration (NOAA), Natural Resources Conservation Service (NRCS), and National Atlas[®] of the United States. New information on border lengths with Canada and Mexico, coastlines, lakes, and shorelines may be found in Tables 350–352.

Area—For the 2000 census, area measurements were calculated by computer based on the information contained in a single, consistent geographic database, the Topologically Integrated Geographic Encoding & Referencing system (TIGER[®]) database, rather than relying on historical, local, and manually calculated information. Information from the 2000 census may be found in Table 344.

Geography—The USGS conducts investigations, surveys, and research in the fields of geography, geology, topography, geographic information systems, mineralogy, hydrology, and geothermal energy resources as well as natural hazards. The USGS provides United States cartographic data through the Earth Sciences Information Center, water resources data through the *Water Resources of the United States* at <<http://water.usgs.gov/pubs/>>.

In a joint project with the U.S. Census Bureau, during the 1980s, the USGS provided the basic information on geographic features for input into a national geographic and cartographic database prepared by the Census Bureau, called TIGER[®] database. Since then, using a variety of sources, the Census Bureau has updated these features and their related attributes (names, descriptions, etc.) and inserted current information on the boundaries, names, and codes of legal and statistical geographic entities; very few of these updates added aerial water features. Maps prepared by the Census Bureau using the TIGER[®] database show the names and boundaries of entities and are available on a current basis.

An inventory of the nation's land resources by type of use/cover was conducted by the National Resources Inventory Conservation Services (NRCS) every 5 years beginning in 1977 through 1997. Beginning with the release of the 2001 estimates, this program shifted to become an annual release of land use data. The most recent survey results, which were published for the year 2003, covered all nonfederal land for the contiguous 48 states. Tables 350 to 352 provide results from the survey.

Environment—The principal federal agency responsible for pollution abatement and control activities is the Environmental Protection Agency (EPA). It is responsible for establishing and monitoring national air quality standards, water quality activities, solid and hazardous waste disposal, and control of toxic substances. Many of these series now appear in the Envirofacts portion of the EPA Web site at <<http://www.epa.gov/enviro/>>.

The Clean Air Act, which was last amended in 1990, requires the EPA to set National Ambient Air Quality Standards (NAAQS) (CFR part 50) for pollutants considered harmful to public health and the environment. The EPA Office of Air Quality

Planning and Standards (OAQPS) has set National Ambient Air Quality Standards for six principal pollutants, which are called "criteria" pollutants. These pollutants are: Carbon Monoxide, Lead, Nitrogen Dioxide, Particulate Matter (PM_{2.5} and ₁₀), Ozone, and Sulfur Dioxide. NAAQS are periodically reviewed and revised to include any additional or new health or welfare data. Table 357 gives some of the health-related standards for the six air pollutants having NAAQS. Data gathered from state networks are periodically submitted to EPA's National Aerometric Information Retrieval System (AIRS) for summarization in annual reports on the nationwide status and trends in air quality. For details, see "Air Trends" on the EPA Web site at <<http://www.epa.gov/airtrends/index.html>>.

The Toxics Release Inventory (TRI), published by the EPA, is a valuable source of information on nearly 650 chemicals that are being used, manufactured, treated, transported, or released into the environment. Sections 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and 6607 of the Pollution Prevention Act (PPA), mandate that a publicly-accessible toxic chemical database be developed and maintained by EPA. This database, known as the TRI, contains information concerning waste management activities and the release of toxic chemicals by facilities that manufacture, process, or otherwise use said materials. Data on the release of these chemicals are collected from over 23,000 facilities and facilities added in 1998 that have the equivalent of 10 or more full-time employees and meet the established

thresholds for manufacturing, processing, or "other use" of listed chemicals. Facilities must report their releases and other waste management quantities. Since 1994 federal facilities have been required to report their data regardless of industry classification. In May 1997, EPA added seven new industry sectors that reported to the TRI for the first time in July 1999 for the 1998 reporting year. More current information on this program can be found at <<http://www.epa.gov/tri/index.htm>>.

Climate—NOAA, through the National Weather Service and the National Environmental Satellite, Data, and Information Service, is responsible for climate data. NOAA maintains about 11,600 weather stations, of which over 3,000 produce autographic precipitation records, about 600 take hourly readings of a series of weather elements, and the remainder record data once a day. These data are reported monthly in the Climatological Data and Storm Data, published monthly and annually in the Local Climatological Data (published by location for major cities).

The normal climatological temperatures, precipitation, and degree days listed in this publication are derived for comparative purposes and are averages for the 30-year period, 1971–2000. For stations that did not have continuous records for the entire 30 years from the same instrument site, the normals have been adjusted to provide representative values for the current location. The information in all other tables is based on data from the beginning of the record at that location through 2006.

Table 344. Land and Water Area of States and Other Entities: 2000

[One square mile = 2.59 square kilometers. Area is calculated from the specific boundary recorded for each entity in the U.S. Census Bureau's geographic TIGER[®] database]

| State and other areas | Total area | | Land area | | Water area | | | | | |

Table 345. U.S.–Canada and U.S.–Mexico Border Lengths

[For 2006, there were more than 67 million passenger trips between the United States and Canada, and more than 228 million between the United States and Mexico. See Table 1243 for more passenger trip detail. Only those states with international borders are included in the table below. For more information on the National Atlas of the United States, please see <<http://nationalatlas.gov/partners.html>>]

| State | Length of international border (statute miles) ¹ | State | Length of international border (statute miles) ¹ |
|-----------------------------------|---|-----------------------------------|---|
| United States–Canada total | 5,525 | Ohio | 146 |
| Alaska | 1,585 | Pennsylvania | 42 |
| Idaho | 45 | Vermont | 90 |
| Maine | 611 | Washington | 427 |
| Michigan | 721 | | |
| Minnesota | 547 | United States–Mexico total | 1,933 |
| Montana | 545 | Arizona | 373 |
| New Hampshire | 58 | California | 140 |
| New York | 445 | New Mexico | 180 |
| North Dakota | 310 | Texas | 1,241 |

¹ Statute mile equals one mile.

Table 346. Coastline and Shoreline of the United States by State

[In statute miles. Each statute mile equals one mile. The term **coastline** is used to describe the general outline of the seacoast. For the table below, United States coastline measurements were made from small-scale maps, and the coastline was generalized. The coastlines of large sounds and bays were included. Measurements were made in 1948. **Shoreline** is the term used to describe a more detailed measure of the seacoast. The tidal shoreline figures in the table below were obtained in 1939–1940 from the largest-scale charts and maps then available. Shoreline of the outer coast, offshore islands, sounds, and bays were included, as well as the tidal portion of rivers and creeks. Only states with a coastline or shoreline are included in the following table. For more information on the National Atlas of the United States, please see <<http://nationalatlas.gov/partners.html>>]

| State | General coastline | Tidal shoreline | State | General coastline | Tidal shoreline |
|----------------------|-------------------|-----------------|----------------|-------------------|-----------------|
| United States | 12,383 | 88,633 | Mississippi | 44 | 359 |
| Alabama | 53 | 607 | New Hampshire | 13 | 131 |
| Alaska | 6,640 | 33,904 | New Jersey | 130 | 1,792 |
| California | 840 | 3,427 | New York | 127 | 1,850 |
| Connecticut | – | 618 | North Carolina | 301 | 3,375 |

¹ From source to mouth. ² Drainage area includes both the United States and Canada. ³ The length from the source of the Missouri River to the Mississippi River and thence to the Gulf of Mexico is about 3,710 miles. ⁴ Includes about 167,000 cubic ft. per second diverted from the Mississippi into the Atchafalaya River but excludes the flow of the Red River. ⁵ Excludes the drainage areas of the Red and Atchafalaya Rivers. ⁶ In east-central Louisiana, the Red River flows into the Atchafalaya River, a distributary of the Mississippi River. Data on average discharge, length, and drainage area include the Red River, but exclude all water diverted into the Atchafalaya from the Mississippi River. ⁷ Less than 15,000 cubic feet per second.

Table 353. U.S. Wetland Resources and Deepwater Habitats by Type: 1998 to 2004

[In thousands of acres (148,618.8 represents 148,618,800). Wetlands and deepwater habitats are defined separately because the term wetland does not include permanent water bodies. Deepwater habitats are permanently flooded land lying below the deepwater boundary of wetlands. Deepwater habitats include environments where surface water is permanent and often deep, so that water, rather than air, is the principal medium within which the dominant organisms live, whether or not they are attached to the substrate. As in wetlands, the dominant plants are hydrophytes; however, the substrates are considered nonsoil because the water is too deep to support emergent vegetation. In general terms, wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plant and animal communities living in the soil and on its surface. The single feature that most wetlands share is soil or substrate that is at least periodically saturated with or covered by water. Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water. For more information on wetlands, see the "Classification of Wetlands and Deepwater Habitats of the United States" at <http://www.fws.gov/nwi/Pubs_Reports/Class_Manual/class_titlepg.htm>]

| Wetland or deepwater category | Estimated area, 1998 | Estimated area, 2004 | Change, 1998 to 2004 |
|---|----------------------|----------------------|----------------------|
| All wetlands and deepwater habitats, total | 148,618.8 | 149,058.5 | 439.7 |
| All deepwater habitats, total | 41,046.6 | 41,304.5 | 247.9 |
| Lacustrine ¹ | 16,610.5 | 16,773.4 | 162.9 |
| Riverine ² | 6,765.5 | 6,813.3 | 47.7 |
| Estuarine Subtidal ³ | 17,680.5 | 17,717.8 | 37.3 |
| All wetlands, total | 107,562.3 | 107,754.0 | 191.8 |
| Intertidal wetlands ⁴ | 5,328.7 | 5,300.3 | -28.4 |
| Marine intertidal | 130.4 | 128.6 | -1.9 |
| Estuarine intertidal nonvegetated | 594.1 | 600.0 | 5.9 |
| Estuarine intertidal vegetated | 4,604.2 | 4,571.7 | -32.4 |
| Freshwater wetlands | 102,233.6 | 102,453.8 | 220.2 |
| Freshwater nonvegetated | 5,918.7 | 6,633.9 | 715.3 |
| Freshwater vegetated ⁵ | 96,414.9 | 95,819.8 | -495.1 |
| Freshwater emergent ⁶ | 26,289.6 | 26,147.0 | -142.6 |
| Freshwater forested ⁶ | 51,483.1 | 52,031.4 | 548.2 |
| Freshwater shrub ⁷ | 18,542.2 | 17,641.4 | -900.8 |

¹ The lacustrine system includes deepwater habitats with all of the following characteristics: (1) situated in a topographic depression or a dammed river channel; (2) lacking trees, shrubs, persistent emergents, emergent mosses or lichens with greater than 30 percent coverage; (3) total area exceeds 20 acres (8 hectares). ² The riverine system includes deepwater habitats contained within a channel, with the exception of habitats with water containing ocean derived salts in excess of 0.5 parts per thousand. ³ The estuarine system consists of deepwater tidal habitats and adjacent tidal wetlands that are usually semi-enclosed by land but have open, partly obstructed, or sporadic access to the open ocean, and in which ocean water is at least occasionally diluted by freshwater runoff from the land. Subtidal is where the substrate is continuously submerged by marine or estuarine waters. ⁴ Intertidal is where the substrate is exposed and flooded by tides. Intertidal includes the splash zone of coastal waters. ⁵ Emergent wetlands are characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants. ⁶ Forested wetlands are characterized by woody vegetation that is 20 feet tall or taller. ⁷ Shrub wetlands include areas dominated by woody vegetation less than 20 feet tall. The species include true shrubs, young trees, and trees or shrubs that are small or stunted because of environmental conditions.

Table 357. National Ambient Air Pollutant Concentrations by Type of Pollutant: 1990 to 2006

[Data represent annual composite averages of pollutant based on daily 24-hour averages of monitoring stations, except carbon monoxide, which is based on the second-highest, nonoverlapping, 8-hour average; ozone, the fourth-highest maximum 8-hour value; and lead, the maximum quarterly average of ambient lead levels. Based on data from the Air Quality System. $\mu\text{g}/\text{m}^3$ = micrograms of pollutant per cubic meter of air; ppm = parts per million]

| Pollutant | Unit | Monitoring stations, number | Air quality standard ¹ | 1990 | 1995 | 2000 | 2003 | 2004 | 2005 | 2006 |
|----------------------------|--------------------------|-----------------------------|-----------------------------------|-----------------|--------|--------|----------------|--------|--------|--------|
| | | | | Carbon monoxide | ppm | 243 | ² 9 | 6.0 | 4.8 | 3.5 |
| Ozone | ppm | 588 | ³ 0.075 | 0.085 | 0.088 | 0.080 | 0.080 | 0.073 | 0.078 | 0.077 |
| Sulfur dioxide | ppm | 295 | ⁴ 0.03 | 0.0081 | 0.0055 | 0.0049 | 0.0043 | 0.0041 | 0.0042 | 0.0038 |
| Particulates (PM-10) | $\mu\text{g}/\text{m}^3$ | 391 | ⁵ 150 | 79.1 | 66.4 | 60.8 | 59.5 | 52.3 | 55.8 | 55.3 |
| Fine particulates (PM-2.5) | $\mu\text{g}/\text{m}^3$ | 752 | ⁶ 15 | (NA) | (NA) | 13.5 | 12.2 | 11.8 | 12.8 | 11.6 |
| Nitrogen dioxide | ppm | 170 | ⁷ 0.053 | 0.020 | 0.019 | 0.017 | 0.016 | 0.015 | 0.015 | 0.014 |
| Lead | $\mu\text{g}/\text{m}^3$ | 44 | ⁸ 1.5 | 0.13 | 0.07 | 0.07 | 0.06 | 0.06 | 0.08 | 0.06 |

NA Not available. ¹ Refers to the primary National Ambient Air Quality Standard. ² Based on 8-hour standard of 9 ppm. ³ Based on annual standard of 0.03 ppm. ⁴ Based on 8-hour standard of 0.075 ppm. On March 12, 2008, EPA revised the level of the primary and secondary 8-hour ozone standards to 0.075 ppm. ⁵ Based on 24-hour (daily) standard of 150 $\mu\text{g}/\text{m}^3$. The particulates (PM-10) standard replaced the previous standard for total suspended particulates in 1987. In 2006, EPA revoked the annual PM-10 standard. ⁶ Based on annual standard of 15 $\mu\text{g}/\text{m}^3$. The PM-2.5 national monitoring network was deployed in 1999. National trend data prior to that time is not available. ⁷ Based on annual standard of 0.053 ppm. ⁸ Based on 3-month standard of 1.5 $\mu\text{g}/\text{m}^3$.

Table 371. Major U.S. Weather Disasters: 2001 to 2007

[5 represents \$5,000,000,000. Covers only weather-related disasters costing \$1 billion or more]

| Event | Description | Time period | Estimated cost ¹ (bil. dol.) | Deaths |
|--|---|---------------------|---|------------------|
| Great Plains and eastern drought | Severe drought with periods of extreme heat resulting in major reductions in crop yields, along with very low stream flows, and lake levels. | Entire year 2007 | 5 | (²) |
| Western wildfires | Continued drought conditions and high winds over much of the western U.S., resulting in numerous wildfires. | Summer-Fall 2007 | Over 1 | 12 |
| Spring freeze | Widespread severe freeze over much of the east and Midwest causing losses in fruit crops, field crops, and in the ornamental industry. | Apr. 2007 | 2 | - |
| Severe storms and tornadoes | Flooding, hail, tornadoes, and severe thunderstorms across numerous eastern and southern states. | Apr. 2007 | 1.5 | 9 |
| Freeze | Widespread agricultural freeze over a good portion of California, destroying numerous agricultural crops. | Jan. 2007 | 1.4 | 1 |
| Widespread drought | Rather severe drought affected crops in states especially during the spring-summer, centered over the Great Plains region, with other areas affected across portions of the south and far west. | Spring-Summer 2006 | Over 6 | (²) |
| Severe storms and tornadoes | Outbreak of tornadoes over portions of the Midwest and south during a week-long period. | March 2006 | Over 1 | 10+ |
| Numerous wildfires | Wildfires mainly over the western half of the country, due to dry weather and high wind burning nearly 10 million acres (new record for period since 1960). | Entire year 2006 | Over 1 | 28+ |
| Hurricane Wilma | Category 3 hurricane makes landfall in southwest Florida, causing considerable damage from major flooding and strong winds in south-east Florida. | Oct. 2005 | Over 10 | 35 |
| Hurricane Rita | Category 3 hurricane makes landfall on the Texas-Louisiana border coastal region, causing surge/wind damage along the coast and flood damage in FL, MS, LA, AR, and TX. | Sept. 2005 | Over 8 | 119 |
| Hurricane Katrina | Category 3 hurricane makes landfall as a category 1 near Miami, FL, and on the LA, MS coast, causing massive damage in addition to flood and wind damage in AL, FL, TN, KY, OH, and GA. | Aug. 2005 | Over 100 | 1,300+ |
| Hurricane Dennis | Category 3 hurricane makes landfall in western Florida causing wind and surge damage, also causing wind and flood damage to GA, MS, and TN. | July 2005 | Over 2 | 12+ |
| Midwest drought | Midwest drought causing crop losses in AR, IL, IN, MO, OH, and WI. | Spring-summer 2005 | Over 1.0 | - |
| Hurricane Jeanne | Category 3 hurricane makes landfall in east-central Florida, causing considerable damage in Florida and some flood damage in GA, SC, NC, VA, MD, DE, NJ, PA, and NY. | Sept. 2004 | Over 6.9 | 28 |
| Hurricane Ivan | Category 3 hurricane makes landfall on Gulf coast of Alabama causing significant damage in AL and FL and wind/flood damage in GA, SC, NC, LA, MS, WV, MD, TN, KY, OH, DE, NJ, PA, and NY. | Sept. 2004 | Over 14 | 57 |
| Hurricane Frances | Category 2 hurricane makes landfall in east-central Florida causing significant damage in FL and considerable flood damage in GA, SC, NC, and NY. | Sept. 2004 | Over 9 | 48 |
| Hurricane Charley | Category 4 hurricane makes landfall in southwest FL resulting in major damage in FL and some damage in SC and NC. | Aug. 2004 | 15 | 34 |
| Southern California wildfires | Dry weather, high winds, and resulting wildfires in southern CA burned 743,000 acres and destroyed 3,700 homes. | Oct.-Nov. 2003 | 2.5 | 22 |
| Hurricane Isabel | Category 2 hurricane makes landfall in eastern NC, causing damage along coasts of NC, VA, and MD with wind damage and flooding in NC, VA, MD, DE, WV, NJ, NY, and PA. | Sept. 2003 | 5 | 55 |
| Midwest severe storms and tornadoes | Numerous tornadoes over the Midwest. MS River valley, and OH/TN River valleys with record 400 tornadoes in one week. | May 2003 | Over 3.4 | 51 |
| Storms and hail | Severe storms and large hail over southern plains, lower MS River valley, and TX. | April 2003 | Over 1.6 | 3 |
| Widespread drought | Moderate to extreme drought over large portions of 30 states. | Spring to fall 2002 | Over 10 | - |
| Western fire season | Major fires over 11 western states from Rockies to west coast. | Spring to fall 2002 | Over 2.0 | 21 |
| Tropical Storm Allison | Tropical storm produced rainfall and severe flooding in coastal portions of TX and LA and damage in MS, FL, VA, and PA. | June 2001 | 5.0 | 43 |
| Midwest and Ohio Valley hail and tornadoes | Storms, tornadoes, and hail in TX, OK, KS, NE, IA, MO, IL, IN, WI, MI, OH, KY, and PA. | April 2001 | Over 1.9 | 3 |

- Represents zero. ¹ Represents actual dollar costs at the time of event and is not adjusted for inflation. ² Some deaths reported due to heat but not beyond typical annual averages. Section 7

Elections

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on congressional legislation; state legislatures; Black, Hispanic, and female officeholders; population of voting age; voter participation; and campaign finances.

Official statistics on federal elections, collected by the Clerk of the House, are published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Federal and state elections data appear also in *America Votes*, a biennial volume published by CQ Press (a division of Congressional Quarterly, Inc.), Washington, DC. Federal elections data also appear in the U.S. Congress, *Congressional Directory*, and in official state documents. Data on reported registration and voting for social and economic groups are obtained by the U.S. Census Bureau as part of the Current Population Survey (CPS) and are published in Current Population Reports, Series P20 (see text, Section 1).

Almost all federal, state, and local governmental units in the United States conduct elections for political offices and other purposes. The conduct of elections is regulated by state laws or, in some cities and counties, by local charter. An exception is that the U.S. Constitution prescribes the basis of representation in Congress and the manner of electing the president and grants to Congress the right to regulate the times, places, and manner of electing federal officers. Amendments to the Constitution have prescribed national criteria for voting eligibility. The 15th Amendment, adopted in 1870, gave all citizens the right to vote regardless of race, color, or previous condition of servitude. The 19th Amendment, adopted in 1919, further extended the right to vote to all citizens regardless of sex. The payment of poll taxes as a prerequisite to voting in federal elections was banned by the 24th Amendment in

1964. In 1971, as a result of the 26th Amendment, eligibility to vote in national elections was extended to all citizens, 18 years old and over.

Presidential election—The Constitution specifies how the president and vice president are selected. Each state elects, by popular vote, a group of electors equal in number to its total of members of Congress. The 23d Amendment, adopted in 1961, grants the District of Columbia three presidential electors, a number equal to that of the least populous state. Subsequent to the election, the electors meet in their respective states to vote for president and vice president. Usually, each elector votes for the candidate receiving the most popular votes in his or her state. A majority vote of all electors is necessary to elect the president and vice president. If no candidate receives a majority, the House of Representatives, with each state having one vote, is empowered to elect the president and vice president, again, with a majority of votes required.

The 22nd Amendment to the Constitution, adopted in 1951, limits presidential tenure to two elective terms of 4 years each or to one elective term for any person who, upon succession to the presidency, has held the office or acted as President for more than 2 years.

Congressional election—The Constitution provides that representatives be apportioned among the states according to their population, that a census of population be taken every 10 years as a basis for apportionment, and that each state have at least one representative. At the time of each apportionment, Congress decides what the total number of representatives will be. Since 1912, the total has been 435, except during 1960 to 1962 when it increased to 437, adding one representative each for Alaska and Hawaii. The total reverted to 435 after

reapportionment following the 1960 census. Members are elected for 2-year terms, all terms covering the same period. The District of Columbia, American Samoa, Guam, and the Virgin Islands each elect one nonvoting delegate, and Puerto Rico elects a nonvoting resident commissioner.

The Senate is composed of 100 members, two from each state, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the state legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that senators be elected by popular vote.

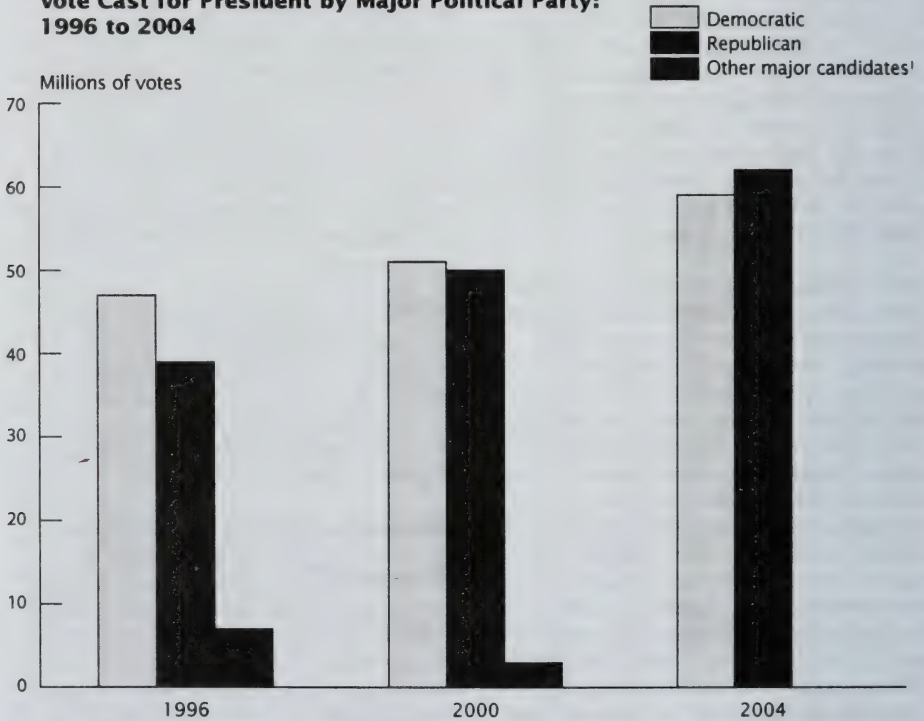

Voter eligibility and participation—

The Census Bureau publishes estimates of the population of voting age and the

percent casting votes in each state for presidential and congressional election years. These voting-age estimates include a number of persons who meet the age requirement but are not eligible to vote, (e.g. aliens and some institutionalized persons). In addition, since 1964, voter participation and voter characteristics data have been collected during November of election years as part of the CPS. These survey data include noncitizens in the voting age population estimates, but exclude members of the Armed Forces and the institutional population.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Figure 7.1
**Vote Cast for President by Major Political Party:
1996 to 2004**

¹Candidates with 1 million or more votes: 1996—Reform, Ross Perot;
2000—Green, Ralph Nader.

Table 386. Vote Cast for United States Representatives by Major Political Party—States: 2002 to 2006

[In thousands (74,707 represents 74,707,000), except percent. R = Republican, D = Democrat, and I = Independent. In each state, totals represent the sum of votes cast in each Congressional District or votes cast for Representative-at-Large in states where only one member is elected. In all years there are numerous districts within the state where either the Republican or Democratic party had no candidate. In some states the Republican and Democratic vote includes votes cast for the party candidate by endorsing parties]

X Not applicable. ¹ No candidate. ² According to state law, it is not required to tabulate votes for unopposed candidates. ³ Louisiana holds an open-primary election with candidates from all parties running on the same ballot. Any candidate who receives a majority is elected; if no candidate receives 50 percent, there is a run-off election in November between the top two finishers. ⁴ On June 28, 2006, the U.S. Supreme Court declared that the Texas legislature's redistricting plan violated the Voting Rights Act. As a result, on August 4, 2006, replacement district boundaries were announced for the 2006 election for the 15th, 21st, 23rd, 25th, and 28th districts. On election day in November, these five redrawn districts held a special election, pursuant to section 204.021 of the Texas Election Code. If any candidate received over 50%, they were elected. Otherwise, a run-off election in December would decide the seat. ⁵ A special election was held to fill the unexpired term of Tom DeLay. Don Richardson (7,405 votes) and Shelley Sekula Gibbs (76,924 votes) ran as Republicans in the special election and as write-in candidates in the general election for the 22nd District. Sekula Gibbs won the special election and was sworn in November 13, 2006, representing the district for the few remaining weeks of the 109th Congress. Lampson won the general election and was sworn in on January 4, 2007. ⁶ Reflects votes cast in the general election. ⁷ Reflects votes cast in the run-off election held on December 12, 2006.

Table 396. Political Party Control of State Legislatures by Party: 1983 to 2008

[As of beginning of year. Nebraska has a nonpartisan legislature]

| Year | Legislatures under— | | | Year | Legislatures under— | | | Year | Legislatures under— | | |
|-----------------------------|----------------------------|----------------------------|---------------------------------|----------------|----------------------------|----------------------------|---------------------------------|----------------|----------------------------|----------------------------|---------------------------------|
| | Democ- ratic control | Split control or tie | Re- publi- can control | | Democ- ratic control | Split control or tie | Re- publi- can control | | Democ- ratic control | Split control or tie | Re- publi- can control |
| 1983 ¹ | 34 | 4 | 11 | 1984 | 24 | 17 | 8 | 2002 | 17 | 15 | 17 |
| 1985 | 27 | 11 | 11 | 1985 | 18 | 12 | 19 | 2003 | 16 | 12 | 21 |
| 1987 | 28 | 12 | 9 | 1986 | 16 | 15 | 18 | 2004 | 17 | 11 | 21 |
| 1989 | 28 | 13 | 8 | 1987 | 20 | 11 | 18 | 2005 | 19 | 10 | 20 |
| 1990 | 29 | 11 | 9 | 1988 | 20 | 12 | 17 | 2006 | 19 | 10 | 20 |
| 1992 | 29 | 14 | 6 | 2000 | 16 | 15 | 18 | 2007 | 22 | 12 | 15 |
| 1993 | 25 | 16 | 8 | 2001 | 16 | 15 | 18 | 2008 | 23 | 14 | 12 |

¹ Two 1984 midterm recall elections resulted in a change in control of the Michigan State Senate. At the time of the 1984 election, therefore, Democrats controlled 33 legislatures. ² A party change during the year by a Democratic representative broke the tie in the Indiana House of Representatives, giving the Republicans control of both chambers.

State and Local Government Finances and Employment

This section presents data on revenues, expenditures, debt, and employment of state and local governments. Nationwide statistics relating to state and local governments, their numbers, finances, and employment are compiled primarily by the U.S. Census Bureau through a program of censuses and surveys. Every fifth year (for years ending in "2" and "7"), the Census Bureau conducts a census of governments involving collection of data for all governmental units in the United States. In addition, the Census Bureau conducts annual surveys which cover all the state governments and a sample of local governments.

Annually, the Census Bureau releases information on the Internet which presents financial data for the federal government, nationwide totals for state and local governments, and state-local data by states. Also released annually is a series on state, city, county, and school finances and on state and local public employment. There is also a series of quarterly data releases covering tax revenue and finances of major public employee retirement systems.

Basic information for Census Bureau statistics on governments is obtained by mail canvass from state and local officials; however, financial data for each of the state governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel. In over two-thirds of the states, all or part of local government financial data are obtained through central collection arrangements with state governments. Financial data on the federal government are primarily based on the *Budget* published by the Office of Management and Budget (see text, Section 9, Federal Government Finances and Employment).

Governmental units—The governmental structure of the United States includes, in addition to the federal government and

the states, thousands of local governments—counties, municipalities, townships, school districts, and many "special districts." In 2007, 89,527 local governments were identified by the census of governments (see Tables 410–412). As defined by the census, governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which states, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, state institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances—The financial statistics relate to government fiscal years ending June 30 or at some date within the 12 previous months. The following governments are exceptions and are included as though they were part of the June 30 group; ending September 30, the state governments of Alabama and Michigan, the District of Columbia, and Alabama school districts; and ending August 31, the state governments of Nebraska, Texas, and Chicago school districts. New York State ends its fiscal year on March 31. The federal government ended the fiscal year June 30 until 1976 when its fiscal year, by an act of Congress, was revised to extend from Oct. 1 to Sept. 30. A 3-month quarter (July 1 to Sept. 30, 1976) bridged the transition.

Nationwide government finance statistics have been classified and presented in

terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure utilized by individual governments.

Statistics on governmental finances distinguish among general government, utilities, liquor stores, and insurance trusts. *General government* comprises all activities except utilities, liquor stores, and insurance trusts. Utilities include government water supply, electric light and power, gas supply, and transit systems. Liquor stores are operated by 17 states and by local governments in 6 states. Insurance trusts relate to employee retirement, unemployment compensation, and other social insurance systems administered by the federal, state, and local governments.

Data for cities or counties relate only to municipal or county and their dependent agencies and do not include amounts for other local governments in the same geographic location. Therefore, expenditure figures for "education" do not include spending by the separate school districts which administer public schools within most municipal or county areas. Variations in the assignment of governmental responsibility for public assistance, health, hospitals, public housing, and other functions to a lesser degree also

have an important effect upon reported amounts of city or county expenditure, revenue, and debt.

Employment and payrolls—These data are based mainly on mail canvassing of state and local governments. Payroll includes all salaries, wages, and individual fee payments for the month specified, and employment relates to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (unless otherwise specified) part-time as well as full-time personnel. Effective with the 1997 Census of Governments, the reference period for measuring government employment was changed from October of the calendar year to March of the calendar year. As a result, there was no annual survey of government employment covering the October 1996 period. The prior reference month of October was used from 1958 to 1995. Figures shown for individual governments cover major dependent agencies such as institutions of higher education, as well as the basic central departments and agencies of the government.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Table 410. Number of Governmental Units by Type: 1962 to 2007

| Type of government | 1962 | 1967 | 1972 | 1977 | 1982 | 1987 | 1992 | 1997 | 2002 | 2007 |

Table 411. Number of Local Governments by Type—States: 2002

[Governments in existence in January. Limited to governments actually in existence. Excludes, therefore, a few counties and numerous townships and "incorporated places" existing as areas for which statistics can be presented as to population and other subjects, but lacking any separate organized county, township, or municipal government. See Appendix III]

| State | All governmental units ¹ | | | | | | Special district ² | | | |
|--------------------------------|-------------------------------------|--------------|---------------|-----------------------|-----------------|--------------------|-------------------------------|-----------------|---------------------------------|--|
| | | County | Municipal | Township ¹ | School district | Total ³ | Natural resources | Fire protection | Housing & community development | |

Table 426. State Resources, Expenditures, and Balances: 2006 and 2007

[In millions of dollars (1,340,034 represents \$1,340,034,000,000). For fiscal year ending in year shown; see text; this section. **General funds** exclude special funds earmarked for particular purposes, such as highway trust funds and federal funds; they support most on-going broad-based state services and are available for appropriation to support any governmental activity.

Table 430. Residential Property Tax Rates for Largest City in Each State: 2006

[The real property tax is a function of housing values, real estate tax rates, assessment levels, homeowner exemptions and credits. Effective rate is the amount each jurisdiction considers based upon assessment level used. Assessment level is ratio of assessed value to assumed market value. Nominal rates represent the "announced" rates levied by the jurisdiction]

| City | Effective tax rate per \$100 | | Assessment level (percent) | Nominal rate per \$100 | City | Effective tax rate per \$100 | | Assessment level (percent) | Nominal rate per \$100 |
|--------------------|------------------------------|------|----------------------------|------------------------|--------------------|------------------------------|------|----------------------------|------------------------|
| | Rank | Rate | | | | Rank | Rate | | |

¹ Player scratches a latex section on ticket which reveals instantly whether ticket is a winner. ² Players choose and bet on three or four digits, depending on game, with various payoffs for different straight order or mixed combination bets. ³ Players typically select six digits out of a large field of numbers. Varying prizes are offered for matching three through six numbers drawn by lottery. ⁴ Includes break-open tickets, spiel, keno, video lottery, etc. ⁵ Sales minus prizes and expenses equal net government income.

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the federal government. The fiscal data cover taxes, other receipts, outlays, and debt. The principal sources of fiscal data are the *Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the U.S. Department of the Treasury's *United States Government Annual Report* and its *Appendix*. Detailed data on tax returns and collections are published annually by the Internal Revenue Service. The personnel data relate to staffing and payrolls. They are published by the Office of Personnel Management and the Bureau of Labor Statistics. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual "Federal Real Property Report."

Budget concept—Under the unified budget concept, all federal monies are included in one comprehensive budget. These monies comprise both federal funds and trust funds. Federal funds are derived mainly from taxes and borrowing and are not restricted by law to any specific government purpose. Trust funds, such as the Unemployment Trust Fund, collect certain taxes and other receipts for use in carrying out specific purposes or programs in accordance with the terms of the trust agreement or statute. Fund balances include both cash balances with the Treasury and investments in U.S. securities. Part of the balance is obligated, part unobligated. Prior to 1985, the budget totals, under provisions of law, excluded some federal activities—including the Federal Financing Bank, the Postal Service, the Synthetic Fuels Corporation, and the lending activities of the Rural Electrification Administration. The Balanced Budget and Emergency Deficit Control Act of 1985 (P.L. 99-177) repealed the off-budget status of these entities and placed social security (federal old-age and survivors

insurance and the federal disability insurance trust funds) off-budget. Though social security is now off-budget and, by law, excluded from coverage of the congressional budget resolutions, it continues to be a federal program.

Receipts arising from the government's sovereign powers are reported as governmental receipts; all other receipts; i.e., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued (net) basis (i.e., outlays are recorded at the time the checks to pay bills are issued).

Debt concept—For most of U.S. history, the total debt consisted of debt borrowed by the Treasury (i.e., public debt). The present debt series includes both public debt and agency debt. The *gross federal debt* includes money borrowed by the Treasury and by various federal agencies; it is the broadest generally used measure of the federal debt. *Total public debt* is covered by a statutory debt limitation and includes only borrowing by the Treasury.

Treasury receipts and outlays—All receipts of the government, with a few exceptions, are deposited to the credit of the U.S. Treasury regardless of ultimate disposition. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the federal government clearing through the accounts of the U.S. Treasury are reported in the *Daily Treasury Statement*. Extensive detail on the public debt is published in the *Monthly Statement of the Public Debt of the United States*.

Budget receipts such as taxes, customs duties, and miscellaneous receipts, which are collected by government agencies, and outlays represented by checks issued and cash payments made by disbursing officers as well as government agencies

are reported in the *Daily Treasury Statement of Receipts and Outlays of the United States Government* and in the Treasury's *United States Government Annual Report* and its *Appendix*. These deposits in and payments from accounts maintained by government agencies are on the same basis as the unified budget.

The quarterly *Treasury Bulletin* contains data on fiscal operations and related Treasury activities, including financial statements of government corporations and other business-type activities.

Income tax returns and tax collections—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The annual *Internal Revenue Service Data Book* gives a detailed account of tax collections by kind of tax. The agency's annual *Statistics of Income* reports present detailed data from individual income tax returns and corporation income tax returns. The quarterly *Statistics of Income Bulletin* presents data on such diverse subjects as tax-exempt organizations, unincorporated businesses, fiduciary income tax and estate tax returns, sales of capital assets by individuals, international income and taxes reported by corporations and individuals, and estate tax wealth.

Employment and payrolls—The Office of Personnel Management collects employment and payroll data from all departments and agencies of the federal

government, except the Central Intelligence Agency, the National Security Agency, and the Defense Intelligence Agency. Employment figures represent the number of persons who occupied civilian positions at the end of the report month shown and who are paid for personal services rendered for the federal government, regardless of the nature of appointment or method of payment. Federal payrolls include all payments for personal services rendered during the report month and payments for accumulated annual leave of employees who separate from the service. Since most federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap.

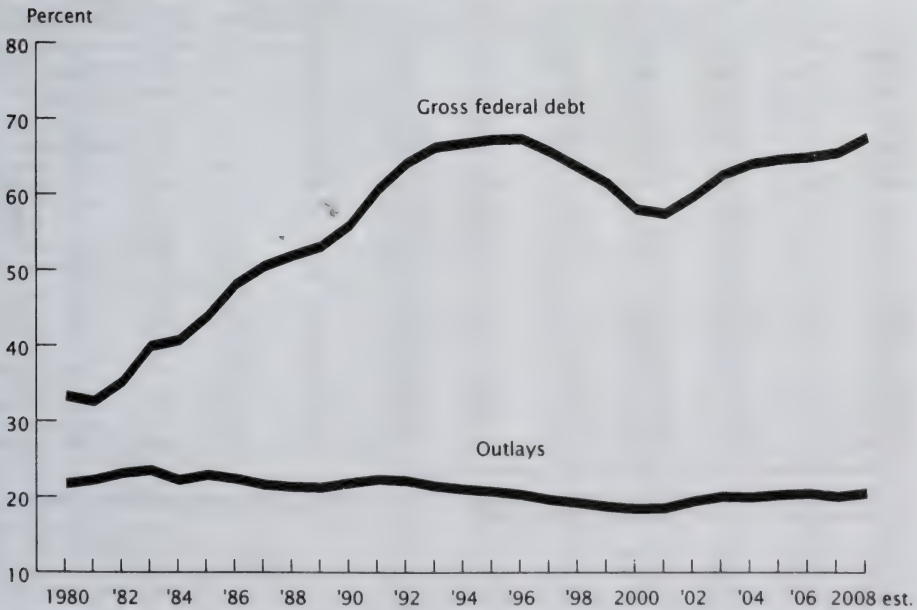

Federal employment and payroll figures are published by the Office of Personnel Management in its *Federal Civilian Workforce Statistics—Employment and Trends*. It also publishes biennial employment data for minority groups, data on occupations of white- and blue-collar workers, and data on employment by geographic area; reports on salary and wage distribution of federal employees are published annually. General schedule is primarily white-collar; wage system primarily blue-collar. Data on federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings* and by the U.S. Census Bureau in its annual publication *Public Employment*.

Figure 9.1
Federal Budget Summary: 1980 to 2008

Receipts, outlays, and surplus or deficit
 Trillions of constant (2000) dollars

Outlays and federal debt as a percent of gross domestic product (GDP)

Source: Charts prepared by U.S. Census Bureau. For data, see Table 451 & 452.

Table 451. Federal Budget—Receipts and Outlays: 1960 to 2008

[92.5 represents \$92,500,000,000]. For fiscal years ending in year shown; see text, Section 8. See also headnote, Table 453]

Table 453. Federal Budget Outlays by Type: 1990 to 2008

[1,253.1 represents \$1,253,100,000,000. For years ending September 30. Given the inherent imprecision in deflating outlays, the data shown in constant dollars present a reasonable perspective—not precision. The deflators and the categories that are deflated are as comparable over time as feasible. Minus sign (-) indicates offset]

Table 459. Tax Expenditures Estimates Relating to Individual and Corporate Income Taxes by Selected Function: 2007 to 2010

[in millions of dollars (3,220 represents \$3,220,000,000). For years ending September 30. Tax expenditures are defined as revenue losses attributable to provisions of the federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of liability]

| Function and provision | 2007 | 2008 | 2009 | 2010 |
|---|---------|---------|---------|---------|
| National Defense: | | | | |
| Exclusion of benefits and allowances to armed forces personnel | 3,220 | 3,350 | 3,480 | 3,620 |
| International affairs: | | | | |
| Exclusion of income earned abroad by U.S. citizens | 2,630 | 2,760 | 2,900 | 3,050 |
| Extraterritorial income exclusion | 4,400 | 1,630 | - | - |
| Deferral of income from controlled foreign corporations (normal tax method) | 12,490 | 13,120 | 13,780 | 14,480 |
| Deferred taxes for financial firms on certain income earned overseas | 2,370 | 2,490 | 1,060 | - |
| General science, space, and technology: | | | | |
| Expensing of research and experimentation expenditures (normal tax method) | 5,190 | 4,720 | 4,990 | 4,470 |
| Credit for increasing research activities | 10,320 | 4,660 | 2,100 | 920 |
| Energy: | | | | |
| Alternative fuel production credit | 2,920 | 1,310 | 70 | 80 |
| Commerce and housing: | | | | |
| Financial institutions and insurance: | | | | |
| Exclusion of interest on life insurance savings | 19,910 | 21,840 | 23,500 | 25,200 |
| Housing: | | | | |
| Deductibility of mortgage interest on owner-occupied homes | 84,850 | 94,790 | 100,810 | 107,020 |
| Deductibility of state and local property tax on owner-occupied homes | 19,120 | 16,360 | 16,640 | 16,820 |
| Capital gains exclusion on home sales | 31,480 | 33,050 | 34,710 | 36,440 |
| Exclusion of net imputed rental income | 3,890 | 5,440 | 7,550 | 10,478 |
| Exception from passive loss rules for \$25,000 of rental loss | 7,840 | 8,430 | 8,840 | 9,160 |
| Credit for low-income housing investments | 5,030 | 5,380 | 5,780 | 6,180 |
| Accelerated depreciation on rental housing (normal tax method) | 9,860 | 10,780 | 11,760 | 12,720 |
| Commerce: | | | | |
| Capital gains (except agriculture, timber, iron ore, and coal) | 53,230 | 55,540 | 55,940 | 59,170 |
| Step-up basis of capital gains at death | 32,600 | 35,900 | 36,750 | 37,950 |
| Accelerated depreciation of machinery and equipment (normal tax method) | 26,410 | 35,180 | 44,120 | 49,760 |
| Expensing of certain small investments (normal tax method) | 3,660 | 3,660 | 3,400 | 500 |
| Graduated corporation income tax rate (normal tax method) | 5,400 | 5,220 | 5,290 | 5,510 |
| Deduction for U.S. production activities | 9,800 | 14,020 | 15,330 | 21,110 |
| Transportation: | | | | |
| Exclusion of reimbursed employee parking expenses | 2,830 | 2,950 | 3,070 | 3,200 |
| Education, training, employment, and social services: | | | | |
| Education: | | | | |
| HOPE tax credit | 3,370 | 3,380 | 3,640 | 3,750 |
| Lifetime Learning tax credit | 2,210 | 2,220 | 2,340 | 2,420 |
| Exclusion of interest on bonds for private nonprofit educational facilities | 1,750 | 1,870 | 1,930 | 1,980 |
| Parental personal exemption for students age 19 years or over | 2,690 | 1,880 | 1,760 | 1,710 |
| Deductibility of charitable contributions (education) | 4,330 | 4,880 | 5,270 | 5,670 |
| Training, employment, and social services: | | | | |
| Child credit | 30,910 | 30,160 | 29,950 | 29,870 |
| Credit for child and dependent care expenses | 2,780 | 1,810 | 1,720 | 1,650 |
| Deductibility of charitable contributions, other than education and health | 38,200 | 43,370 | 46,980 | 50,550 |
| Health: | | | | |
| Exclusion of employer contributions for medical insurance premiums ¹ | 133,790 | 151,810 | 168,460 | 185,250 |
| Self-employed medical insurance premiums | 4,260 | 4,680 | 5,170 | 5,710 |
| Deductibility of medical expenses | 4,470 | 5,060 | 5,920 | 6,800 |
| Exclusion of interest on hospital construction bonds | 2,760 | 2,950 | 3,040 | 3,120 |
| Deductibility of charitable contributions (health) | 4,310 | 4,890 | 5,300 | 5,700 |
| Income security: | | | | |
| Exclusion of workers' compensation benefits | 5,740 | 5,830 | 5,920 | 6,010 |

X Not applicable. ¹ Constant dollars were calculated using the U.S. Bureau of Labor Statistics consumer price index for urban consumers (CPI-U, 1982-84 = 100). See Table 703. ² Capital gain distributions are included in net capital gain (less loss). For 1988-1996, and 1999 and later years, capital gain distributions from mutual funds are the sum of the amounts reported on the Form 1040 and Schedule D. For 1997 and 1998, capital gain distributions were reported entirely on the Schedule D.

Table 469. Federal Individual Income Tax Returns—Sources of Net Losses Included in Adjusted Gross Income: 2003 to 2005

[4,973 represents 4,973,000. For tax years. Based on a sample of returns, see source and Appendix III]

| Item | 2003 | | 2004 | | 2005 | |
|---|---------------------------|--------------------|---------------------------|--------------------|---------------------------|--------------------|
| | Number of returns (1,000) | Amount (mil. dol.) | Number of returns (1,000) | Amount (mil. dol.) | Number of returns (1,000) | Amount (mil. dol.) |
| Total net losses | (NA) | 279,243 | (NA) | 303,458 | (NA) | 319,587 |
| Business or profession net loss | 4,973 | 38,927 | 5,194 | 43,007 | 5,308 | 45,016 |
| Net capital loss ¹ | 12,808 | 28,952 | 11,513 | 25,492 | 10,023 | 22,137 |
| Net loss, sales of property other than capital assets | 955 | 8,469 | 892 | 7,971 | 877 | 9,180 |
| Total rental and royalty net loss | ² 4,242 | 33,453 | 4,380 | 38,466 | 4,554 | 43,988 |
| Partnership and S corporation net loss | 2,553 | 78,972 | 2,498 | 82,697 | 2,539 | 89,694 |
| Estate and trust net loss | 33 | 1,084 | 36 | 1,436 | 36 | 1,654 |
| Farm net loss | 1,405 | 19,844 | 1,416 | 20,610 | 1,371 | 20,653 |
| Net operating loss ³ | 712 | 62,825 | 830 | 75,012 | 863 | 79,452 |
| Other net loss ⁴ | 290 | 6,718 | 359 | 8,768 | 346 | 7,811 |

NA Not available. ¹ Includes only the portion of capital losses allowable in the calculation of adjusted gross income. Only \$3,000 of net capital loss per return (\$1,500 for married filing separately) are allowed to be included in negative total income. Any excess is carried forward to future years. ² Includes farm rental net loss. ³ Net operating loss is a carryover of the loss from a business when taxable income from a prior year was less than zero. ⁴ Other net loss represents losses reported on Form 1040, line 21, except net operating loss and the foreign-earned income exclusion.

Table 471. Federal Individual Income Tax Returns—Selected Itemized Deductions and the Standard Deduction: 2004 and 2005

[46,335 represents 46,335,000. For tax years. Based on a sample of returns, see source and Appendix III. Minus sign (-) indicates decrease]

| Item | 2004 | | 2005 | | Percent change, 2004-05 | |
|---|--|--------------------|--|--------------------|--------------------------------|-------------|
| | Number of returns ¹ (1,000) | Amount (mil. dol.) | Number of returns ¹ (1,000) | Amount (mil. dol.) | Number of returns ¹ | Amount |
| | | | | | | |
| Total itemized deductions before limitation | 46,335 | 1,035,000 | 47,755 | 1,167,135 | 3.1 | 12.8 |
| Medical and dental expenses after 7.5 percent AGI limitation | 9,531 | 61,503 | 9,917 | 67,354 | 4.1 | 9.5 |
| Taxes paid ² | 46,009 | 362,609 | 47,353 | 400,390 | 2.9 | 10.4 |
| State and local income taxes | 33,516 | 202,306 | 34,570 | 227,581 | 3.1 | 12.5 |
| State and local general sales taxes | 11,249 | 17,527 | 11,423 | 17,271 | 1.6 | -1.5 |
| Interest paid ³ | 38,110 | 356,356 | 39,016 | 405,718 | 2.4 | 13.9 |
| Home mortgage interest | 37,692 | 340,476 | 38,575 | 383,733 | 2.3 | 12.7 |
| Charitable contributions | 40,623 | 165,564 | 41,381 | 183,391 | 1.9 | 10.8 |
| Other than cash contributions | 25,267 | 43,373 | 25,371 | 48,057 | 0.4 | 10.8 |
| Casualty and theft losses | 185 | 3,510 | 814 | 14,984 | 339.4 | 326.9 |
| Miscellaneous deductions after 2 percent AGI limitation | 12,025 | 68,533 | 12,407 | 76,183 | 3.2 | 11.2 |
| Total unlimited miscellaneous deductions | 1,457 | 16,925 | 1,522 | 19,114 | 4.4 | 12.9 |
| Itemized deductions in excess of limitation | 5,724 | 36,762 | 6,323 | 45,324 | 10.5 | 23.3 |
| Total itemized deductions after limitation | 46,335 | 998,238 | 47,755 | 1,121,811 | 3.1 | 12.4 |
| Total standard deduction | 84,017 | 560,933 | 84,841 | 580,748 | 1.0 | 3.5 |
| Total deductions (after itemized deduction limitation) | 130,352 | 1,559,171 | 132,597 | 1,702,559 | 1.7 | 9.2 |

¹ Returns with no adjusted gross income are excluded from the deduction counts. For this reason, the sum of the number of returns with total itemized deductions and the number of returns with total standard deduction is less than the total number of returns for all filers. ² Includes real estate taxes, personal property taxes, and other taxes not shown separately. ³ Includes investment interest and deductible mortgage "points" not shown separately.

Table 476. Federal Individual Income Tax—Tax Liability and Effective and Marginal Tax Rates for Selected Income Groups: 2000 to 2007

[Refers to income after exclusions but before deductions for itemized or standard deductions and for personal exemptions. Tax liability is after reductions for tax credits. As a result of the tax credits, tax liability can be negative, which means that the taxpayer receives a payment from the government. The effective rate represents tax liability, which may be negative as a result of the tax credits, divided by stated income. The marginal tax rate is the percentage of the first additional dollar of income which would be paid in income tax. Tax credits which increase with income can result in negative marginal tax rates. Computations assume itemized deductions (in excess of floors) of 18 percent of adjusted gross income or the standard deduction, whichever is greater. All income is assumed to be from wages and salaries. Does not include social security and Medicare taxes imposed on most wages and salaries]

Section 10

National Security and Veterans Affairs

This section displays data for national security (national defense and homeland security) and benefits for veterans. Data are presented on national defense and its human and financial costs; active and reserve military personnel; and federally sponsored programs and benefits for veterans, and funding, budget and selected agencies for homeland security. The principal sources of these data are the annual *Selected Manpower Statistics* and the *Atlas/Data Abstract for the United States and Selected Areas* issued by the Office of the Secretary of Defense; *Annual Report of Secretary of Veterans Affairs*, U.S. Department of Veterans Affairs (VA), *Budget in Brief*, U.S. Department of Homeland Security; and *The Budget of the United States Government*, Office of Management and Budget. For more data on expenditures and personnel, see Section 30.

Department of Defense (DoD)—The U.S. Department of Defense is responsible for providing the military forces of the United States. It includes the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Army, the Navy, the Air Force, and the defense agencies. The President serves as Commander-in-Chief of the Armed Forces; from him, the authority flows to the Secretary of Defense and through the Joint Chiefs of Staff to the commanders of unified and specified commands (e.g., U.S. Strategic Command).

Reserve components—The Reserve Components of the Armed Forces consist of the Army National Guard of the United States, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. They provide trained personnel and units available for active duty in the Armed Forces during times of war or national emergency, and at such other times as national security may require. The National Guard has dual federal/state responsibilities and uses jointly provided equipment, facilities, and budget support. The President is empowered to mobilize

the National Guard and to use such of the Armed Forces as he considers necessary to enforce federal authority in any state. There is in each Armed Force a ready reserve, a standby reserve, and a retired reserve. The Ready Reserve includes the Selected Reserve, which provides trained and ready units and individuals to augment the active forces during times of war or national emergency, or at other times when required; and the Individual Ready Reserve, which is a manpower pool that can be called to active duty during times of war or national emergency and would normally be used as individual fillers for active, guard, and reserve units, and as a source of combat replacements. Most of the Ready Reserve serves in an active status. See Table 499 for Standby Reserve and Retired Reserve detail.

Department of Veterans Affairs (VA)—A veteran is someone 18 years and older (there are a few 17-year-old veterans) who is not currently on active duty, but who once served on active duty in the United States Army, Navy, Air Force, Marine Corps, or Coast Guard, or who served in the Merchant Marine during World War II. There are many groups whose active service makes them veterans including: those who incurred a service-connected disability during active duty for training in the Reserves or National Guard, even though that service would not otherwise have counted for veteran status; members of a national guard or reserve component who have been ordered to active duty by order of the President or who have a full-time military job. The latter are called AGRs (Active Guard and Reserve). No one who has received a dishonorable discharge is a veteran.

The VA administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the beneficiaries of deceased members. Veterans' benefits available under various acts of Congress include compensation for

service-connected disability or death; pensions for non-service-connected disability or death; vocational rehabilitation, education and training; home loan insurance; life insurance; health care; special housing and automobiles or other conveyances for certain disabled veterans; burial and plot allowances; and educational assistance to families of deceased or totally disabled veterans, servicemen missing in action, or prisoners of war. Since these benefits are legislated by Congress, the dates they were enacted and the dates they apply to veterans may be different from the actual dates the conflicts occurred. VA estimates of veterans cover all persons discharged from active U.S. military service under conditions other than dishonorable.

Homeland Security—In an effort to increase homeland security following the September 11, 2001, terrorist attacks on the United States, President George W. Bush issued the *National Strategy for Homeland Security* in July 2002 and signed legislation creating the Department of Homeland Security (DHS) in November 2002.

The *National Strategy* sets forth a plan to improve homeland security through 43 initiatives that fall within six critical mission areas. These mission areas are intelligence and warning, border and transportation security, domestic counterterrorism, protection of critical infrastructure, defense against catastrophic terrorism, and emergency preparedness and response.

The funding and activities of homeland security are not only carried out by DHS, but also by other federal agencies, state, and local entities. In addition to DHS, there are 32 other federal agencies that comprise federal homeland security funding. DHS, along with four other agencies—Department of Defense (DoD), Energy (DoE), Health and Human Services (HHS), and Justice (DoJ)—account for most of the federal spending for homeland security.

Department of Homeland Security (DHS)—The mission of DHS is to lead a unified effort to secure the United States. This effort is to prevent and deter terrorist attacks and to protect against and respond to threats and hazards to the

nation. This effort is to ensure safe and secure borders, to welcome lawful immigrants and visitors, and to promote the free flow of commerce.

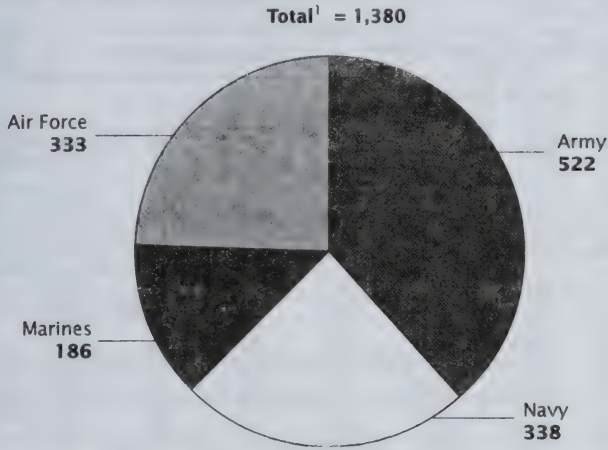

The creation of DHS, which began operations in March 2003, represents a fusion of 22 federal agencies (legacy agencies) to coordinate and centralize the leadership of many homeland security activities under a single department. Out of these agencies, the Secret Service and Coast Guard remain intact and report directly to the Secretary. Immigration and Naturalization Services (INS) adjudications and benefits programs report directly to the Deputy Secretary as the U.S. Citizenship and Immigration Services (USCIS).

The Customs and Border Protection (CBP) is responsible for managing, securing, and controlling U.S. borders. This includes carrying out traditional border-related responsibilities, such as stemming the tide of illegal drugs and illegal aliens; securing and facilitating legitimate global trade and travel; and protecting the food supply and agriculture industry from pests and disease. CBP is composed of the Border Patrol and Inspections (both moved from INS) along with Customs (absorbed from the U.S. Department of Treasury) and Animal and Plant Health Inspections Services (absorbed from the U.S. Department of Agriculture).

Immigration and Customs Enforcement (ICE) is the largest investigation arm of DHS. ICE is composed of four law enforcement divisions: Investigations, Intelligence, Federal Protective Service, and Apprehension, Detention, and Removal. ICE investigates a wide range of national security, financial and smuggling violations including drug smuggling, human trafficking, illegal arms exports, financial crimes, commercial fraud, human smuggling, document fraud, money laundering, child pornography/exploitation, and immigration fraud.

The Transportation Security Administration (TSA) was created as part of the Aviation and Transportation Security Act on November 19, 2001. TSA was originally part of the U.S. Department of Transportation, but was moved to DHS. TSA's mission is to provide security to our nation's transportation systems with a primary focus on aviation security.

Table 490. Department of Defense Payroll and Contract Awards—States: 2006

[In millions of dollars (146,858 represents \$146,858,000,000); For year ending September 30. Payroll outlays include the gross earnings of civilian and active duty military personnel, reserve and National Guard, and retired military for services rendered to the government and for cash allowances for benefits. Excludes employer's share of employee benefits, accrued military retirement benefits and most permanent change of station costs. Contracts, refer to awards made in year specified; expenditures relating to awards may extend over several years. Military awards for supplies, services, and construction. Net value of contracts of over \$25,000 for work in each state and DC. Figures reflect impact of prime contracting on state distribution of defense work. Often the state in which a prime contractor is located in is not the state where the subcontracted work is done. Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded]

Table 492. Military and Civilian Personnel in Installations: 2006

[As of September 30. Civilian personnel includes United States citizens and foreign national direct-hire civilians subject to Office of Management and Budget (OMB) ceiling controls and civilian personnel involved in civil functions in the United States. Excludes indirect-hire civilians and those direct-hire civilians not subject to OMB ceiling controls. Military personnel include active duty personnel based ashore or afloat, excludes personnel temporarily shore-based in a transient status]

| State | Active military personnel | | | | Reserve and National Guard, total | Civilian personnel | | | |
|--------------------------------|---------------------------|----------------|---------------------------------|----------------|-----------------------------------|--------------------|----------------|--------------------|----------------|

Table 497. Military Retirement System: 2007

[Payment in millions of dollars (3,430 represents \$3,430,000,000). As of September 30. The data published in this report are produced from the files maintained by the Defense Manpower Data Center (DMDC). This report compiles data primarily from the "Retiree Pay and Survivor Pay" files. Any grouping of members by address reflects mailing, not necessarily residence address. Only those members in plans administered by the Department of Defense (DoD) are included in this table. The data are preliminary because of reporting delays due to the information about many members who retired or died within one month of the September 30 reporting date. These data were not processed in time to be included in this report. For more information, please see *Introduction and Overview* at <<http://www.defenselink.mil/actuary/statbook2007.pdf>>]

¹ Represents military personnel (officers and enlisted) receiving and not receiving pay from DoD. ² A disabled military member is entitled to disability retired pay if the member has at least 20 years of service or the disability is at least 30 percent (under a standard schedule of rating disabilities by the Veterans Administration) and either (a) the member has at least eight years of service; (b) the disability results from active duty; or (c) the disability occurred in the line of duty during a time of war or national emergency or certain other time periods. Please see report for more details. ³ Includes states, U.S. territories, and retirees living in foreign countries.

Table 499. Military Reserve Personnel: 1995 to 2007

[As of September 30. The Ready Reserve (Coast Guard Reserve data are included) includes the Selected Reserve which is scheduled to augment active forces during times of war or national emergency, and the Individual Ready Reserve, which, during times of war or national emergency, would be used to fill out Active, Guard, and Reserve units, and which would also be a source for casualty replacements; Ready Reservists serve in an active status (except for the Inactive National Guard—a very small pool within the Army National Guard). The Standby Reserve cannot be called to active duty, other than for training, unless authorized by Congress under "full mobilization," and a determination is made that there are not enough qualified members in the Ready Reserve in the required categories who are readily available. The Retired Reserve represents a lower potential for involuntary mobilization]

Table 507. Homeland Security Funding by Agency: 2006 to 2008

[In millions of dollars (54,639.4 represents \$54,639,400,000). For year ending September 30. A total of 32 agencies comprise federal homeland security funding for 2008. U.S. Department of Homeland Security (DHS) is the designated department to coordinate and centralize the leadership of many homeland security activities under a single department. In addition to DHS, the U.S. Departments of Defense (DoD), Energy (DoE), Health and Human Services (HHS), Justice (DoJ), and State Department account for most of the total government-wide homeland security funding]

| Agency | 2006 ¹ | 2007 | 2008 |
|--|-------------------|-----------------|-----------------|
| Total budget authority, excluding BioShield ^{2, 3} | 54,639.4 | 56,925.9 | 61,808.4 |

NA Not available. ¹ FY 06 reflects the adjustments made for the Coast Guard (DHS) and reestimates for DoD. ² The federal spending estimates are for the Executive Branch's homeland security efforts. These estimates do not include the efforts of the Legislative or Judicial Branches. ³ The U.S. Department of Homeland Security Appropriations Act, 2004, provided \$5.6 billion for Project BioShield, to remain available through 2013. Including this uneven funding stream can distort year-over-year comparisons. ⁴ Not all activities carried out by DHS constitute homeland security funding (e.g. response to natural disasters and Coast Guard search and rescue activities), DHS estimates in this table do not represent the entire DHS budget.

Table 514. Principal Immigration-Related Activities of Immigration and Customs Enforcement (ICE) Investigations: 2006

[Data refer to criminal cases only; administrative cases are not included due to changes in reporting]

| Activities | Criminal arrests | Criminal indictments | Criminal convictions | Number of seizures | Value of seizures (dollars) |
|--|------------------|----------------------|----------------------|--------------------|-----------------------------|
| Total, all immigration-related categories | 8,778 | 6,514 | 6,872 | 3,755 | 33,861,911 |
| Financial investigations ¹ | 27 | 16 | 14 | 60 | 3,996,732 |
| Human smuggling and trafficking investigations ² | 2,154 | 1,585 | 1,596 | 1,609 | 11,046,622 |
| General and criminal alien investigations ³ | 4,589 | 3,434 | 3,689 | 532 | 4,804,781 |
| Identity and benefit fraud (IBF) investigations ⁴ | 1,272 | 1,032 | 1,073 | 1,281 | 12,230,727 |
| Compliance and worksite enforcement ⁵ | 20 | 6 | 7 | 12 | 602 |
| Worksite enforcement | 716 | 441 | 493 | 261 | 1,782,447 |

¹ Financial investigations refer to cases developed to counteract organizations involved in money laundering and related financial crimes. ² Human smuggling and trafficking investigations refer to cases targeted against persons or organizations that bring, transport, harbor, or smuggle illegal aliens into or within the United States. ³ General investigations refer to general investigative activities, including those targeting aliens who attempt illegal reentry, have absconded, or commit other crimes in the United States. Criminal alien investigations focus on large-scale organizations engaged in ongoing criminal activity. ⁴ Identity and benefit fraud investigations seek to penetrate fraud schemes that are used to violate immigration and related laws, or used to shield the true status of illegal aliens in order to obtain entitlement benefits from federal, state, or local agencies. ⁵ The compliance enforcement program focuses on preventing foreign nationals from exploiting the nation's immigration system by developing cases for investigation from Department of Homeland Security systems containing information on the status of students and other nonimmigrants. The worksite enforcement program focuses on monitoring and inspecting work sites to apprehend unauthorized alien workers and to provide for penalties and fines against employers who knowingly hire, recruit, or refer aliens for employment for a fee.

¹ Returns are the confirmed movement of an inadmissible or deportable alien out of the United States not based on an order of removal. Most of the voluntary departures are of Mexican nationals who have been apprehended by the U.S. Border Patrol and are returned to Mexico. ² Removals are the compulsory and confirmed movement of an inadmissible or deportable alien out of the United States based on an order of removal. An alien who is removed has administrative or criminal consequences placed on subsequent reentry owing to the fact of the removal. ³ Refers to persons removed based on a criminal charge or those with a criminal conviction.

Social Insurance and Human Services

This section presents data related to governmental expenditures for social insurance and human services; governmental programs for old-age, survivors, disability, and health insurance (OASDHI); governmental employee retirement; private pension plans; government unemployment and temporary disability insurance; federal supplemental security income payments and aid to the needy; child and other welfare services; and federal food programs. Also included here are selected data on workers' compensation and vocational rehabilitation, child support, child care, charity contributions, and philanthropic trusts and foundations.

The principal source for these data is the Social Security Administration's *Annual Statistical Supplement to the Social Security Bulletin* which presents current data on many of the programs.

Social insurance under the Social Security Act—Programs established by the Social Security Act provide protection against wage loss resulting from retirement, prolonged disability, death, or unemployment, and protection against the cost of medical care during old age and disability. The federal OASDI program provides monthly benefits to retired or disabled insured workers and their dependents and to survivors of insured workers. To be eligible, a worker must have had a specified period of employment in which OASDI taxes were paid. The age of eligibility for full retirement benefits had been 65 years old for many years. However, for persons born in 1938 or later that age gradually increases until it reaches age 67 for those born after 1959. Reduced benefits may be obtained as early as age 62. The worker's spouse is under the same limitations. Survivor benefits are payable to dependents of deceased insured workers. Disability benefits are payable to an insured worker under full retirement age with a prolonged disability and to the disabled worker's dependents on the same basis as

dependents of retired workers. Disability benefits are provided at age 50 to the disabled widow or widower of a deceased worker who was fully insured at the time of death. Disabled children, aged 18 or older, of retired, disabled, or deceased workers are also eligible for benefits. A lump-sum benefit is generally payable on the death of an insured worker to a spouse or minor children. For information on the Medicare program, see Section 3, Health and Nutrition.

Retirement, survivors, disability, and hospital insurance benefits are funded by a payroll tax on annual earnings (up to a maximum of earnings set by law) of workers, employers, and the self-employed. The maximum taxable earnings are adjusted annually to reflect increasing wage levels (see Table 525). Effective January 1994, there is no dollar limit on wages and self-employment income subject to the hospital insurance tax. Tax receipts and benefit payments are administered through federal trust funds. Special benefits for uninsured persons; hospital benefits for persons aged 65 and over with specified amounts of social security coverage less than that required for cash benefit eligibility; and that part of the cost of supplementary medical insurance not financed by contributions from participants are financed from federal general revenues.

Unemployment insurance is presently administered by the U.S. Employment and Training Administration and each state's employment security agency. By agreement with the U.S. Secretary of Labor, state agencies also administer unemployment compensation for eligible ex-military personnel and federal employees. Under state unemployment insurance laws, benefits related to the individual's past earnings are paid to unemployed eligible workers. State laws vary concerning the length of time benefits are paid and their amount. In most states, benefits are payable for 26 weeks and, during periods

of high unemployment, extended benefits are payable under a federal-state program to those who have exhausted their regular state benefits. Some states also supplement the basic benefit with allowances for dependents.

Unemployment insurance is funded by a federal unemployment tax levied on the taxable payrolls of most employers. Taxable payroll under the federal act and 12 state laws is the first \$7,000 in wages paid each worker during a year. Forty-one states have taxable payrolls above \$7,000. Employers are allowed a percentage credit of taxable payroll for contributions paid to states under state unemployment insurance laws. The remaining percent of the federal tax finances administrative costs, the federal share of extended benefits, and advances to states. About 97 percent of wage and salary workers are covered by unemployment insurance.

Retirement programs for government employees—The Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS) are the two major programs providing age and service, disability, and survivor annuities for federal civilian employees. In general, employees hired after December 31, 1983, are covered under FERS and the social security program (OASDHI), and employees on staff prior to that date are members of CSRS and are covered under Medicare. CSRS employees were offered the option of transferring to FERS during 1987 and 1998. There are separate retirement systems for the uniformed services (supplementing OASDHI) and for certain special groups of federal employees. State and local government employees are covered for the most part by state and local retirement systems similar to the federal programs. In many jurisdictions these benefits supplement OASDHI coverage.

Workers' compensation—All states provide protection against work-connected injuries and deaths, although some states exclude certain workers (e.g., domestic workers). Federal laws cover federal employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Department of Labor administers "black lung"

benefits programs for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Specified occupational diseases are compensable to some extent. In most states, benefits are related to the worker's salary. The benefits may or may not be augmented by dependents' allowances or automatically adjusted to prevailing wage levels.

Income support—Income support programs are designed to provide benefits for persons with limited income and resources. The Supplemental Security Income (SSI) program and Temporary Assistance for Needy Families (TANF) program are the major programs providing monthly payments. In addition, a number of programs provide money payments or in-kind benefits for special needs or purposes. Several programs offer food and nutritional services. Also, various federal-state programs provide energy assistance, public housing, and subsidized housing to individuals and families with low incomes. General assistance may also be available at the state or local level.

The SSI program, administered by the Social Security Administration, provides income support to persons aged 65 or older and blind or disabled adults and children. Eligibility requirements and federal payment standards are nationally uniform. Most states supplement the basic SSI payment for all or selected categories of persons.

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 contained provisions that replaced the Aid to Families With Dependent Children (AFDC), Job Opportunities and Basic Skills (JOBS), and Emergency Assistance programs with the Temporary Assistance for Needy Families block grant program. This law contains strong work requirements, comprehensive child support enforcement, support for families moving from welfare to work, and other features. The TANF became effective as soon as each state submitted a complete plan implementing TANF, but no later than July 1, 1997. The AFDC program provided cash assistance based on need, income, resources, and family size.

Federal food stamp program—Under the food stamp program, single persons and those living in households meeting nationwide standards for income and assets may receive coupons redeemable for food at most retail food stores or provides benefits through electronic benefit transfer. The monthly amount of benefits or allotments a unit receives is determined by household size and income. Households without income receive the determined monthly cost of a nutritionally adequate diet for their household size. This amount is updated to account for food price increases. Households with income receive the difference between the amount of a nutritionally adequate diet and 30 percent of their income, after certain allowable deductions.

To qualify for the program, a household must have less than \$2,000 in disposable assets (\$3,000 if one member is aged 60 or older), gross income below 130 percent of the official poverty guidelines for the household size, and net income below 100 percent of the poverty guidelines. Households with a person aged 60 or older or a disabled person receiving SSI, social security, state general assistance, or veterans' disability benefits may have gross income exceeding 130 percent of the poverty guidelines. All households in which all members receive TANF or SSI are categorically eligible for food stamps without meeting these income or resource criteria. Households are certified for varying lengths of time, depending on their income sources and individual circumstances.

Health and welfare services—

Programs providing health and welfare services are aided through federal grants to states for child welfare services, vocational rehabilitation, activities for the aged, maternal and child health services, maternity and infant care projects, comprehensive health services, and a variety of public health activities. For information about the Medicaid program, see Section 3, Health and Nutrition.

Noncash benefits—The U.S. Census Bureau annually collects data on the characteristics of recipients of noncash (in-kind) benefits to supplement the collection of annual money income data in the Current Population Survey (see text, Section 1, Population, and Section 13, Income, Expenditures, Poverty, and Wealth). Noncash benefits are those benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. As for money income, the data for noncash benefits are for the calendar year prior to the date of the interview. The major categories of noncash benefits covered are public transfers (e.g., food stamps, school lunch, public housing, and Medicaid) and employer or union-provided benefits to employees.

Statistical reliability—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to HHS and Census Bureau data, see Appendix III.

Table 5.19. Selected Payments to Individuals by Function: 1960 to 2006
